The Internet in China Gianluigi Negro, 2017-10-17 This book aims to identify the most important political, socio-economic, and technical determinants of Internet development in China, through a historical approach that combines political economy, cultural, and public studies. Firstly, the book looks at the most important strategies that compelled the Chinese government to invest in the construction of the Internet infrastructure. Secondly, it examines the relationships between the development of the Internet in China and the emergence of a nascent civil society. Finally, attention is given to three different Chinese online platforms in three different historical periods. This three-pronged approach presents a coherent set of analyses and case studies which are committed to the investigation of the complex process of change undergone by Internet development in China.

Connecting Language and Disciplinary Knowledge in English for Specific Purposes Alissa J. Hartig, 2017-08-11 How are language and disciplinary knowledge connected in the English for Legal Purposes (ELP) classroom, and how far should ELP practitioners go in supporting students' acquisition of the conceptual frameworks that shape the genres they are learning? This book presents a pedagogical model for incorporating these conceptual frameworks into disciplinary language instruction and follows four focal participants as they learn to read and write new genres in a second language and disciplinary culture. By examining not just students' written texts, but also their reading practices and interactions in class and in tutoring sessions, the book traces the ways in which disciplinary knowledge and language interact as students develop academic literacy in a new disciplinary community. Throughout the book, the discipline of law is used as a lens for examining broader connections between language, culture and disciplinary knowledge, and their relevance for English for Specific Purposes and writing in the disciplines.

Digital Platforms and the Global South Philippe Bouquillion, Christine Ithurbide, Tristan Mattelart, 2023-12-01 This book addresses the issues raised by digital platforms in the Global South, with an emphasis on the cultural stakes involved. It brings together an interdisciplinary team of researchers – including political economists, socio-economists, geographers, media sociologists or anthropologists – who each explore these issues through an insightful case study at a local, national, regional or international scale. While studying the strategies of some of the main US-based Big Tech platforms or video streaming platforms towards the Global South, the chapters also consider the often-neglected active role local or regional actors play in the expansion of those Western digital players, and highlight the existence of a constellation of local or regional platforms that have emerged in Africa, Asia, Latin America or the Middle East. In addition to analysing the complex relationships of competition, collaboration or dependence between these diverse actors, this volume examines the ways in which the rise of these digital platforms has generated new forms of cultural entrepreneurship and participated in the reconfiguring of the conditions in which cultural contents are produced and circulated in the Global South. This volume will appeal to readers interested in the transnationalisation of cultural industries or in the social, political, economic, cultural and geopolitical dimensions of digital transformations and will be an important resource for students, teachers and researchers in media, communication, cultural studies, international relations and area studies programmes.

China's Digital Nationalism Florian Schneider, 2018-08-16 Nationalism, in China as much as elsewhere, is today adopted, filtered, transformed, enhanced, and accelerated through digital networks. And as we have increasingly seen, nationalism in digital spheres interacts in complicated ways with nationalism on the ground. If we are to understand the social and political complexities of the twenty-first century, we need to ask: what happens to nationalism when it goes digital? In China's Digital Nationalism, Florian Schneider explores the issue by looking at digital China first hand, exploring what search engines, online encyclopedias, websites, hyperlink networks, and social media can tell us about the way that different actors construct and manage a crucial topic in contemporary Chinese politics: the protracted historical relationship with neighbouring Japan. Using two cases, the infamous Nanjing Massacre of 1937 and the ongoing disputes over islands in the East China Sea, Schneider shows how various stakeholders in China construct networks and deploy power to shape nationalism for their own ends. These dynamics provide crucial lessons on how nation states adapt to the shifting terrain of the digital age and highlight how digital nationalism is today an emergent property of complex communication networks.

The Chinese e-Merging Market Danai Krokou, 2021-04-28 Over the past decades China gained the reputation of being the world's factory, focusing solely on manufacturing exports. This is about to change. China's online population is currently the largest online population worldwide. This book is aimed at assisting Western entrepreneurs, SMEs, investors and business students to understand and ideally enter the Chinese e-merging market. E-Commerce is an easy, fast, and cost-effective way of entering the Chinese market compared to more traditional ways of entry. It offers great opportunities for high profit gains to Western companies seeking to do business in China without the hurdle of heavy upfront investment. This book is designed to work as a step-by-step guide to the online marketplace environment in China. It provides a detailed overview of the Chinese online market and proposes different strategies available to foreign companies. Tencent Min Tang, 2019-07-04 In this book, author Min Tang examines the political economy of the China-based leading global Internet giant, Tencent. Tracing the historical context and shaping forces, the book illuminates Tencent's emergence as a joint creation of the Chinese state and

transnational financial capital. Tencent reveals interweaving axes of power on different levels, particularly interactions between the global digital industry and contemporary China. The expansion strategies Tencent has employed—horizontal and vertical integration, diversification and transnationalization—speak to the intrinsic trends of capitalist reproduction and the consistent features of the political economy of communications. The book also pinpoints two emerging and entangling trends— transnationalization and financialization—as unfolding trajectories of the global political economy. Understanding Tencent’s dynamics of growth helps to clarify the complex nature of China’s contemporary transformation and the multifaceted characteristics of its increasingly globalized Internet industry. This short and highly topical research volume is perfect for students and scholars of of global media, political economy, and Chinese business, media and communication, and society.

#MeToo and Cyber Activism in China Li Ma,2021-11-16 This book focusses on the #MeToo movement in China, critically examining how three competing ideologies have worked in co-opting #MeToo activism: China’s official communism, Western neoliberalism, and an emerging Chinese cyber-feminism. In 2018, China’s #MeToo cyber activism initially maintained its momentum despite strict censorship, presenting women’s voices against gendered violence and revealing scripts of power in different sectors of society. Eventually though it lost impetus with sloganization and stigmatization under a trio forces of pressures: corporate corruption, over-politicization by Western media and continued state censorship. The book documents the social events and gendered norms in higher education, NGOs, business and religious circles that preceded and followed high-profile cases of alleged sexual abuses in mainland China, engaging with sociological scholarship relating to demoralization and power, media studies and gender studies. Through these entwined theories the author seeks to give both scholars and the general audience in gender studies a window into the ongoing tension in the power spheres of state, market and gendered hierarchy in contemporary Chinese society. This book will be of interest to students of gender studies, China studies, media studies, and cultural Studies
