Merchant Vessels of the United States... United States. Coast Guard,1917

The Vessels Anna M. Elias,2020 NOT EVERY SPIRIT SEEKS REDEMPTION. NOT EVERY VESSEL WILL SURVIVE. What if you could help those who've passed on get a second chance--but at the risk of your own life? Four broken strangers volunteer to become the first humans in North America to join the international VESSELS program. Their bodies will host the Spirits who seek to right past wrongs and earn a chance at Elysium. Disguised inside a homeless shelter in Reno, the program is facilitated by a retired Army officer, a former ER Doctor, and a tech-savvy teen who tracks the Spirits merged with their Vessels through an ancient ritual on the Anaho Reservation. The Vessels only have seven days to succeed--and to survive. But when the vengeful spirit of a serial killer enters one of them, they learn not all Spirits are here for redemption.

Vessels Claudia Brittenham,2019-09-05 Vessels can take many forms: as objects made for human interaction and handling, they both contain and are bounded by space. They can be constructed of a wide variety of materials. But the range of vessels - across history and across cultures - are unified in their potential for practical functioning, whether or not a particular object is in fact made to be used in its particular context. In this volume, four essays by leading scholars tackle the category of the vessel in a comparative conversation between classical Greece, late antique Rome, pre-Columbian Mesoamerica, and ancient China. By considering the material properties of the object as container, the interactions between user and artefact, and the power of the vessel as both conceptual category and material metaphor, they argue that many vessels - and assemblages of vessels - were sites of remarkable workmanship and considerable ingenuity, smart and sophisticated commentaries on the very categories that they embody. In placing these individual case studies in dialogue, the volume offers an art historical and cross-cultural study of vessels in ancient societies, considering both objects and their archaeological contexts. Its aim is to make illuminating comparisons, contrasts, and interpretations by juxtaposing traditions. In keeping with the aims of the series, it serves as a model for a new kind of comparative art history, one which emphasizes material culture and is attentive to questions of evidence and method, yet remains historically grounded and contextually sensitive.

Vessels: A Love Story Daniel Raeburn,2016-03-14 An unforgettable portrait of a marriage tested to its limits. When Dan, a writer with a passion for underground comics, and his wife Bekah, a potter dedicated to traditional Japanese ceramics, met through a mutual friend, they swiftly fell in love. “Of all the women I’ve ever met,” Dan told a friend, “she’s the first one who felt like family.” But at Christmas, as they prepared for the birth of their first child, tragedy struck. Based on Daniel Raeburn’s acclaimed New Yorker essay, *Vessels: A Love Story* is the story of how he and Bekah clashed and clung to each other through a series of unsuccessful pregnancies before finally, joyfully, becoming parents. In prose as handsomely unadorned as his wife’s pottery, Raeburn recounts a marriage cemented by the same events that nearly broke it. *Vessels* is an unflinching, enormously moving account of intimacy, endurance, and love.

World War II U.S. Navy Vessels in Private Hands Greg H. Williams,2014-01-10 During World War II, the U.S. Navy swiftly expanded to include an array of vessels, from smaller yachts and fishing boats bought early in the war for patrol work to fast, modern commercial ships built to haul troops and supplies. After the Allied victory, this diverse fleet became unnecessary and the Navy sold many of its vessels. This comprehensive catalog documents the Navy ships and boats sold after the war and registered under the American flag for commercial or recreational purposes. Focusing on those vessels with names or clearly identifiable hull numbers and crew accommodations, it chronicles each craft’s prewar ownership, wartime history, and postwar fate. The product of painstaking detective work in a wide range of primary sources, this meticulous directory highlights an unexplored but illuminating aspect of U.S. maritime history.

Stone Vessels and Values in the Bronze Age Mediterranean Andrew Bevan,2007-08-13 The societies that developed in the eastern Mediterranean during the Bronze Age produced the most prolific and diverse range of stone vessel traditions known at any time or anywhere in the world. Stone vessels are therefore a key class of artefact in the early history of this region. As a form of archaeological evidence, they offer important analytical advantages over other artefact types - virtual indestructibility, a wide range of functions and values, huge variety in manufacturing traditions, as well as the subtractive character of stone and its rich potential for geological provenancing. In this 2007 book, Andrew Bevan considers individual stone vessel industries in great detail. He also offers a highly comparative and value-led perspective on production, consumption and exchange logics throughout the eastern Mediterranean over a period of two millennia during the Bronze Age (ca.3000–1200 BC).

The Age of the Galley Robert Gardiner,1995 Part of Conway's History of the Ship series, this volume deals with Mediterranean developments from the earliest re corded history, but concentrates on the oared vessel in all its varieties from pre-classical times, through the eras of the trireme and its many-banked successors, to the final extinction of the last galley fleets in the 18th century. Besides the ships themselves, background chapters cover such issues as navigation and shiphandling and rowing systems.
