Investing in Life Sharon Ann Murphy,2010-10-01 A study of the early years of the life insurance industry in 19th century America. Investing in Life considers the creation and expansion of the American life insurance industry from its early origins in the 1810s through the 1860s and examines how its growth paralleled and influenced the emergence of the middle class. Using the economic instability of the period as her backdrop, Sharon Ann Murphy also analyzes changing roles for women; the attempts to adapt slavery to an urban, industrialized setting; the rise of statistical thinking; and efforts to regulate the business environment. Her research directly challenges the conclusions of previous scholars who have dismissed the importance of the earliest industry innovators while exaggerating clerical opposition to life insurance. Murphy examines insurance as both a business and a social phenomenon. She looks at how insurance companies positioned themselves within the marketplace, calculated risks associated with disease, intemperance, occupational hazard, and war, and battled fraud, murder, and suicide. She also discusses the role of consumers?their reasons for purchasing life insurance, their perceptions of the industry, and how their desires and demands shaped the ultimate product. Winner, Hagley Prize in Business History, Hagley Museum and Library and the Business History Conference Praise for Investing in Life “A well-written, well-argued book that makes a number of important contributions to the history of business and capitalism

in antebellum America.” —Sean H. Vanatta, Common Place “An intriguing, instructive history of the establishment and development of the life insurance industry that reveals a good deal about changing social and commercial conditions in antebellum America . . . Highly recommended.” —Choice

Theory and Practice of Insurance J. Francois Outreville,1998 Insurance is a concept, a technique, and an economic institution. It also has an important role in the economic, social, and political life of all countries. This text aims to describe the significance of insurance institutions, the reasons they exist and how they function.

The Economics and Politics of Choice No-Fault Insurance Edward L. Jr. Lascher,Michael R.

Powers,2012-12-06 In recent years, choice no-fault has emerged as a popular but controversial proposal for addressing the problem of high automobile insurance rates. Choice plans offer consumers the option of a lower-cost insurance policy with restrictions on filing lawsuits or a higher-cost policy with full tort rights.

Some American states have implemented choice programs, and major federal choice legislation is now pending in the United States Congress. Choice no-fault has caught the attention of policy makers, the insurance industry, and academics. Until now, however, no single book has pulled together the available research on the topic. The Economics and Politics of Choice No-Fault Insurance fills that gap. Edited by scholars from different disciplines, each of whom has written extensively on automobile insurance issues, the book includes some of the best work in the area. Former Massachusetts Governor and presidential candidate Michael S. Dukakis wrote the foreword. Contributors include University of Virginia Law Professor Jeffrey O'Connell, widely considered the 'father of no-fault,' as well as authors of the influential RAND study of the potential effects of choice no-fault on insurance rates. The book chapters, most of which were written especially for this volume, cover topics ranging from the impact of choice no-fault on accidents and driving behavior, to the effects of choice on medical care usage, to alternative approaches for resolving accidents involving both 'no-fault' and 'tort' electors, to the political feasibility of choice legislative proposals. Emphasis on the potential advantages of choice no-fault is balanced by consideration of possible ill effects.
