Confronting Corruption in Business Alan T. Belasen, Roxana Toma, 2015-12-07 *Confronting Corruption in Business* focuses on the contextual issues that trigger corruption to give the reader a more thorough understanding of destructive leadership. It provides students with a unique, critical perspective on issues of leadership, corruption, and policy in different countries, industries, and companies. While there isn't a universally agreed upon definition of corruption in social sciences, it generally refers to efforts to secure wealth or power through misusing public power for private gain. This kind of destructive leadership is typically treated as an anomaly, but this book closes the gap in our understanding by highlighting the wider consequences of this behavior within business, and on an international level. Armed with this understanding, one also learns how to mitigate its causes and consequences. Edited by leading experts, the book includes contributions from scholars with international expertise on leadership, strategy, political science, finance, organizational change, and public policy. It is the first book to focus on corruption on the country level and within business, and students in international business, management, ethics, and leadership classes will find it a valuable read.

Iran Unveiled Ali Alfoneh, 2013-04-18 Iran is currently experiencing the most important change in its history since the revolution of 1979 and the establishment of the Islamic Republic: The regime in Tehran, traditionally ruled by the Shia clergy, is transforming into a military dictatorship dominated by the officers of the Islamic Revolutionary Guards Corps (IRGC; Sepah-e Pasdaran-e Engelab-e Eslami). This transformation is changing not only the economy and society in Iran, but also the Islamic Republic's relations with the United States and its allies.

Games of Competition Barış Ekdi, 2023-07-03 An entertaining book on competition law, written in a storytelling format, based on the author's twenty years of experience, with the aim of helping business people and managers who are very successful in competition, but intend to leave the competition law compliance to their lawyers, thus facing million-dollar fines. ---- If you are a highly successful business person, there is no doubt that you know the competition better than your competitors and play the game better than them. When it comes to the law, it seems natural and reasonable for most of us to leave the matter to our lawyers, right? However, when you look at the twenty years of experience in this book, thinking this way can be very costly, for example, it can cost you ten percent of your revenue. Simply, if you are operating in a market, it is inevitable that your path will intersect with competition law at some point. If you have underestimated it, when Competition Experts come knocking on your door, you will see that your lawyers cannot change the simple mistakes you made in the past, they can only try to minimize the fines or damages you will face. Like some of you, they will quickly memorize the relevant legislation, which you have always been avoiding, and you will realize how essential it is for a business person to have at least a minimal understanding of competition law. The author of the book, Barış Ekdi, who served as a Competition Assistant Expert, Competition Expert, Chief Competition Expert, Training Director, and Department Head at the Competition Authority for 16 years since its establishment, and has been practicing competition law on the other side of the table since 2013. Having written two theses, two book chapters, and various articles on competition law throughout his professional career, and also being awarded the Orhan Kemal Short Story Prize with

his short stories, Barış Ekdi is now undertaking a very ambitious task: to tell the stories of Competition Authority decisions in a storytelling format, to teach the foundations of competition law in an entertaining way, to provide you with an idea of when you should consult a competition lawyer before taking action, to prevent potential mistakes and fines, and even to help you stay one step ahead of your competitors and take necessary measures against anti-competitive actions of other players in the market. The book takes you from the beginning of modern competition law to the present day, showing you how easily you can violate the basic provisions of competition law (and therefore what you should avoid), the exemptions provided, what you need to do before any merger or acquisition, as well as the procedure, how your emails – even your silence – can be used against you, and providing examples from relevant cases to show you how you may face trillion-dollar fines if you hesitate when experts come knocking on your door. The stories in each chapter are written to answer the questions of what is this?, why is it necessary?, what is the underlying logic?, and how is it practically implemented? Therefore, starting from America and visiting the Bulb Blasting Cartel in Switzerland, the Gazz Brothers at Tilmen Hotel, the Lace-Weaving Grannies Cartel in Şirince, and the rebellious teacher in Kulu, you will have the opportunity to take a look at various markets ranging from poultry to traffic signaling, from coal to media, from cement to cinema, from LPG to dialysis services, and as a business person, you will see strategic mistakes made, and as a consumer, you will see how the decisions made by companies affect you. Similarly, when you see lawyers who unknowingly confess the violations of their clients by pulling expressions from economics textbooks, companies, chambers, bureaucrats, and politicians who unwittingly encourage violations of the law while trying to defend themselves, you will better understand why business people need to be careful and knowledgeable about competition law.

The Regulation of Turkish Network Industries Muzaffer Eroğlu, Matthias Finger, 2022-01-01 This book brings together academics and experts on Turkish network industries. It provides fundamental information on the current developments regarding regulation of the different network industries in Turkey. Turkey has gone through a liberalization process in most of the network industries during the past 20 years. In most of them, independent regulatory authorities have been established, but some network industries are still remaining under the central or local government regulatory regime. As a result, there is now a very complicated regulatory regime in place which makes Turkey's regulatory system difficult to understand for practitioners, academics, lawyers, researchers and investors. This book offers unique insight into Turkey's regulatory regime in various network industries. It also offers a historical background to regulation, a description of the current regulatory regimes, as well as an analysis of the foreseeable evolutions. The book covers all the important network industries in Turkey. No similar book is available on the market to date. Moreover, the book provides an extensive analysis of the current regulatory regimes in the energy, the transport, and the telecommunications industries. This book should be of interest to anyone wishing to understand Turkish regulation and will be very helpful handbook to researchers who are interested in regulation of network industries not only in Turkey but also in other developing countries, as Turkey is quite representative of other emerging countries. Readers will acquire a thorough understanding of the state of play of the Turkish network industries and their regulation.

Iran-Turkey Relations, 1979-2011 Suleyman Elik, 2013-03-01 Both Turkey and Iran are large and important countries in the Middle East; how these two countries relate to each other is of crucial importance both for the region and for the wider world. This book explores the diplomatic, security and energy relations of these two middle power states since 1979, analysing the impact of religious, political and social transformation on their bilateral relationship. It considers the nature of Turkey-Iran relations in the context of middle power relations theory, and goes on to look at diplomatic crises that have taken place between Turkey and Iran since 1979. The author analyses Turkey and Iran's security relations with the wider Middle East, including the Kurdish-Turkish War, the Kurdish-Iranian War and the Kurdish-Arab War, and their impact on regional politics.

Iran's Struggle for Economic Independence Evaleila Pesaran, 2011-04-25 It is often assumed that Iran must necessarily submit to the forces of globalization and liberalize its economy, but the country's ruling elites have continued throughout the post-revolutionary era to resist these pressures for neo-liberal economic reform, seeking to survive in the battlefield of today's globalizing economy whilst remaining loyal to their own rules of engagement. This book analyzes the dynamics of economic reform in the Islamic Republic of Iran as they have played out in this post-revolutionary struggle for economic independence from 1979 up to the present day. It shows how, although some groups within the Iranian elite are in favor of opening up the economy to the inflow of foreign capital – believing that lasting independence requires economic growth powered in part by investment from abroad – others argue that such economic liberalization might endanger Iran's national interests and put the survival of the post-revolutionary regime at risk. By examining the political causes of the ongoing tug-of-war that has taken place between these two sides of reform and counter-reform, this book provides a new approach to understanding the complex process of economic policy-making in the Islamic Republic of Iran, which will be relevant to future examinations of the political economy of the Middle East.
