How to Practice Academic Medicine and Publish from Developing Countries? Samiran Nundy, Atul Kakar, Zulfiqar A. Bhutta, 2021-10-23 This is an open access book. The book provides an overview of the state of research in developing countries – Africa, Latin America, and Asia (especially India) and why research and publications are important in these regions. It addresses budding but struggling academics in low and middle-income countries. It is written mainly by senior colleagues who have experienced and recognized the challenges with design, documentation, and publication of health research in the developing world. The book includes short chapters providing insight into planning research at the undergraduate or postgraduate level, issues related to research ethics, and conduct of clinical trials. It also serves as a guide towards establishing a research question and research methodology. It covers important concepts such as writing a paper, the submission process, dealing with rejection and revisions, and covers additional topics such as planning lectures and presentations. The book will be useful for graduates, postgraduates, teachers as well as physicians and practitioners all over the developing world who are interested in academic medicine and wish to do medical research.

Abstract City Christoph Niemann, 2012-04-01 This anthology of the illustrator's New York Times blog features a chapter of all-new material: "a masterpiece of sophisticated humor" (Library Journal, starred review). In July 2008, illustrator and designer Christoph Niemann began Abstract City, a visual blog for the New York Times. His posts were inspired by the desire to re-create simple and everyday observations and stories from his own life that everyone could relate to. In Niemann's hands, mundane experiences such as riding the subway or trying to get a good night's sleep were transformed into delightful flights of visual fancy. In Abstract City, the struggle to keep up with housework becomes a battle against adorable but crafty goblins, and nostalgia about New York manifests in simple but strikingly spot-on LEGO creations. This brilliantly illustrated collection of reflections on modern life includes all sixteen of the original blog posts as well as a new chapter created exclusively for the book.

The Abstract Wild Jack Turner, 2021-12-21 If anything is endangered in America it is our experience of wild nature—gross contact. There is knowledge only the wild can give us, knowledge specific to it, knowledge specific to the experience of it. These are its gifts to us. How wild is wilderness and how wild are our experiences in it, asks Jack Turner in the pages of *The Abstract Wild*. His answer: not very wild. National parks and even so-called wilderness areas fall far short of offering the primal, mystic connection possible in wild places. And this is so, Turner avows, because any managed land, never mind what it's called, ceases to be wild. Moreover, what little wildness we have left is fast being destroyed by the very systems designed to preserve it. Natural resource managers, conservation biologists, environmental economists, park rangers, zoo directors, and environmental activists: Turner's new book takes aim at these and all others who labor in the name of preservation. He argues for a new conservation ethic that focuses less on preserving things and more on preserving process and leaving things be. He takes off after zoos and wilderness tourism with a vengeance, and he cautions us to resist language that calls a tree a resource and wilderness a management unit. Eloquent and fast-paced, *The Abstract Wild* takes a long view to ask whether ecosystem management isn't a bit of a sham and the control of grizzlies and wolves at best a travesty. Next, the author might bring his readers up-close for a look at pelicans, mountain lions, or Shamu the whale. From whatever angle, Turner stirs into his arguments the words of dozens of other American writers including Thoreau, Hemingway, Faulkner, and environmentalist Doug Peacock. We hunger for a kind of experience deep enough to change our selves, our form of life, writes Turner. Readers who take his words to heart will find, if not their selves, their perspectives on the natural

world recast in ways that are hard to ignore and harder to forget.

Foundations of Abstract Analysis Jewgeni H. Dshalalow,2012-11-09 Foundations of Abstract Analysis is the first of a two book series offered as the second (expanded) edition to the previously published text Real Analysis. It is written for a graduate-level course on real analysis and presented in a self-contained way suitable both for classroom use and for self-study. While this book carries the rigor of advanced modern analysis texts, it elaborates the material in much greater details and therefore fills a gap between introductory level texts (with topics developed in Euclidean spaces) and advanced level texts (exclusively dealing with abstract spaces) making it accessible for a much wider interested audience. To relieve the reader of the potential overload of new words, definitions, and concepts, the book (in its unique feature) provides lists of new terms at the end of each section, in a chronological order. Difficult to understand abstract notions are preceded by informal discussions and blueprints followed by thorough details and supported by examples and figures. To further reinforce the text, hints and solutions to almost a half of more than 580 problems are provided at the end of the book, still leaving ample exercises for assignments. This volume covers topics in point-set topology and measure and integration. Prerequisites include advanced calculus, linear algebra, complex variables, and calculus based probability.

Painting Accessible Abstracts Laura Reiter,2010-03-15 *Painting Accessible Abstracts* is an inspirational but practical book that will help artists to paint in a less figurative way. Laura Reiter demonstrates different ways to approach an abstract painting from 'just a little bit abstract' to 'completely abstract'. She does this by focussing on ideas and themes as starting points, looking at the creative processes involved and more unusual techniques. Laura Reiter also covers how to use materials creatively – watercolour, acrylics, mixed media and collage – and how to experiment with colour and composition. Several projects are included, and, in addition to Laura's vibrant, colourful paintings, the work of several other contemporary abstract artists is featured.

Creating Abstract Art Dean Nimmer,2014-09-03 Celebrate your own nonconformist place in the world of art. Going far beyond standard notions of developing an abstract style or particular look, *Creating Abstract Art* unleashes the numerous possibilities that abound in your creative subconscious. Familiar obstacles such as I don't know what to paint or How do I know if this is good? are easily set aside as you explore fun exercises such as connecting dots, automatic drawing, shadow hunting, working with haiku poetry paintings and much more. So turn off the noise in your head, follow your own instincts and delight in what emerges! • 40 exercises exploring original ideas and inventive techniques for making abstract art. • Projects can be done in any order and with nearly any materials--start working right away on any project that grabs your attention! • 50 contemporary artists share diverse work and viewpoints on the process of working abstractly. Write your own artistic license and start *Creating Abstract Art* your way, today!

Discrepant Abstraction Kobena Mercer,2006-07-14 How the formal ingenuity of abstract art has been cross-fertilized by creative discrepancies—a cross-cultural voyage stretching from Hong Kong and Islamic regions to Canada, Australia, Europe, and the United States. For anyone who thinks the question of abstract art is settled, this book will come as a surprise. *Discrepant abstraction* is hybrid and partial, elusive and repetitive, obstinate and strange. It includes almost everything that does not neatly fit into the institutional narrative of abstract art as a monolithic quest for artistic purity. Exploring cross-cultural scenarios in twentieth-century art, this second volume in the *Annotating Art's Histories* series alters our understanding of abstract art as a signifier of modernity by revealing the multiple directions it has taken in wide-ranging international contexts. Impure, imperfect, and incomplete, the version of abstraction that emerges from this global journey—from Hong Kong and Islamic regions to Canada, Australia, Europe, and the United States—shows how the formal ingenuity of abstract art has been cross-fertilized, from abstract expressionism onwards, by creative discrepancies that arise when disparate visual languages are brought into dialogue. *Discrepant Abstraction* is essential reading for students, practitioners and anyone curious about cross-cultural interaction in the visual arts.
