**Mental Models and Their Dynamics, Adaptation, and Control** Jan Treur,Laila Van Ments,2022-01-26 This book introduces a generic approach to model the use and adaptation of mental models, including the control over this. In their mental processes, humans often make use of internal mental models as a kind of blueprints for processes that can take place in the world or in other persons. By internal mental simulation of such a mental model in their brain, they can predict and be prepared for what can happen in the future. Usually, mental models are adaptive: they can be learned, refined, revised, or forgotten, for example. Although there is a huge literature on mental models in various disciplines, a systematic account of how to model them computationally in a transparent manner is lacking. This approach allows for computational modeling of humans using mental models without a need for any algorithmic or programming skills, allowing for focus on the process of conceptualizing, modeling, and simulating complex, real-world mental processes and behaviors. The book is suitable for and is used as course material for multidisciplinary Master and Ph.D. students.

*Murder in Connecticut* Michael Benson, author of *The Devil at Genesee Junction*, 2008-09-24 DIVAn incisive, unflinching account of the shocking, summer 2007 Connecticut crime that is still making national headlines, *Murder in Connecticut* examines what happened to Dr. William Petit, his wife Jennifer Hawke-Petit, and their two daughters, Hayley and Michaela, in the early morning hours of July 23 in the quiet town of Cheshire--and how their community rallied bravely around the sole survivor of this vicious home invasion. Who was the Petit family? How were they marked for murder by their killers, Joshua Komisarjevsky and Steven Hayes? How could these men have dreamed up such a crime? And will these horrifying murders--with startling similarities to the case in Truman Capote's classic *In Cold Blood*--really be the impetus behind sweeping parole reform laws that will not only affect Connecticut, but all of America? /div
