Latomus and Luther Anna Vind,2019-09-16 Who was Jacob Latomus? What did he write in the series of lectures to which Luther penned an answer in 1521, an answer which is now so central to many interpretations of the great reformer? And how is the reading of that answer affected when it is preceded by an interpretation of what Latomus wrote?The study goes through the most important parts of Latomus' treatise against Luther (1521). The aim is to identify Latomus' theological convictions and thus to pin down who and what Luther was up against. The second and major part of the book is a reading of Luther's pamphlet against Latomus (1521). Parallels are drawn with Latomus' theology in order to facilitate as much as possible an appreciation of the differences between the two.The comparison between the two theologians shows that they speak completely different languages and that their viewpoints do not square at all. Basically their ways depart in their understanding of God's word and how it is communicated to man. This generates two ways of perceiving the matter of theology, and of speaking theologically –: and prevents mutual understanding. Latomus cannot understand Luther's view of the autonomy of God's word and the special character of proclamation, and hence a theology which is incompatible with natural reason. Even though he accepts a division between a natural and a supernatural rationality, and thus admits that natural reason has a limit, he grants the very same natural reason an important role in the ascent of cognition towards revelation. Everything else – such as Luther's theology – is a dehumanization of the human being. Luther, on the other hand, regards Latomus' theology as a result of the impulse in sinful man towards ruling and controlling the word of God with his own inadequate natural abilities. In Luther's eyes that proclamation of Christ, which in the shape of a human being comes to man in contradiction of everything human, here disappears in the twinkling of an eye.

'Church' at the Time of the Reformation Anna Vind,Herman J. Selderhuis,Violet Soen,Christopher B. Brown,Günter Frank,Bruce Gordon,Barbara Mahlmann-Bauer,Tarald Rasmussen,Zsombor Tóth,Günther Wassilowsky,Siegrid Westphal,2021-06-07 The present volume aims at a clarification and a discussion of the church in the 16th century: What did the reformers think about the essence and origin of the holy, apostolic and Catholic church? What was seen as the aim of it, its task and mission? Can human beings see the true church or not? Does it have one existence in this world and another in the world to come? Furthermore, the concept of church is indissolubly connected to the theological concepts of sin, faith, justification, sanctification, and salvation, and the study of the church also involves reflection upon the nature and scope of the sacraments, the role of the clergy, the aim of church-buildings, the significance of church properties and upon the constituent parts of the mass/church service. Finally, and not least, it is important to investigate the role of the church in the societies of the 16th century, such as the impact of the ruling powers upon them, their significance for education and social cohesion, and the cultural significance of migrating believers, on the run within and beyond the borders of Europe. Together with theological, philosophical and art-historical questions, these issues are considered in order to create a much fuller picture of the church at the time of the Reformation.

Danish Design Heritage and Global Sustainability Ditte Lysgaard Vind, 2023-10-23 With a bias for action, this book offers valuable insights into the origins of the much-celebrated Danish design tradition and how it can be employed to create design solutions to address today's environmental crisis using the planetary boundaries as positive creative constraints. Danish design has long been revered for its high-quality aesthetics, materials and craftsmanship, encouraging sustainability without compromise. This book explores the lessons to be learnt from Scandinavian design ideals, introduces the philosophy and principles of circular economy and showcases the potential power of combining circular economy and design in helping to mitigate the effects of climate change. It presents a range of case study examples across multiple sectors and includes interviews with Danish designers from architecture, furniture, fashion, digital and industrial design, providing unique insights by some of the world's leading contemporary designers. Bridging theory and real-world insights and experiences, this book builds on the framework of the 4Rs – The Circular Way: Reduce, Reuse, Recycle and Replace to encourage innovation through the replacement of environmentally damaging materials and business models. A must-read for product designers, industrial designers, consultants, business developers, sustainability professionals and students interested in learning how to design and implement circular, sustainable models into practice.

Independence, Additivity, Uncertainty Karl Vind, 2012-11-06 Volume 14 in the Studies in Economic Theory series deals with the important economic problem of uncertainty. It contains all the classical results, but also new results that give a solution to how uncertainty can be formalized.

In-visibility Anna Vind, Iben Damgaard, Kirsten Busch Nielsen, Sven Rune Havsteen, Christopher B. Brown, Günter Frank, Bruce Gordon, Barbara Mahlmann-Bauer, Tarald Rasmussen, Violet Soen, Zsombor Tóth, Günther Wassilowsky, Siegrid Westphal, 2020-10-05 The content of the book reconsiders the relation between visibility and transcendence. The focus is especially on the contribution to this issue from the theological tradition in protestant Europe between the 16th and the 21st Centuries. In the book a thematically broad field is covered embracing more than five centuries and a plurality of methods drawn from theology, philosophy, and the history and theory of art. The book is divided into five sub-themes: In the first and more fundamental part, 'The phenomenology of in-visibility', questions underlying the other four themes are sought defined or narrowed down. Here the modes of appearing/revealing or hiding of phenomena are reflected. In the second section of the book dealing with 'Language as a mode of revealing and hiding' the specific role of verbal expressions understood in a very broad sense is at the core: What is the fundamental understanding and use of language, when speaking of the ineffable? The third section about 'Human existence between visibility and invisibility' focuses on theological anthropology: its features and norms. The ambiguity of anthropological categories such as faith, rationality, imagination, memory and emotion play a prominent role in this context. The fourth section concerning 'The manifestation of a 'beyond' in the arts' investigates transcendence in the arts. What are the theological discourses behind the religious uses of the different artistic media (i.e. images, music, liturgical inventory, architecture)? Finally in the fifth section concerning 'Visible community and invisible transcendence' one finds contributions working with the idea of 'vicarious representation'.

Rigid Body Dynamics of Mechanisms 2 Hubert Hahn, 2013-03-09 Intended for self-study, this second volume presents a systematic approach for deriving model equations of planar and spatial mechanisms. The necessary theoretical foundations have been laid in the first volume. The focus is on the application of the modeling methodology to various examples of rigid-body mechanisms, simple planar ones as well as more challenging spatial problems. A rich variety of joint models, active constraints, as well as active and passive

force elements is treated. The book is intended for self-study by working engineers and students concerned with the control of mechanical systems, i.e. robotics, mechatronics, vehicles, and machine tools. Its examples can be used as models for university lectures.

Human Comes First ,2018-08-03 The Christian theology of N.F.S. Grundtvig (1783-1872) is based on the principle that humankind, created in God's image, has retained a divine spark and that image, which can welcome God's gift of grace and salvation. Human Comes First illustrates this principle through a selection of Grundtvig's articles, teachings, sermons, letters and speeches from half a century of his theological activity. As part of its agenda to digitalise and translate Grundtvig's vast output, the Grundtvig Study Centre at Aarhus University is pleased to publish this third volume in the series 'N.F.S. Grundtvig: Works in English'. Volume 1. The School for Life (2011), contains Grundtvig's major writings on education, and Volume 2. Living Wellsprings (2015) contains a selection of his hymns, songs, and poems. Future volumes will deal with his politics and his philosophy.

The Survival of Sewage Bacteria at Various Ocean Depths H. P. Vind,James S. Muraoka,C. W. Mathews,1975 The disposal of sewage in the sea and adjoining estuaries is widespread. The outfalls are usually relatively close to shore and the sewage is discharged at depths of 200 feet or less. The purpose of the study undertaken by the Civil Engineering Laboratory (CEL), Port Hueneme, CA, and described in this technical note is to determine whether sewage bacteria would survive for longer or shorter periods if the sewage were discharged at greater depths, where there is less light, where the pressure is greater and where the temperature is lower. Bacteria of the species *Escherichia coli*, the most abundant bacterial species in human wastes, were employed in the study as representative sewage bacteria.

Institutions, Equilibria and Efficiency Christian Schultz,Karl Vind,2006-04-22 Competition and efficiency is at the core of economic theory. This volume collects papers of leading scholars, which extend the conventional general equilibrium model in important ways: Efficiency and price regulation are studied when markets are incomplete and existence of equilibria in such settings is proven under very general preference assumptions. The model is extended to include geographical location choice, a commodity space incorporating manufacturing imprecision and preferences for club-membership, schools and firms. Inefficiencies arising from household externalities or group membership are evaluated. Core equivalence is shown for bargaining economies. The theory of risk aversion is extended and the relation between risk taking and wealth is experimentally investigated. Other topics include determinacy in OLG with cash-in-advance constraints, income distribution and democracy in OLG, learning in OLG and in games, optimal pricing of derivative securities, the impact of heterogeneity at the individual level for aggregate consumption, and adaptive contracting in view of uncertainty.
