**The First Superapp** Kevin Shimota,2022-07-05 China has leapfrogged past the West in many areas of tech - China's mobile payments have surpassed the United States 100-fold and most Chinese consumers haven't used cash or a credit card for years - and at the center of this new digital revolution is WeChat, the world's first superapp. For people in China, WeChat is now the everything app - wallet, social media, messaging, food ordering, bill paying, game playing and much more. And companies across the world are only now racing to catch up by creating a similar, all-encompassing digital phenomenon. The First Superapp provides a glimpse of the future, and Kevin Shimota, a former top executive at WeChat, tells the inside story of how this phenomenon began in the context of China's unique internet. He tells the story of WeChat's creation and its climb to become the first superapp, providing insights on the psyche of WeChat's founder, and of modern China tech to explain the fundamentals of these new innovations and how the framework they form could be reproduced beyond China.

**WeChat and the Chinese Diaspora** Wanning Sun,Haiqing Yu,2022-03-31 WeChat (the international version of Weixin), launched in 2012, has rapidly become the most favoured Chinese social media. Globally available, equally popular both inside and outside China and widely adopted by Chinese migrants, WeChat has fundamentally changed the ways in which Mandarin-speaking migrants conduct personal messaging, engage in group communication and community business activities, produce and distribute news, and access and share information. This book explores a wide range of issues connected to the ways in which WeChat works and is used, across the world among the newest members of the Chinese diaspora. Arguing that digital/social media afford a great degree of individual agency, as well as a collective capacity for sustaining an 'imagined community', the book shows how WeChat's assemblage of infrastructure and regulatory frameworks, technical capabilities, content and sense of community has led to the construction of a particular kind of diasporic Chinese world, at a time marked both by China's rise, and anxiety about Chinese influence in the West. **How To Be Wechat Businessmen** Yan Zhi,2020-03-02 This is a story of bad people. WeChat is just a small merchant selling goods on the mobile end, they mainly use WeChat as a platform for network promotion. My name is Lin Jian, I am just a WeChat merchant, a group that many people avoid. My tiny life in this vast network, but truth, life and death, betrayal and love and hate of the entanglement, let me not only in this one. If the lover, do not see clear hearts, bloody gains and losses and always let me doubt: friends and enemies are not really the same? Looking back, the shopping mall full of profits will always have a method and endless struggle that you and I can't figure out. There are no black and white in this place. There is only a fight to the death. So how could there be a good person, he was really fickle.

**Mobile Messenger Apps as Data-collection Method Among Older Adults** Joyce Weil,Nancy J. Karlin,Zixi Lyu,2020 This case study provides a model for using WeChat, a messaging application (app), as a data-collection method. Specifically, we conducted a health-related survey via WeChat's messaging and call features that examined the experience of aging with older adults (aged 50 years and older). As gerontologists and social psychologists, we were interested in collecting data about older adults' health status and social-services access and use, social support, daily activities, economic status, sources of financial support, and advice for future generations. Part of a larger body of research where we examine the contemporary experience of aging in several countries, this study is the first of our group of studies to incorporate an app. Just as in other areas throughout the world, usage of social-media networks, in general and including among older adults, is increasing at a high rate in the People's Republic of China. These apps offer messaging, document attachment, and voice-call features that allow a range of data-collection options. Our study began with a pen-and-paper survey delivered as an attachment via WeChat. When survey responses were largely incomplete, we used the call feature to supplement our data-collection methods, thereby

increasing data. While there are benefits to using a messaging app as a mode toward data collection, such as no cost and bridging geographic boundaries, researchers must recognize the applicability to the population being studied and make the necessary adjustments where possible.
