**Usage and Potential of Language Learning Apps** Luca Diehl, 2020-03-16 Bachelor Thesis from the year 2019 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, University of Trier, language: English, abstract: The goal of this thesis is to find out how often language learning apps are already used and to analyze their potential for the upcoming years, i.e. whether they might be able to supplement or even replace traditional language classes one day. The study presented in this thesis consists of two parts: an analysis of the term language learning app, their user numbers and their teaching methods in order to be able to find their strengths and weaknesses and a survey conducted among students of the University of Trier in which they were asked about their past usage of language learning apps, as well as their attitudes and opinions towards language learning apps in general, including their opinions about the potential of language learning apps. Not long ago, mobile phones were only a means of communication and it was hard to imagine that one day they could fulfil literally hundreds of tasks. Today, thanks to mobile apps, they can be a map, a book, a video game and even a spirit level all at once. One of their most valuable new features, though, are educational apps. They allow users to learn anything from coding to chemical elements to languages and have been changing the educational landscape ever since. Language learning apps have been especially disruptive. No other type of educational apps is used as often as they are. Today, apps like Duolingo and Babbel have more than 100 million active users, with their numbers increasing by the day. They offer courses in languages from Spanish to Hawaiian and are no longer limited to vocabulary teaching only.

centred approach in which educators first explore 8 key 'ingredients' with the student: relationships; strengths and weaknesses; self-advocacy and responsibility; review and preview; motivation and incentive; synthesis and analysis; rhythm and routine; and practice and repetition. She provides a step-by-step explanation of how these 'ingredients' can then be used in different ways and in different combinations to successfully address particular areas of difficulty. The approach is clearly explained, and the book contains many useful examples, practical tips and strategies, suggested conversation starters, sample time management plans and other tools that can be adapted to meet the particular needs of individual students. **Asperger Solution** Kevin Foley, 2006 Kevin Foley BA (Hons) Econ. PGCE had been teaching for four years before Aspergers Syndrome was actually called Aspergers Syndrome (AS). A specialist in getting young people through exams, he was - like most teachers- totally oblivious to autistic spectrum disorders. Had it not been for a chance encounter with his son, Sean, he would probably have remained ignorant of autism bar 'a little knowledge' gleaned from watching Rainman and Forest Gump. Kevin Foley enjoyed a quarter of a century's teaching in a variety of 'challenging' settings in and out of the mainstream. In that time he saw some of his students graduate to Oxbridge whilst others graduated to penal institutions. On this journey he came to appreciate the efficacy of Solution Focused interventions and worked as Education Consultant with Eileen Murphy Consultants. But in terms of understanding autism, more important have been the lessons his son has taught him during the past eighteen years: Such as who lived at No 7 Coronation St. in 1977. And why somebody with autism would be jealous of Mr Berkeley from Star Trek. Having seen his son struggle with the demands of the mainstream, Kevin Foley now believes that: Too many children with AS suffer 'meltdown' as a result of being forced to operate in environments that test their immature executive, social, and emotional skills to breaking point - and beyond. We need to '

personalise' our children's education so that this doesn't happen. We need to cast a cold eye on what currently passes for 'inclusion' and be aware of the intrusion and exclusion that is the daily reality for many of our children in mainstream schools Kevin Foley has home-educated his son for the past four years.

**Sara the Famous** Lisa Jean Collins,2006-02 Visit the author's website at <http://www.tiptopwebsite.com/lisajeancollins>. About a year and a half ago, my friend's autistic daughter Sara asked me if I could write a book about her life. At around the same time, Sara's mother told me that Sara had been repeatedly saying that she wanted to be famous--that she was definitely going to be famous--but nobody was really sure what she meant by that or if she thought of famous the way most other people did. It was around this time that she began discouraging people from buying her birthday and Christmas presents; she spent the days after Halloween giving out her own candy to sick children at children's hospitals. I was inspired to write this story after seeing Sara's Christian faith in action, and after listening to Sara's mother tell of Sara's experiences in the mainstream school setting as a Christian autistic girl. These experiences were often filled with loneliness, frustration, rejection and discrimination, but they resonated with her faith and helped to strengthen it so that she could aspire to give to others what she herself so often had not received. Sara the Famous is based on a true story, as told in the voice of the author's young friend Sara, a Christian autistic girl with a deep faith in Jesus. It chronicles Sara's experience with isolation and discrimination, and it shows the flip side of what such experiences can mean when one's highest aspiration is to be a different kind of famous: A Jesus kind of famous.
