Does Class Matter? Tan Ern Ser, 2004-05-06 ' This book provides a comprehensive portrait of class structure, dynamics, and orientations in Singapore — understood as a new nation, a capitalist and emerging knowledge economy, a largely middle-class society, and a polity with a strong state — at the turn of the new millennium. It introduces a wide array of recent data on a broad range of topics relating to social stratification in Singapore: class structure, political participation, political alienation, national pride, welfarism, success values, unionism, social mobility, the digital divide, and the sandwich generation. To capture the lived experiences of people from different social classes, thereby complementing the numerous tables presented, the book also profiles six case studies of individuals or families, highlighting the challenges they face and the options they possess. Contents: Singapore: Market Economy and Meritocratic, Middle-Class Society? Methodology: Questionnaire, Sampling, and Fieldwork Singapore Class Structure Social Orientations by Class, Age, and Ethnicity Work Career and Social Mobility Problem Areas: Digital Divide and Sandwich Generation 1-to-2 Roomers, 3-Roomers, and Citizen Population Compared Conclusion: Does Class Matter in Singapore? Readership: Undergraduates, graduate students, researchers and professionals in sociology, social issues and political science. Keywords: Singapore; Social Class; Social Stratification; Social Mobility; Class Structure; Class Orientations; Digital Divide; Sandwich Generation; Political Orientations; Success Values; Welfarism Reviews: "... Tan's report should ... interest those fishing for an inside and contemporary sociological scoop on the country. (His) findings also constitute important society-level input to globalization watchers ... The most interesting aspect of the book ... is the six case studies provided in Appendix I." Asia Times Online "This volume is highly readable and is certainly filled with interesting viewpoints about the 'class society' that Singaporeans may be surprised to learn that they should consider seriously. In the book, a quick introduction is provided on the conceptualization of class and its relevance to societies like Singapore's ... the author poses the intriguing question of the challenges faced by the nation-building project that is superimposed upon a capitalist economy." Asian Journal of Social Science '

The Music Seller Reference Book, 1933

Singapore's Multiculturalism Chan Heng Chee, Sharon Siddique, 2019-03-15 Since independence in 1965, Singapore has developed its own unique approach to managing the diversity of Race, Religion, Culture, Language, Nationality, and Age among its citizens. This approach is a consequence of many factors, including its very distinct ethnic makeup compared with its neighbours, its ambitions as a globally oriented city-state, and its small physical size. Each of these factors and many others have presented Singapore society with a range of challenges and opportunities, and will in all likelihood continue to do so for the foreseeable future. In the writing of this book, the author team set themselves the task of projecting the

impact of current domestic and international social trends into the future, to anticipate what Singapore society might look like by around 2040. In doing so, they analyse the particular path that Singapore has taken since independence, in comparison with other multicultural societies and with regard to the balance between the necessity of forging a new national identity after British rule and departure from Malaysia, and the need to ensure that Singapore's ethnic minority populations remain socially enfranchised. They further consider how current trends may develop over the next couple of decades, what new challenges this may present to Singapore society, and what might be the likely responses to such challenges. In this book, Singapore is a case study of a global city facing the challenges of developed-world modernity in frequently acute ways.

Chronicle of Singapore, 1959-2009 Peter H. L. Lim, 2009 This lavishly illustrated volume captures the entire dramatic sweep of Singapore's modern history – from its declaration of independence in 1959 to today. Organised in chronological order, with each year's coverage starting with a succinct summary of its key events, Chronicle of Singapore covers not only the nation's defining political and economic events, but also the more human side of Singapore – sports, fashion, music, the arts, architecture, and culture – giving readers the broadest possible coverage. Anyone who has visited or lived in this most unique of modern city nations will be enthralled by this pictorial and narrative history.

Stamp Collecting, 1962

Multidisciplinary Computational Anatomy Makoto Hashizume, 2021-11-30 This volume thoroughly describes the fundamentals of a new multidisciplinary field of study that aims to deepen our understanding of the human body by combining medical image processing, mathematical analysis, and artificial intelligence. Multidisciplinary Computational Anatomy (MCA) offers an advanced diagnosis and therapeutic navigation system to help detect or predict human health problems from the micro-level to macro-level using a four-dimensional, dynamic approach to human anatomy: space, time, function, and pathology. Applying this dynamic and “living” approach in the clinical setting will promote better planning for – and more accurate, effective, and safe implementation of – medical management. Multidisciplinary Computational Anatomy will appeal not only to clinicians but also to a wide readership in various scientific fields such as basic science, engineering, image processing, and biomedical engineering. All chapters were written by respected specialists and feature abundant color illustrations. Moreover, the findings presented here share new insights into unresolved issues in the diagnosis and treatment of disease, and into the healthy human body.

Data-driven Analytics for Sustainable Buildings and Cities Xingxing Zhang, 2021-09-11 This book explores the interdisciplinary and transdisciplinary fields of energy systems, occupant behavior, thermal comfort, air quality and economic modelling across levels of building, communities and cities, through various data analytical approaches. It highlights the complex interplay of heating/cooling, ventilation and power systems in different processes, such as design, renovation and operation, for buildings, communities and cities. Methods from classical statistics, machine learning and artificial intelligence are applied into analyses for different building/urban components and systems. Knowledge from this book assists to accelerate sustainability of the society, which would contribute to a prospective improvement through data analysis in the liveability of both built and urban environment. This book targets a broad readership with specific experience and knowledge in data analysis, energy system, built environment and urban planning. As such, it appeals to researchers, graduate students, data scientists, engineers, consultants, urban scientists, investors and policymakers, with interests in energy flexibility, building/city resilience and climate neutrality.

The Far East Revisited A. Gorton Angier, 1908

advances in imaging technology that have enabled the visualization of phenomena in ways formerly believed to be completelyimpossible. These technologies have made major contributions to the elucidation of the pathology of diseases as well as to their diagnosis and therapy. The volume presents various studies from molecular imaging to clinical imaging. It also focuses on innovative, creative, advanced research that gives full play to imaging technology inthe broad sense, while exploring cross-disciplinary areas in which individual research fields interact and pursuing the development of new techniques where they fuse together. The book is separated into three parts, the first of which addresses the topic of visualizing and controlling molecules for life. Th e second part is devoted to imaging of disease mechanisms, while the final part comprises studies on the application of imaging technologies to diagnosis and therapy. Th e book contains the proceedings of the 12th Uehara International Symposium 2017, “Make Life Visible” sponsored by the Uehara Memorial Foundation and held from June 12 to 14, 2017. It is written by leading scientists in the field and is an open access publication under a CC BY 4.0 license.
