The NVQ Assessor, Verifier and Candidate Handbook Ros Ollin, Jenny Tucker, 2008 To guarantee the credibility and value of an NVQ - irrespective of subject matter - it is critical that standards are maintained to ensure consistency nationwide. The assessor needs to ensure that all papers are marked in the same way, the verifier needs to ensure that the same standards are maintained across all assessors, and the candidate needs to know what is expected of them. This is the only book for assessors and verifiers and is essential reading for anyone involved in vocational education, including those taking NVQs. Packed with detailed and reliable guidance, this essential handbook - now in its fourth edition - gives a template for success. From the assessor's point of view, it shows the standards expected to ensure objectivity and consistency when assessing and marking the work submitted by the candidate. For the verifier, it gives a detailed template for delivering absolute consistency across assessors. For the candidate, it shows what is expected from the assessor in terms of presentation of work, recording of documents and the correct submission of material. The book now includes the latest knowledge requirements under Domain E: Assessment. Complete with examples and case studies, this handbook is the standard guide for anyone involved in the awarding of the NVQ. Previously published as The NVQ Assessor and Verifier Handbook.

The Verifiers Jane Pek, 2022-02-22 Introducing Claudia Lin: a sharp-witted amateur sleuth for the 21st century. This debut novel follows Claudia as she verifies people's online lives, and lies, for a dating detective agency in New York City. Until a client with an unusual request goes missing. . . . "The world of social media, big tech and internet connectivity provides fertile new ground for humans to deceive, defraud and possibly murder one another. . . . Well rendered and charming. . . . Original and intriguing." —The New York Times Book Review Claudia is used to disregarding her fractious family's model-minority expectations: she has no interest in finding either a conventional career or a nice Chinese boy. She's also used to keeping secrets from them, such as that she prefers girls—and that she's just been stealth-recruited by Veracity, a referrals-only online-dating detective agency. A lifelong mystery reader who wrote her senior thesis on Jane Austen, Claudia believes she's landed her ideal job. But when a client vanishes, Claudia breaks protocol to investigate—and uncovers a maelstrom of personal and corporate deceit. Part literary mystery, part family story, *The Verifiers* is a clever and incisive examination of how technology shapes our choices, and the nature of romantic love in the digital age. A VINTAGE ORIGINAL.

All those involved in the assessment of candidates working towards national qualifications require accreditation themselves. Fully revised and in line with the new Learning and Development standards, this highly regarded book provides the fundamental information, practical advice and background knowledge for anyone wishing to obtain the assessor, or internal verifier qualifications. The Quote Verifier Ralph Keyes, 2007-04-01 Our language is full of hundreds of quotations that are often cited but seldom confirmed. Ralph Keyes's *The Quote Verifier* considers not only classic misquotes such as Nice guys finish last, and Play it again, Sam, but more surprising ones such as Ain't I a woman? and Golf is a good walk spoiled, as well as the origins of popular sayings such as The opera ain't over till the fat lady sings, No one washes a rented car, and Make my day. Keyes's in-depth research routinely confounds widespread assumptions about who said what, where, and when. Organized in easy-to-access dictionary form, *The Quote Verifier* also contains special sections highlighting commonly misquoted people and genres, such as Yogi Berra and Oscar Wilde, famous last words, and misremembered movie lines. An invaluable resource for not just those with a professional need to quote accurately, but anyone at all who is interested in the roots of words and phrases, *The Quote Verifier* is not only a fascinating piece of literary sleuthing, but also a great read.

A Program Verifier J. C. King, 1969 The paper reports research toward developing a 'verifying compiler'. Such a compiler, as well as doing the standard translation of a program to machine executable form, attempts to prove that the program is 'correct'. In order to do this, a program must be annotated with propositions in a mathematical notation which define the 'correct' relations among the program variables. The verifying compiler then checks for consistency between the program and its propositions. The thesis presents the theoretical basis of the method and then describes a prototype verifier in detail. This verifier, running on an IBM 360, operates on programs written in a simple programming language for integer arithmetic. Many programs have been automatically verified by this program. These include a simple sort program, a program which examines a number for the property 'prime', and a rather subtle program which raises an integer to an integral power. The formal analysis of a program produced 'verification conditions' which must be proven to be theorems over integers. The verifier proves these theorems by using powerful formula simplification routines and specialized techniques for integer expressions. Ideas for improving this verifier and for building one which will operate on a more complicated programming language are also presented. (Author).

Essays on Essence and Existence Bob Hale, 2020-03-26 *Essays on Existence and Essence* presents a series of writings—including several previously unpublished—by Bob Hale on the topics of ontology and modality. The essays develop and consolidate a number of themes central to his work and to contemporary metaphysics, logic, and philosophy of language. They display Hale's innovative approach to some of the most fundamental issues in philosophy, in dialogue (and, in some cases, in collaboration) with other leading philosophers. The notion of a definition is examined as it applies both to words—verbal definitions—and to things—real definitions—and the relations between these are brought out in order to address problems in the metaphysics of necessity and the semantics and epistemology of modality. Hale argues for an essentialist theory of the source of necessity and our knowledge of it, and provides rigorous and inventive responses to problems such a theory might face. This theoretical framework is applied to the recently influential truthmaking approach to semantics and logic, developing an exact truthmaker account of universal quantification and modal statements. Other topics covered include the Fregean theory of ontological categories, the status of second-order logic, the metaphysics of numbers,

and the nature of analytic propositions. The volume opens with a substantial introduction by Kit Fine, providing a critical examination of Hale's philosophy, and closes with a complete bibliography of Hale's writings.
