Reusable Booster System National Research Council,Division on Engineering and Physical Sciences,Aeronautics and Space Engineering Board,Committee for the Reusable Booster System: Review and Assessment,2013-01-10 On June 15, 2011, the Air Force Space Command established a new vision, mission, and set of goals to ensure continued U.S. dominance in space and cyberspace mission areas. Subsequently, and in coordination with the Air Force Research Laboratory, the Space and Missile Systems Center, and the 14th and 24th Air Forces, the Air Force Space Command identified four long-term science and technology (S&T) challenges critical to meeting these goals. One of these challenges is to provide full-spectrum launch capability at dramatically lower cost, and a reusable booster system (RBS) has been proposed as an approach to meet this challenge. The Air Force Space Command asked the Aeronautics and Space Engineering Board of the National Research Council to conduct an independent review and assessment of the RBS concept prior to considering a continuation of RBS-related activities within the Air Force Research Laboratory portfolio and before initiating a more extensive RBS development program. The committee for the Reusable Booster System: Review and Assessment was formed in response to that request and charged with reviewing and assessing the criteria and assumptions used in the current RBS plans, the cost model methodologies used to frame the RBS business case, and the technical maturity and development plans of key elements critical to RBS implementation. The committee consisted of experts not connected with current RBS activities who have significant expertise in launch vehicle design and operation, research and technology development and implementation, space system operations, and cost analysis. The committee solicited and received input on the Air Force launch requirements, the baseline RBS concept, cost models and assessment, and technology readiness. The committee also received input from industry associated with RBS concept, industry independent of the RBS concept, and propulsion system providers which is summarized in Reusable Booster System: Review and Assessment.

Creative Boot Camp 30-Day Booster Pack Stefan Mumaw,2012-12-11 You’ve completed the Creative Boot Camp training program, surviving 30 days of creativity exercises designed to present fun, engaging opportunities for creative problem solving. Through this practice, you developed skills that you use every day by solving problems with defined purpose and escalating restriction. Now that you’ve performed those 30 exercises, wouldn’t it be great if there were another set of 30 exercises you could complete that would challenge you in the same way? You’re in luck. Introducing the Creative Boot Camp Booster Packs. The Creative Boot Camp Booster Packs offer 90 new creative exercises, separated into two collections: The Medium Collection and The General Mix Collection. The Medium Collection offers the 90 exercises segregated by medium: 30 Designer, 30 Writer, and 30 Photographer. The General Mix Collection offers the same 90 exercises in three mixed packs: Brigadier, Major, and Lieutenant. Each mixed Booster Pack contains 10 designer, 10 writer, and 10 photographer exercises. This Booster Pack is the Lieutenant Mix, which means the exercises are a collection of designer, writer, and photographer exercises pulled and mixed from the Designer, Writer, and Photographer Creative Boot Camp Booster Packs, 10 exercises from each. This is a similar format to the Creative Boot Camp Training Program. Each mixed set is different and each provides a well-rounded approach to creative training, challenging you to solve problems using multiple mediums. Solve these problems with relevance and novelty and you’ll find the creative boost you are seeking by the conclusion of the pack.

Staging High Power Rockets Ray R. Dunakin III,2018-10-31 Black powder rockets can be easily staged by using a booster motor that has no delay and no ejection charge, and by placing the upper stage directly over the booster in close proximity. High Power fliers don’t have it so easy. Not only are higher-energy composite propellants harder to light, they must be lit from the very top of the motor core. In this booklet Ray Dunnakin walks us through techniques that allow air starting of these high power motors. Once free of the constraint of having to put the upper stage motor directly over the booster, many other configurations can be used. Ray discusses inline (with large separations), parallel and parasite staging, all with multiple motors.
