The New Design Rules Emily Henderson,Jessica Cumberbatch Anderson,2022-05-10 From the author of the New York Times bestseller Styled, here is Emily Henderson's masterclass on interior design. “An approachable guide for anyone who is looking for tools and resources to create a home that speaks to who they are and what they love.”—Joanna Gaines Whether you’re embarking on a weekend refresh or complete renovation, interior designer Emily Henderson wants you to take risks with your home design without experiencing regret. In this visually driven decorating bible punctuated with photographs from real homes and colorful illustrations, she takes you through her entire process, including every single decision she makes when it comes to picking paint, arranging furniture, hanging window treatments, and deciding on lighting fixtures. You'll also learn when to hire a contractor versus an architect versus a handyperson, all the materials to consider (and why you might want to skip those marble countertops), proper measurements of the elements in each room, and so much more. By the end of the book, you'll feel more confident when it comes to visualizing the home of your dreams, and you'll finally know how to make it happen.

**The Power of Moments** Chip Heath,Dan Heath,2017-10-03 The New York Times bestselling authors of Switch and Made to Stick explore why certain brief experiences can jolt us and elevate us and change us—and how we can learn to create such extraordinary moments in our life and work. While human lives are endlessly variable, our most memorable positive moments are dominated by four elements: elevation, insight, pride, and connection. If we embrace these elements, we can conjure more moments that matter. What if a teacher could design a lesson that he knew his students would remember twenty years later? What if a manager knew how to create an experience that would delight customers? What if you had a better sense of how to create memories that matter for your children? This book delves into some fascinating mysteries of experience: Why we tend to remember the best or worst moment of an experience, as well as the last moment, and forget the rest. Why “we feel most comfortable when things are certain, but we feel most alive when they’re not.” And why our most cherished memories are clustered into a brief period during our youth. Readers discover how brief experiences can change lives, such as the experiment in which two strangers meet in a room, and forty-five minutes later, they leave as best friends. (What happens in that time?) Or the tale of the world’s youngest female billionaire, who credits her resilience to something her father asked the family at the dinner table. (What was that simple question?) Many of the defining moments in our lives are the result of accident or luck—but why would we leave our most meaningful, memorable moments to chance when we can create them? The Power of Moments shows us how to be the author of richer experiences.

**Design History Beyond the Canon** Jennifer Kaufmann-Buhler,Victoria Rose Pass,Christopher Wilson,2019-02-07 Design History Beyond the Canon subverts hierarchies of taste which have dominated traditional narratives of design history. The book explores a diverse selection of objects, spaces and media, ranging from high design to mass-produced and mass-marketed objects, as well as counter-cultural and sub-cultural material. The authors' research highlights the often marginalised role of gender and racial identity in the production and consumption of design, the politics which underpins design practice and the role of designed objects as pathways of nostalgia and cultural memory. While focused primarily on North American examples from the early 20th century onwards, this collection also features essays examining European and Soviet design history, as well as the influence of Asia and Africa on Western design practice. The book is organised in three thematic sections: Consumers, Intermediaries and Designers. The first section analyses a range of designed objects and spaces through the experiences and perspectives of users. The second section considers intermediaries from both technology and cultural industries, as well as the hidden labour within the design process itself. The final section focuses on designers from multiple design disciplines including high fashion, industrial design, interior design, graphic design and design history pedagogy. The essays in all three sections utilise different research methods and a wide range of theoretical approaches, including feminist theory,

critical race theory, spatial theory, material culture studies, science and technology studies and art history. Design History Beyond the Canon brings together the most recent research which stretches beyond the traditional canon and looks to interdisciplinary methodologies to better understand the practice and consumption of design.

**100 Days of Sunlight** Abbie Emmons,2019-08-07 When 16-year-old poetry blogger Tessa Dickinson is involved in a car accident and loses her eyesight for 100 days, she feels like her whole world has been turned upside-down. Terrified that her vision might never return, Tessa feels like she has nothing left to be happy about. But when her grandparents place an ad in the local newspaper looking for a typist to help Tessa continue writing and blogging, an unlikely answer knocks at their door: Weston Ludovico, a boy her age with bright eyes, an optimistic smile...and no legs. Knowing how angry and afraid Tessa is feeling, Weston thinks he can help her. But he has one condition -- no one can tell Tessa about his disability. And because she can't see him, she treats him with contempt: screaming at him to get out of her house and never come back. But for Weston, it's the most amazing feeling: to be treated like a normal person, not just a sob story. So he comes back. Again and again and again. Tessa spurns Weston's obnoxious optimism, convinced that he has no idea what she's going through. But Weston knows exactly how she feels and reaches into her darkness to show her that there is more than one way to experience the world. As Tessa grows closer to Weston, she finds it harder and harder to imagine life without him -- and Weston can't imagine life without her. But he still hasn't told her the truth, and when Tessa's sight returns he'll have to make the hardest decision of his life: vanish from Tessa's world...or overcome his fear of being seen. 100 Days of Sunlight is a poignant and heartfelt novel by author Abbie Emmons. If you like sweet contemporary romance and strong family themes then you'll love this touching story of hope, healing, and getting back up when life knocks you down.

**Design for People** Karrie Jacobs,2016 Most design books focus on outcome rather than on process. Scott Stowell's Design for People is groundbreaking in its approach to design literature. Focusing on 12 design projects by Stowell's design firm, Open, the volume offers a sort of oral history as told by those involved with each project--designers, clients, interns, collaborators and those who interact with the finished product on a daily basis. In addition to the case studies, the book features texts from influential figures in the design world, including writer Karrie Jacobs, founding editor-in-chief of Dwell magazine; plus contributions from Pierre Bernard, revolutionary French graphic artist and designer; Charles Harrison, pioneering industrial designer; Maira Kalman, artist and writer; Wynton Marsalis, composer and musician; Emily Pilloton, design activist and author of Design Revolution; Michael Van Valkenburgh, landscape architect and professor at Harvard's Graduate School of Design; and Alissa Walker, design writer and urban advocate.

**Conditional Design** Anthony di Mari,2014-11-17 Conditional design is the sequel to Operative Design. This book will further explore the operative in a more detailed, intentional, and perhaps functional manner. Spatially, the conditional is the result of the operative. It is not a blind result however. Both terms work together to satisfy a formal manipulation through a set of opportunities for elements such as connections and apertures.
