**Boats of South Asia** Sean Mcgrail,Lucy Blue,Eric Kentley,Colin Palmer,2004-01-14 This book sets new standards for the documentation of water transport, and introduces styles of boat-building which are unlikely to be found outside the sub-Continent. A fascinating and accessible read for anyone interested in boats or the South Asian way of life, as well as ethnographers, maritime archaeologists and historians, *Boats of South Asia* covers recent,

exhaustive fieldwork in India, Bangladesh and Sri Lanka; and covers a vast array of traditional boats used in the sub-Continent today for fishing and other coastal, riverine tasks.

**Humans in the Siberian Landscapes** Vladimir N. Bocharnikov, Alina N. Steblyanskaya, 2022-09-25 This book considers theoretical issues of the ethnocultural landscape concepts at large as well as examples of its practical application in ethnic communities of Siberia. It reveals the patterns of the processes of penetration, settlement, development and adaptation of Siberian populations from Paleolithic time to Russian colonization in the era of the Russian Empire, during Soviet modernization and in the face of modern challenges. The authors consider the principal interactions (character, stages, conditions), system-related evidence and phenomena that determine the diverse specifics and multidirectional vectors of a change in the ethnic (social, cultural, economic, legal) presence in large subregions of Siberia in the mirror of various theoretical paradigms. This transdisciplinary volume appeals to researchers, lecturers and students in the fields of geography, history, philosophy, anthropology, ecology, archaeology and interfaces to many other disciplines.

From Polaris to Trident Graham Spinardi, 1994-01-06 This book provides a

complete history of the US Fleet Ballistic Missile programme from its inception in the 1950s and the development of Polaris to the deployment of Trident II in 1990. Writing in an accessible yet scholarly manner, Graham Spinardi bases his historical documentation of FBM development on interviews with many of the key participants. His study confronts a central issue: is technology simply a tool used to achieve the goals of society, or is it an autonomous force in shaping that society? FBM accuracy evolved from the city-busting retaliatory capability of Polaris to the silo-busting 'first strike' potential of Trident. Is this a case of technology 'driving' the arms race, or simply the intended product of political decisions? The book provides a comprehensive survey of the literature looking at the role of technology in the arms race, and seeks to explain technological development using a 'sociology of technology' approach.

**Sustainable Happiness** Joe Loizzo,2012-09-10 Today's greatest health challenges, the so-called diseases of civilization—depression, trauma, obesity, cancer—are now known in large part to reflect our inability to tame stress reflexes gone wild and to empower instead the peaceful, healing and

sociable part of our nature that adapts us to civilized life. The same can be said of the economic challenges posed by the stress-reactive cycles of boom and bust, driven by addictive greed and compulsive panic. As current research opens up new horizons of stress-cessation, empathic intelligence, peak performance, and shared happiness, it has also encountered Asian methods of self-healing and interdependence more effective and teachable than any known in the West. Sustainable Happiness is the first book to make Asia's most rigorous and complete system of contemplative living, hidden for centuries in Tibet, accessible to help us all on our shared journey towards sustainable well-being, altruism, inspiration and happiness.

**To Reach the High Frontier** Roger D. Launius,Dennis R. Jenkins,2014-07-11  
Access -- no single word better describes the primary concern of the exploration and development of space. Every participant in space activities - civil, military, scientific, or commercial -- needs affordable, reliable, frequent, and flexible access to space. To Reach the High Frontier details the histories of the various space access vehicles developed in the United States since the birth of the space age in 1957. Each case study has been written by a specialist knowledgeable about the vehicle described and places each system in the larger context of the history of spaceflight. The technical challenge of reaching space with chemical rockets, the high costs associated with space launch, the long lead times necessary for scheduling

flights, and the poor reliability of the rockets themselves show launch vehicles to be the space program's most difficult challenge.
