Boundary Management Mitsuru Kodama, 2009-12-01 Business architecture is a concept for optimizing corporate boundaries aimed at realizing targeted business models and corporate system design involving stakeholders. To optimize the corporate boundaries, companies must partially and/or wholly optimize the individual management elements (strategy, organization, technology, operation, and leadership) comprising the corporate system that has achieved congruence with its environment. The type of management concerned with optimizing these corporate boundaries and the corporate systems that consist of individual management elements is referred to in this book as boundary management. The concept of boundaries congruence inside and outside the corporate system, and the formation of an optimal architecture concerned with environmental change and with management elements such as strategy, organization, technology, operation, and leadership are key to implementing dynamic strategic management. This book presents the concept of business architecture and optimizing processes as a corporate system based on multiple corporate case studies (Sony, NTT-DATA, NTT-DoCoMo, Toyota, Honda, Omron, Takara, Recruit, First Retailing, Panasonic, and Canon).

The i-mode Wireless Ecosystem Takeshi Natsuno,2005-01-14 i-mode is the packet-based service for mobile phones offered by Japan's leader in wireless technology, NTT DoCoMo. Unlike most of the key players in the wireless arena, i-mode eschews the Wireless Application Protocol (WAP) and uses a simplified version of HTML, Compact Wireless Markup Language (CWML) instead of WAP's Wireless Markup Language (WML). As a progression from his first book i-mode Strategy the author describes how i-mode has evolved. He focuses on the i-mode ecosystem (the metaphor he uses to describe such a self developing business) from concept to reality, the effect of i-mode, the evolution of Cell phones, partnerships with real businesses, such as the collaboration with Coca Cola in Japan, the struggle for dominance in the net business and the globalisation of the i-mode business arena from a Japanese only ecosystem to the global arena. The author is the most highly respected expert in this field. The i-mode Wireless Ecosystem is a must for everyone wanting to know more about NTT DoCoMo and how it has sustained its business model. Discusses the globalisation of i-mode featuring the key points such as origin, development, international expansion and the role of partners etc. Through using his own company's strategy and experience the author explains the value of creating a business 'ecosystem' and the benefits of co-operation between various mobile operators Highlights the reasons for i-mode's success in Japan and extrapolates these to future directions A valuable addition to the bookshelf of all Mobile operators, especially those directly involved with Marketing, Product Development, and 3G; Content providers working within Product Development, Business Development, Marketing, and Mobile Services; and consultants, bankers and media professionals keen to gain an insight into this dynamic field.
