Colonel Sanders and the American Dream Josh Ozersky, 2012-04-04 The James Beard Award-winning food writer serves up "a quirky and rewarding exploration of a 'very real time, place, product, and person'" (TriQuarterly). Among the most recognizable corporate icons, only one was ever a real person: Colonel Sanders of Kentucky Fried Chicken/KFC. From a 1930s roadside café in Corbin, Kentucky, Harland Sanders launched a fried chicken business that now circles the globe, serving "finger lickin' good" chicken to more than twelve million people every day. But to get there, he had to give up control of his company and even his own image, becoming a mere symbol to people today who don't know that Colonel Sanders was a very real human being. This book tells his story of a dirt-poor striver with unlimited ambition who personified the American Dream. Acclaimed cultural historian Josh Ozersky defines the American Dream as being able to transcend your roots and create yourself as you see fit. Harland Sanders did exactly that. At the age of sixty-five—after failed jobs and misfortune—he packed his car with a pressure cooker and his secret blend of eleven herbs and spices and began peddling the recipe for "Colonel Sanders' Kentucky Fried Chicken" to small-town diners. Ozersky traces the rise of Kentucky Fried Chicken from this unlikely beginning, telling the dramatic story of Sanders' self-transformation into "The Colonel," his truculent relationship with KFC management as their often-disregarded goodwill ambassador, and his equally turbulent afterlife as the world's most recognizable commercial icon. "Nobody finishing this book will look at their local KFC in the same way again." —The National

Kfc Recipes Ann Sullivan, 2017-06-28 I have looked everywhere I can possibly imagine for a cookbook that delivers authentic chicken recipes from fast food chains like Kentucky Fried Chicken, Popeye's and Bojangles. Do you have anything like that, or could you tell me where I might find something similar? It just so happens that I have something in that ballpark. We raise chickens here on the homestead so I am always looking for the best recipes available. We don't go to the big city much, so getting chicken from any of the fast food chains you mentioned is rather rare. On the few occasions that we've tried it, everybody has really enjoyed it, which is why I try to replicate it here at home. There are several chicken recipes in this book, many from KFC and several from Popeyes; however, I don't think anything from Bojangles made the list. We don't have that chain up here where we live, so I'll have to do some digging and try to find some from there for the next edition. In the meantime, try as many of these as you like and let me know which ones you like the best. Bon Appetit, Ann Sullivan

The Internationalization of KFC Nadine Ghanawi, 2012-12-31 Seminar paper from the year 2012 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1,3, University of València (Faculty of Economics), language: English, abstract: After the fast-food industry was thriving in Asia and especially in China in recent years, Latin America is considered the future growth market for American restaurant franchises (cf. Bloomberg 2012). In China, KFC already encountered a stunning demand, dominating the market by far before McDonalds (cf. Mellor 2011). However, in 2012 KFC was represented by only 577 restaurants in 36 countries of the Caribbean and Latin American area (cf. CARIBLA 2012). As a consequence one can see that there is still a lot of internationalization potential for the Company in the future. In order to be able to discuss KFC's operations in the global market place, this paper will first give an overview of common strategic marketing concepts and management theories, before critically analyzing KFC's international strategic approach to the global market place. Moreover, it will take a look at how -and if- KFC is able to manage the tension between globalization and localization, giving recommendations for the future development of the firm. In doing so, a critical evaluation of the Company's pursued internationalization strategy in the past as well as the illustration of possible market entry strategies for KFC is required.

YUM! Business Case Study Nihat Canak,2006-11-28 Research Paper (undergraduate) from the year 2006 in the subject Business economics - Marketing, Corporate Communication, CRM, Market Research, Social Media, grade: 1.0, Western Carolina University, course: Marketing Management & Mature Consumers, 8 entries in the bibliography, language: English, abstract: The American fast food preparation and presentation model created a strong cultural and collective identity. The model has provided the consumers with uniformity and repeated experience. This phenomenon is called the 'McDonaldisation' of the US society that has embraced the all American meal throughout the globe. People want quick and convenient meals; they do not want to spend a lot of time preparing meals, traveling to pick up meals, or waiting for meals in restaurants. As a result, consumers rely on fast food. Knowing this, fast food providers are coming up with new ways to market their products that save time for consumers. For example, McDonald's locates its outlets inside Wal-Mart stores across the United States, and also in Chevron and Amoco service stations. These arrangements are becoming more common in the fast food industry. Consumers can combine meal-time with time engaged in other activities, such as shopping, work, or travel. This idea shapes the growth strategies of most firms in the industry. The most significant driving force is the inexorable movement towards bigness and concentration of power in the hands of fewer and fewer firms at almost every point in the fast food sector. Other driving forces can be seen in the changing structure of American families as more women entered the work force, increasing globalization of the food system, the environmental movement and equity concerns. On the other hand, women are the driving force behind the fast food industry into another direction. Women's attitude towards health and food content has put pressure on the fast food industry to alter their product mix. However, the great success of the traditional fast food outlet is potentially beginning to lose its pull factor. It is believed that the actual fast food sector is in transition from a traditional selling of burgers to the pre-eminent arrival of a fast casual food industry. The driving force for change has been a number of issues that raise questions to scrutinise the fast food companies, such as the link of regular fast food ingestion to obesity, chains showing operating loss for the first time in their history and the forced closure of outlets. This is reflected on McDonald's facing a lawsuit from an overweight teenager who felt it was the company to blame for her condition. The food giant has also closed down outlets worldwide.

Employee Motivation. A Case Study from the Fast Food Chain KFC in Central London Salamun Adnan,2019-06-18 Master's Thesis from the year 2012 in the subject Business economics - Personnel and Organisation, grade: 60%, Cardiff Metropolitan University, language: English, abstract: The main aim of this dissertation project is to critically examine the chosen organization KFC and to study the effect of its leadership on the motivation of its employees. The research question is How can management develop their leadership style to motivate staff members to achieving their organizational roles? Attracting and retaining employees in the current business world has become a big challenge for the organizations. Due to increase in competitors and new entrants, it has become a tough task for the organizations. Globalization has also added a new dimension to the challenge. The workforce is now comprised of people from different countries and different cultures. As a result, keeping them motivated to give a high performance is a big task for the managers. There have been many research and theories of leadership and motivation. However, these are not still fully understood and the relationship between leadership and motivation still needs in depth research. Leaders need to find ways to motivate their subordinates by catering their individual needs and move away from the traditional methods. For the purpose of explaining the causal relationship between leadership and motivation, the researcher pursued an action research strategy and followed an inductive approach as the researcher had to work closely with the organization. Both quantitative and qualitative data was collected using an employee survey questionnaire and a focus group interview of the managers. The data analysis gave information about leadership and motivation of KFC. The managers stressed on having clear communication, independence and decision making for them. The staff stressed on communication, recognition, rewards, improved work condition and self satisfaction. The results revealed that KFC should look to employ some new strategies to increase the motivation of its staff. The researcher has made some recommendations at the end of the report. However, as this research was conducted in a small location, it may require further in depth research to come to an exclusive conclusion.

Brand Equity as an End Result of Customer Satisfaction and Loyalty, Considering High Tides of Sales Promotion and Upselling

Ragesh Ragavan Pillai, 2014-10-09 Master's Thesis from the year 2013 in the subject Business economics - Miscellaneous, University Of Wales Institute, Cardiff, course: MBA, language: English, abstract: Brands and brand equity are two of the most powerful concepts in current marketing thinking. The reason 'why' it is of importance can be plainly seen by the enduring value it has for the consumers. Even if the tangible wealth of the company is no more brands endure and in the case of powerful brands is worth more than the tangibles. This power and indestructible quality of brands is because, it exists inside the mind of the customer and not outside. Its value is determined by the force it has in the mind of the customers in making a positive response to buy the product. While critically evaluating the outcomes of various research and analysis, here it's clearly shows, the Kentucky Fried Chicken has obtained perdurable Brand value, Brand Image as a result of brand Awareness and has a higher range of brand equity to maintain the brand among its competitors enabling increased consumer satisfaction and loyalty or the repurchasing choice among fast food consumers. This evidence was supported by a research on the consumers of fast food selected from different parts of the society especially the neighbours, friends at the halls of residence and the general customers in high streets who were given questionnaires asking about their preferences while dining out and their preference to the brand KFC. It was found that, while choosing the chicken diet, customers preferred KFC as their first option than any other fast food restaurants. In addition, it was seen that KFC's brand image is improving day by day due to increased awareness programmes and promotions. The key factor is advertisement of KFC as customers say that it is the brand logo and colonels image that comes first in their mind when they hear about KFC. A presentation was done based on a KFC franchisee chain in west England to do more research on the e
