Talk about Writing Jo Mackiewicz,Isabelle Thompson,2018-04-24 Talk about Writing: The Tutoring Strategies of Experienced Writing Center Tutors offers a book-length empirical study of the discourse between experienced tutors and student writers in satisfactory conferences. It analyzes writing center talk, focusing on tutors' verbal strategies, at the macro- and microlevels. The study details tutors' use of three categories of tutoring strategies—instruction, cognitive scaffolding, and motivational scaffolding—with each chapter of the analysis ending in practical advice about tutor training. The second edition adds to the discussion of research provided in the first edition, maintaining the two previous goals: to provide a theory-based coding scheme for analyzing tutoring strategies according to their potential for instructing and scaffolding student writers' learning, and to demonstrate that analysis on 10 satisfactory conferences conducted by experienced writing center tutors. New to this edition, the authors expand the previous discussion of the coding scheme with additional details about its development. Along with the expanded Chapter 3 about research methods, this edition features new examples from the corpus of conferences and updates the literature review.

One-on-One Tutoring by Humans and Computers Martha Evens,Joel Michael,2006-08-15 One-on-One Tutoring by Humans and Computers articulates the CIRCSIM-Tutor project, an attempt to develop a computer tutor that generates a natural language dialogue with a student. Editors Martha Evens and Joel Michael present the educational context within which the project was launched, as well as research into tutoring, the process of implementation of CIRCSIM-Tutor, and the results of using CIRCSIM-Tutor in the classroom. The domain of this project is cardiovascular physiology, specifically targeting first-year medical students, though the idea is applicable to the development of intelligent tutoring systems across populations, disciplines, and domains. This 5 year-long project was motivated by the belief that students need assistance in building appropriate mental models of complex physiological phenomena, as well as practice in expressing these ideas in their own words to fully develop those models, and experience in problem-solving to use those models effectively. The book outlines directions for future research, and includes distinct features such as: *detailed studies of human one-on-one tutoring; *learning outcomes resulting from use of the tutor; *natural language input parsed and translated into logical form; and *natural language output generated using the LFG paradigm. This volume will appeal to educators who want to improve human tutoring or use computer tutors in the classroom, and it will interest computer scientists who want

to build those computer tutors, as well as anyone who believes that language is central to teaching and learning.

The Tutor Peter Abrahams,2002-06-25 Master of psychological suspense Peter Abrahams returns with an ingenious tale of an ordinary family that unknowingly invites the agent of their destruction into their own home. When Scott and Linda Gardner hire Julian Sawyer to tutor their troubled teenage son Brandon, he seems like the answer to a prayer. Capable and brilliant, Julian connects with Brandon in a way neither of his parents can. He also effortlessly helps Linda to salvage a troubled business deal and gives Scott expert advice on his tennis game. Only eleven-year old Ruby—funny, curious, devoted to Sherlock Holmes—has doubts about the stranger in their midst who has so quickly become like a member of the family. But even the observant Ruby is far from understanding Julian's true designs on the Gardners. For Julian, the Gardners are like specimens in jars, creatures to be studied— and manipulated. Scott is a gambler with no notion of odds, festering in the shadow of his more successful brother. Linda is ambitious, hungry for the cultured stimulation Julian easily provides. Brandon is risking his future late at night in the town woods. And Ruby—well, she's just a silly little girl. And in that miscalculation lies the Gardner family's only possible salvation. In The Tutor, Peter Abrahams creates a living, breathing portrait of an American family, their town, their secrets, their dreams—and a portrait just as compelling of the menace they welcome into their home. It is his most chilling, suspenseful novel to date.

Filling a major gap in the research on writing center theory, first-year writing pedagogy, and higher education academic support resources, this book provides narrative evidence of students' own experiences with learning assistance discourse communities. It features a variety of voices that address how academic support resources such as writing centers have served as the nucleus for students' (i.e., both tutors and their clients) sense of community and self, ultimately providing a space for freedom of discourse and expression. It includes narratives from writing tutors supporting students in unconventional spaces such as prisons, tutors offering support in war-torn countries, and students in international centers facing challenges of distance learning, access, and language barriers. The essays in this collection reveal pedagogical takeaways and insights about both student and tutor collaborative experiences in writing center spaces. These essays are a valuable resource for student writing tutors and anyone involved with them, including composition instructors and scholars, writing center professionals, and any faculty or administrators involved with academic support programs.
