British Music Videos 1966 - 2016 Emily Caston,2020-07-31 Based on new archival evidence and interviews, and setting out a new theoretical framework for music video analysis, Emily Caston presents a major new analysis of music videos from 1966-2016, identifying not only their distinctive British traits, but their parallels with British film genres and styles. By analysing the genre, craft and authorial voice of music video within the context of film and popular music, the book sheds new light on existing theoretical and historical questions about audiences, authorship, art and the creative industries. Far from being an American cultural form, the book reveals music video's roots in British and European film traditions, and suggests significant ways in which British video has impacted popular film and music culture.

Supporting Requirements Communication for Shared Understanding by Applying Vision Videos in Requirements Engineering Oliver Karras ,2021-05-15 Requirements engineering (RE) has the overall goal of establishing the vision of the system in its relevant context. For this goal, all stakeholders must disclose, discuss, and align their mental models of the system by explicitly communicating their goals, ideas, needs, and expectations. This procedure serves to develop and

negotiate a shared understanding and is called requirements communication. In this thesis, I analyze the application of videos as a documentation option in RE to support effective requirements communication for shared understanding. Videos used for this purpose are called vision videos. Based on a technology transfer process, I develop a candidate solution consisting of the two concepts video as a by-product and awareness and guidance. The first concept supports the revision of RE practices by integrating video production and use to obtain videos as a by-product with low effort and sufficient quality. The second concept helps software professionals with video production and use by creating awareness regarding video quality and providing guidance on how to proceed. Each concept is first validated in academia before the entire candidate solution is validated in a case study in the industry. The findings from academia and industry indicate that the candidate solution helps software professionals to gain the required awareness, knowledge, and ability to produce and use vision videos at moderate costs and with sufficient quality. These videos are suitable for the intended purpose of supporting requirements communication for shared understanding.

Digital Music Videos Steven Shaviro, 2017-04-15 Music videos today sample and rework a century's worth of movies and other pop culture artifacts to offer a plethora of visions and sounds that we have never encountered before. As these videos have proliferated online, they have become more widely accessible than ever before. In Digital Music Videos, Steven Shaviro examines the ways that music videos interact with and change older media like movies and gallery art; the use of technologies like compositing, motion control, morphing software, and other digital special effects in order to create a new organization of time and space; how artists use music videos to project their personas; and how less well known musicians use music videos to extend their range and attract attention. Surveying a wide range of music videos, Shaviro highlights some of their most striking

innovations while illustrating how these videos are creating a whole new digital world for the music industry.

Totally Hilarious YouTube Videos: volume 1 Hew Moore, 2015-07-27 20 bite sized chunks of comedy gold! From animals being jerks to Saturday Night Live's the Lonely Island, you'll laugh out loud! This volume is Safe for Work, Child Friendly and Hilarious. (no swearing, no nudity, no religious commentary). Please note: You will need a Wi-Fi connection to access all videos. Not all ebook readers will be able to view videos directly, please use the Look Inside feature for more information (You'll also get to check out a couple of the video links for free!). Videos range in length and are great for laughs in the work lunch hour, occupying children with an iPad, or any time you want a quick pick me up.

Multimodal Location Estimation of Videos and Images Jaeyoung Choi, Gerald Friedland, 2014-10-06 This book presents an overview of the field of multimodal location estimation. The authors' aim is to describe the research results in this field in a unified way. The book describes fundamental methods of acoustic, visual, textual, social graph, and metadata processing as well as multimodal integration methods used for location estimation. In addition, the book covers benchmark metrics and explores the limits of the technology based on a human baseline. The book also outlines privacy implications and discusses directions for future research in the area.

Language Learning Through Captioned Videos Mark Feng Teng, 2020-11-29 This research- and pedagogy-oriented book delves into the study and application of incidental vocabulary acquisition in

English through captioned videos. This technology offers EFL students of different ages more opportunities for vocabulary learning compared to the traditional classroom. This book reviews the conceptual, methodological, theoretical, and practical issues associated with captioned videos and offers innovative ideas to help researchers, graduate students, and classroom practitioners enhance learners' vocabulary acquisition at all levels.

Making YouTube Videos Nick Willoughby, 2019-09-06 Everything kids need to create and star in their own video! YouTube has won the hearts, minds, and eyes of kids around the globe. Young people everywhere are making their mark on this popular platform—some of them even gaining massive followings, worldwide recognition, and the paychecks that come along with it. While lots of youngsters are happy to be spectators, others are hungry to create and star in YouTube content of their own—and this book shows them how. Written for kids in a language they can understand, this book helps budding filmmakers and producers create their own videos—no matter the subject. It offers creators the insight on how to plan and shoot quality videos, install and use video editing tools, and post the final product to YouTube. Apply tricks that pro filmmakers use for better shots, lighting, and sound Edit your video, add transitions, insert a soundtrack, and spice things up with effects Shoot and share your video gaming exploits Share finished videos with family, friends, and the world For any kid interested in joining the YouTube revolution, this book is the perfect place to start!

A Music Librarian's Guide to Creating Videos and Podcasts Katie Buehner, Andrew Justice, 2018-01-01 A Music Librarian's Guide to Creating Videos and Podcasts is a guide every music

librarian will want to use to develop and enhance multi-media skills. The digital age has created a divide between music librarians and their patrons: traditional models of interaction have been superseded or replaced by electronic communication, and virtually all librarians have felt the ensuing decline of their users' information-seeking skills. Music librarians can now be proactive in reaching out to patrons digitally with videos and podcasts, since editing technologies for both platforms have become inexpensive and easy to use. In *A Music Librarian's Guide to Creating Videos and Podcasts* Katie Buehner and Andrew Justice give music librarians the step-by-step instructions for creating their own content in both Mac and PC platforms. This ready reference on videos should find home in every library and also many personal collections.

Traveling Music Videos Tomáš Jirsa, Mathias Bonde Korsgaard, 2023-10-05 *Traveling Music Videos* offers a new interdisciplinary perspective on how contemporary music videos travel across, shape, and transform various media, online platforms, art institutions, and cultural industries worldwide. With the onset of digital technologies and the proliferation of global video-sharing websites at the beginning of the 21st century, music video migrated from TV screens to turn instead to the internet, galleries, concert stages, and social media. As a result, its aesthetics, technological groundings, and politics have been radically transformed. From the kinaesthetic experience of TikTok to the recent reimaginations of maps and navigation tools through music video cartographies, from the ecofeminist voices mediated by live-stream concerts to the transmedia logic of video games and VR, from the videos' role in contemporary art galleries to their political interventions -the chapters map the ways music video is continually reconfiguring itself. The volume tracks music video's audiovisual itineraries across different geographies, maps its transmedia routes, and tackles the cultural impact that it has on our current media ecosystem.
