Website Visibility Melius Weideman,2009-09-22 The quest to achieve high website rankings in search engine results is a prominent subject for both academics and website owners/coders. Website Visibility marries academic research results to the world of the information practitioner and contains a focused look at the elements which contribute to website visibility, providing support for the application of each element with relevant research. A series of real-world case studies with tested examples of research on website visibility elements and their effect on rankings are reviewed. Written by a well-respected academic and practitioner in the field of search engines Provides practical and real-world guidance for real-world situations Based on actual research in the field, which is often used to confirm or refute beliefs in the industry

Website Quality and Shopping Behavior Tereza

Semerádová,Petr Weinlich,2020-04-03 This book analyses the impact of web design parameters on user experience and the behaviour of website users. Website design is considered one of the key parameters of a company's Internet presentation, affecting consumer attitudes and buying behaviour. The authors examine the concept of website quality based on the identification of patterns of user behaviour in the online environment, particularly focusing on the functional and aesthetic parameters of web design and causal relationships between them. Using website traffic analysis and best practices from professionals, they describe a methodical procedure for measuring the quality of web pages and developing optimised websites.

Survey of Policies to Assure Mobile Device Access to the Library Website Primary Research Group,2014 The 100+ page study looks closely at the measures taken by academic, public, and special libraries to assure that mobile devices-iPads, iPhones,

Android devices, Kindles and many others—can access the library website easily and fluently. The report looks at the development of new versions of websites specifically designed for mobile access, at use of various paid and open source services and product for mobile device access, and at general library policies designed to ease the experience of mobile device users. The report presents highly detailed data on the extent of library website traffic accounted for by mobile devices, the impact on library resource use of the deployment of mobile friendly information products from vendors, and much more. More than 60 libraries contributed comprehensive data and insights to the report, and data is broken out by size and type of library and other useful criteria

The Impact of Privacy Laws on Websites and Users Julia Schmitt, 2022-03-30 Policymakers worldwide draft privacy laws to increase user privacy by imposing strict legal requirements. At the same time, policymakers grant websites a degree of freedom in implementing these requirements. However, the effects of privacy laws and the granted implementation freedom on websites and users remain unclear. Yet, when drafting privacy laws, policymakers need to trade-off between increasing user privacy and limiting the harm to websites' ability to earn revenue with the collected user data. Similarly, websites need to anticipate such effects, e.g., on their revenues, when deciding how to implement privacy laws. This dissertation encompasses three articles to shed light on the effects of privacy laws and their granted implementation freedom on websites' revenues and user privacy, using the enforcement of the EU's General Data Protection Regulation (GDPR). The articles show that while the GDPR has average negative effects on websites' revenues, these effects vary across websites' chosen implementation of GDPR. The dissertation further shows that the different implementations of the legal requirements impact user privacy. Thereby, this dissertation provides an empirical foundation of privacy laws' effects on websites' revenues and user privacy, aiding policymakers in evaluating or drafting privacy laws and websites in deciding how to implement them.

If Your Website was an Employee, Would You Fire It? Alan Berg, 2011-06-01 Websites are essential these days for every business, but there are 5 questions you need to ask before you make one. If you didn't you're in the majority. Don't worry you won't need to scrap your site to benefit from these ideas. If your website was an employee, would you fire it? will walk you through how to think differently about your website. What is it now? What should it be? Who's using your site and how? Did you design your website for you, or for the people who are using it every day? When you ask yourself better questions, you'll get better answers and better results. This book was designed to be a quick and easy read. I want you to get on to taking real action, as without action there won't be any change. You'll discover easy things you can do, right away, to improve the performance of your current site or help you design a new one. If you're making a new site, you can still make some of these changes to your current site while the new one is getting ready. Are you ready to begin? Let's start your journey to greater success, today.
