*Making Music with Iscore: Support Materials for Teachers* Julia Brook, 2013-03-17 iSCORE is a web-based tool to help students make music. Its design is based on over a decade of research on how students learn to become independent musicians. This electronic portfolio has been created to promote independence, and to engage students fully in their music learning while interacting with their teachers, parents, and peers. Students can use iSCORE to learn repertoire through notation or by ear. There are features to enable students to link to sequencing and notation software, record themselves, and paste links of their favourite performances into their portfolios. Students can share their work with other students and with their teacher through iSCORE, and similarly, iSCORE can help teachers provide ongoing support to students by viewing students' work or disseminating materials for students. This book introduces users to the features of iSCORE and the underlying learning cycle (planning, doing, and reflecting). This guide also contains lesson plans and exemplars that teachers can use in the teaching and learning process.

A Fast Track to Structured Finance Modeling, Monitoring, and Valuation William Preinitz, 2009-02-17 This book is designed to start with simple examples that progressively develop the reader's confidence to take on more complex tasks. There is very little theoretical discussion about computer science, operations research algorithms, mathematics, or finance. The thrust of the book is to teach the reader to break complex

tasks down into simple tasks. It then looks to implement those simple tasks into VBA code using a critical subset of the features of the language. The tentative contents is: (1) Why? What? Who? Where? and How? (2) Common Sense (3) Securitizing A Loan Portfolio (4) Understanding the Excel Waterfall (5) Designing the VBA Model (6) Laying the Model Groundwork (7) Recorded Macros: A First Look at the VBA Language (8) Writing Menus: An Introduction to Data, Ranges, Arrays, and Objects (9) Controlling the Flow of the Model (10) Building Messaging Capabilities (11) Designing the Model's Reports (12) Main Program and Menus (13) Writing the Collateral Selection Code (14) Calculating the Cash Flows (15) Running the Waterfall: Producing Initial Results (16) Debugging the Model (17) Validating the Model (18) Running the Model (19) Building Additional Capabilities (20) Documentation of the Model (21) Managing the Growth of the Model (22) Building Portfolio Monitoring Model (23) Valuation Techniques: How do we Determine Price? (24) Challenging Times For the Deal (25) Parting Admonitions

**From Reform to Growth** Vít Novotný, 2013 The global economic crisis that began in 2007 has posed huge challenges for European citizens and governments. The crisis has shown that the financial sector has not been adequately regulated and supervised, that governments and individuals have overspent, and that European economies are suffering from structural problems. This book, a collaboration between the Centre for European Studies and its member foundations, assesses government responses to the crisis at the national, EU and regional levels, and also offers policy recommendations. Governments should work with one another and with EU institutions to improve bank supervision and regulatory mechanisms. They should undertake fiscal consolidation measures, bearing in mind that government deficits and debt incur costs that burden future generations. Finally, they should undertake structural reforms such as creating flexible labour markets, increasing the retirement age and shaping efficient public institutions.
