Financial institutions and the Nation's economy (FINE) United States. Congress. House. Committee on Banking, Currency and Housing. Subcommittee on Financial Institutions Supervision, Regulation and Insurance,1975

What They Do With Your Money Stephen Davis,Jon Lukomnik,David Pitt-Watson,2016-05-24 Each year we pay billions in fees to those who run our financial system. The money comes from our bank accounts, our pensions, our borrowing, and often we aren't told that the money has been

taken. These billions may be justified if the finance industry does a good job, but as this book shows, it too often fails us. Financial institutions regularly place their business interests first, charging for advice that does nothing to improve performance, employing short-term buying strategies that are corrosive to building long-term value, and sometimes even concealing both their practices and their investment strategies from investors. In their previous prizewinning book, *The New Capitalists*, the authors demonstrated how ordinary people are working together to demand accountability from even the most powerful corporations. Here they explain how a tyranny of errant expertise, naive regulation, and a misreading of economics combine to impose a huge stealth tax on our savings and our economies. More important, the trio lay out an agenda for curtailing the misalignments that allow the financial industry to profit at our expense. With our financial future at stake, this is a book that analysts, economists, policy makers, and anyone with a retirement nest egg can't afford to ignore.

Financial Valuation James R. Hitchner,2006-09-30 Praise for Financial Valuation This Second Edition addresses virtually all of the recent hot topics in business valuation, and there are many of them since the first edition. Most chapters are updated with new material, including, especially, the Duff & Phelps Risk Premium Report as an alternative to Ibbotson's risk premium data. As with the first edition, the authors are very well-known and provide incisive analysis. --Shannon Pratt, CFA, FASA, MCBA, CM&AA, CEO, Shannon Pratt Valuations, LLC Though the first edition of Mr. Hitchner's book was excellent in all regards, this Second Edition squarely puts Hitchner and his team of authors at the top of the list of authorities in the field of business valuation. Few publications on the subject even come close to the book's thorough coverage of the topic, but equally impressive is the clarity with which Hitchner depicts and explains highly complex subject matters. So impressed with Financial Valuation Applications and Models, the National Association of Certified Valuation Analysts has developed a three-day course based upon this book entitled, 'Advanced Valuation and Case Study Workshop,' which is now a cornerstone training program for our organization. --Parnell Black, MBA, CPA, CVA, Chief Executive Officer, NACVA This book is a valuable resource for every BV library. It has material not covered in other BV books and this Second Edition has much more information than the first. Financial Valuation Applications and Models is the primary textbook for AICPA's business valuation education and it covers most of the topics on the test for the AICPA's Accredited in Business Valuation (ABV) credential. Its thirty authors are nationally respected practitioners who have written this book for practitioners. Many of the authors are current or former members of the AICPA Business Valuation Committee and the AICPA BV Hall of Fame. --Michael A. Crain, CPA/ABV, ASA, CFA, CFE, Chair, AICPA Business Valuation Committee, Managing Director, The Financial Valuation Group This book has a tremendous wealth of information that all valuation analysts must have in their libraries. From those just starting their careers to the most experienced practitioner, all valuation analysts will benefit from the invaluable information, ranging from fundamental practices to the most innovative economic and valuation ideas of today. --Scott R. Saltzman, CPA, CVA, ASA, DABFA, Managing Member, Saltzman LLC; President, National Association of Certified Valuation Analysts Coauthors: Mel H. Abraham, R. Financial Statecraft Benn Steil,Robert E. Litan,2008-10-01 divAs trade flows expanded and trade agreements proliferated after World War II, governments—most notably the United States—came

increasingly to use their power over imports and exports to influence the behavior of other countries. But trade is not the only way in which nations interact economically. Over the past two decades, another form of economic exchange has risen to a level of vastly greater significance and political concern: the purchase and sale of financial assets across borders. Nearly \$2 trillion worth of currency now moves cross-border every day, roughly 90 percent of which is accounted for by financial flows unrelated to trade in goods and services—a stunning inversion of the figures in 1970. The time is ripe to ask fundamental questions about what Benn Steil and Robert Litan have coined as “financial statecraft,” or those aspects of economic statecraft directed at influencing international capital flows. How precisely has the American government practiced financial statecraft? How effective have these efforts been? And how can they be made more effective? The authors provide penetrating and incisive answers in this timely and stimulating book. /DIV

The sixth edition of this bestselling book is designed to help anyone who works with financial reports--but has neither the time nor the need for an in-depth knowledge of accounting--cut through the maze of accounting information to find out what those numbers really mean.
