*Info We Trust* RJ Andrews, 2019-01-03 How do we create new ways of looking at the world? Join award-winning data storyteller RJ Andrews as he pushes beyond the usual how-to, and takes you on an adventure into the rich art of informing. Creating Info We Trust is a craft that puts the world into forms that are strong and true. It begins with maps, diagrams, and charts – but must push further than dry defaults to be truly effective. How do we attract attention? How can we offer audiences valuable experiences worth their time? How can we help people access complexity? Dark and mysterious, but full of potential, data is the raw material from which new understanding can emerge. Become a hero of the information age as you learn how to dip into the chaos of data and emerge with new understanding that can entertain, improve, and inspire. Whether you call the craft data storytelling, data visualization, data journalism, dashboard design, or infographic creation – what matters is that you are courageously confronting the chaos of it all in order to improve how people see the world. Info We Trust is written for everyone who straddles the domains of data and people: data visualization professionals, analysts, and all who are enthusiastic for seeing the world in new ways. This book draws from the entirety of human experience, quantitative and poetic. It teaches advanced techniques, such as visual metaphor and data transformations, in order to create more human presentations of data. It also shows how we can learn from print advertising, engineering, museum curation, and mythology archetypes. This human-centered approach works with machines to design information for people. Advance your understanding beyond by learning from a broad tradition of putting things “in formation” to create new and wonderful ways of opening our eyes to the world. Info We Trust takes a thoroughly original point of attack on the art of informing. It builds on decades of best practices and adds the creative enthusiasm of a world-class data storyteller. Info We Trust is lavishly illustrated with hundreds of original compositions designed to illuminate the craft, delight the reader, and inspire a generation of data storytellers.

*The Ascent of Information* Caleb Scharf, 2022-06-14 “Full of fascinating insights drawn from an impressive range of disciplines, *The Ascent of Information* casts the familiar and the foreign in a dramatic new light.” –Brian Greene, author of *The Elegant Universe* Your information has a life of its own, and it’s using you to get what it wants. One of the most peculiar and possibly unique features of humans is the vast amount of information we carry outside our biological selves. But in our rush to build the infrastructure for the 20 quintillion bits we create every day, we’ve failed to ask exactly why we’re expending ever-increasing amounts of energy, resources, and human effort to maintain all this data. Drawing on deep ideas and frontier thinking in evolutionary biology, computer science, information theory, and astrobiology, Caleb Scharf argues that information is, in a very real sense, alive. All the data we create—all of our emails, tweets, selfies, A.I.-generated text and funny cat videos—amounts to an aggregate lifeform. It has goals and needs. It can control our behavior and influence our well-being. And it’s an organism that has evolved right alongside us. This symbiotic relationship with information offers a startling new lens for looking at the world. Data isn’t just something we produce; it’s the reason we exist. This powerful idea has the potential to upend the way we think about our technology, our role as humans, and the fundamental nature of life. *The Ascent of Information* offers a humbling vision of a universe built of and for information. Scharf explores how our relationship with data will affect our ongoing evolution as a species. Understanding this relationship will be crucial to preventing our data from becoming more of a burden than an asset, and to preserving the possibility of a human future.

**The Information** James Gleick, 2011-03-01 From the bestselling author of the acclaimed *Chaos* and *Genius* comes a thoughtful and provocative exploration of the big ideas of the modern era: Information, communication, and information theory. Acclaimed science writer James Gleick presents an eye-opening vision of how our relationship to information has transformed the very nature of human consciousness. A fascinating intellectual journey through the history of communication and information, from the language of Africa’s talking drums to the invention of written alphabets; from the electronic transmission of code to the origins of information theory, into the new information age and the current deluge of news, tweets, images, and blogs. Along the way, Gleick profiles key innovators, including Charles Babbage, Ada Lovelace, Samuel Morse, and Claude Shannon, and reveals how our understanding of information is transforming not only how we look at the world, but how we live. *The Electric Information Age Book* Jeffrey Schnapp, Adam Michaels, 2012-01-25 The Electric Information Age Book explores the nine-year window of mass-market publishing in the sixties and seventies when formerly backstage players—designers, graphic artists, editors—stepped into the spotlight to produce a series of exceptional books. Aimed squarely at the young media-savvy consumers of the Electronic Information Age, these small, inexpensive paperbacks aimed to bring the ideas of contemporary thinkers like Marshall McLuhan, R. Buckminster Fuller, Herman Kahn, and Carl Sagan to the masses. Graphic designers such as Quentin Fiore (*The Medium Is the Massage*, 1967) employed a variety of radical techniques—verbal visual collages and other typographic pyrotechnics—that were as important to the content as the text. The Electric Information Age Book is the first book-length history of this brief yet highly influential publishing phenomenon.

**The Book of Really Useful Information** Ian Whitelaw, Stephen Calladine-Evans, 2018-08-28 The Book of Really Useful Information provides a broad and fascinating education in 20 easy lessons, from great works of art to political leaders, literature that shaped society to basic science, and everything in between. This is an ideal book for anyone who spent their school days gazing out of the window and now realizes how much they missed out on. It provides a full and fascinating education that covers all key subjects. For clarity and ease of use, the book is divided into five days, Monday to Friday, and then subdivided into four single-subject lessons. Each lesson is based around the five w’s—who, what, when, where, and why—and poses questions such as: Who was Eric Arthur Blair? What happened to the Romans? When was the Big Bang? Where do laws come from? Why is evolution controversial? You can choose to dip into a lesson at random, read through a whole day, or start from the beginning and keep going to the end. Accessible writing and useful fact boxes will help you pick up the key points quickly, and summary boxes

provide a concise review of each subject. And for that authentic school experience, each day in The Book of Really Useful Information ends with a test—except this time you get to mark it yourself. If you're feeling brave, you could even get your kids to take the tests, too, to see which of you knows the most. So sharpen your pencils and get ready to quickly learn everything you need to know in the 20 lessons of The Book of Really Useful Information.

**Media and Information Literacy in Higher Education** Dianne Oberg, Siri Ingvaldsen, 2016-11-18 Media and Information Literacy in Higher Education: Educating the Educators is written for librarians and educators working in universities and university colleges, providing them with the information they need to teach media and information literacy to students at levels ranging from bachelor to doctoral studies. In order to do so, they need to be familiar with students' strengths and weaknesses regarding MIL. This book investigates what university and college students need to know about searching for, and evaluating, information, and how teaching and learning can be planned and carried out to improve MIL skills. The discussions focus on the use of process-based inquiry approaches for developing media and information literacy competence, involving students in active learning and open-ended investigations and emphasizing their personal learning process. It embraces face-to-face teaching, and newer forms of online education. Examines the intersecting roles of academic librarians, teacher educators, and library educators in preparing library students and teacher education students to use the library Brings new perspectives from both teacher educator and library educator, and draws connections between higher and secondary education (K12) Draws on a number of competences, skills, knowledge, experiences, and reflections from a variety of perspectives, and focuses on libraries as efficient tools in all kinds of education and learning activities Written by an international group of authors with firsthand experience of teaching MIL Looks at how libraries can contribute to the promotion of civic literacy within higher education institutions and in society more widely

*Transforming Technologies to Manage Our Information* William Jones, 2013-10-01 With its theme, Our Information, Always and Forever, Part I of this book covers the basics of personal information management (PIM) including six essential activities of PIM and six (different) ways in which information can be personal to us. Part I then goes on to explore key issues that arise in the great migration of our information onto the Web and into a myriad of mobile devices. Part 2 provides a more focused look at technologies for managing information that promise to profoundly alter our practices of PIM and, through these practices, the way we lead our lives. Part 2 is in five chapters: - Chapter 5. Technologies of Input and Output. Technologies in support of gesture, touch, voice, and even eye movements combine to support a more natural user interface (NUI). Technologies of output include glasses and watch watches. Output will also increasingly be animated with options to zoom. - Chapter 6. Technologies to Save Our Information. We can opt for life logs to record our experiences with increasing fidelity. What will we use these logs for? And what isn't recorded that should be? - Chapter 7. Technologies to Search Our Information. The potential for personalized search is enormous and mostly yet to be realized. Persistent searches, situated in our information landscape, will allow us to maintain a diversity of projects and areas of interest without a need to continually switch from one to another to handle incoming information. - Chapter 8. Technologies to Structure Our Information. Structure is key if we are to keep, find, and make effective use of our information. But how best to structure? And how best to share structured information between the applications we use, with other people, and also with ourselves over time? What lessons can we draw from the failures and successes in web-based efforts to share structure? - Chapter 9. PIM Transformed and Transforming: Stories from the Past, Present and Future. Part 2 concludes with a comparison between Licklider's world of information in 1957 and our own world of information today. And then we consider what the world of information is likely to look like in 2057. Licklider estimated that he spent 85% of his thinking time in activities that were clerical and mechanical and might (someday) be delegated to the computer. What percentage of our own time is spent with the clerical and mechanical? What about in 2057?

*Enterprise Content Management, Records Management and Information Culture Amidst E-Government Development* Proscovia Svärd, 2017-04-13 This book identifies key factors necessary for a well-functioning information infrastructure and explores how information culture impacts the management of public information, stressing the need for a proactive and holistic information management approach amidst e-Government development. In an effort to deal with an organization's scattered information resources, Enterprise Content Management, Records Management and Information Culture Amidst E-Government Development investigates the key differences between Enterprise Content Management (ECM) and Records Management (RM), the impact of e-Government development on information management and the role of information in enhancing accountability and transparency of government institutions. The book hence identifies factors that contribute to a well-functioning information infrastructure and further explores how information culture impacts the management of public information. It highlights the Records Continuum Model (RCM) thinking as a more progressive way of managing digital information in an era of pluralization of government information. It also emphasizes the need for information/records management skills amidst e-Government development. Ideas about records, information, and content management have fundamentally changed and developed because of increasing digitalization. Though not fully harmonized, these new ideas commonly stress and underpin the need for a proactive and holistic information management approach. The proactive approach entails planning for the management of the entire information continuum before the information is created. For private enterprises and government institutions endeavoring to meet new information demands from customers, citizens and the society at large, such an approach is a prerequisite for accomplishing their missions. It could be argued that information is and has always been essential to all human activities and we are witnessing a transformation of the information landscape. Presents research with broad application based on archives and information science, but relevant for information systems, records management, information culture, and e-government Examines the differences between Enterprise Content Management and Records Management Bridges a gap between the proponents of Enterprise Content Management and information professionals, such as records managers and archivists
