Skyscape Michael Cadnum,2015-10-13 Red Patterson is a TV psychiatrist, a video force, and a famous healer. His newest patient, Curtis Newns, is an artist with a damaged soul. Red is so intrigued by Curtis that he seeks to separate the artist and his wife and claim Curtis's creative talent as his own. He decides to hold troubled, talented Curtis in his desert estate, where the macabre secrets of Red's life are waiting to be unearthed. Set in the San Francisco Bay Area and the California desert, this is a story of love pitted against corruption—the essential battle of our time.

Meditation a Skyscape T. D. Kumar,2021-06-01 This book is composed like a symphony, a garden or a skyscape of meditation and transformative processes. This will sparkle in our heart, mind and soul-space, with moments of satori and state of epiphany. These meditations have been taken from Yoga, Buddhistic practice, Osho and many western programmes of empowerment and transformation. There is a large variety but the continuous thread is simple. Witnessing and experiencing, inclusive and transcendental, acceptance of 'What Is!' You develop attention and awareness. And effortless focus at micro level or wide angle.

Skyscape Michael Cadnum,1994 Red Patterson, an evangelical television psychiatrist torn between his desires to heal and control, comes between artist Curtis Newns, who is devastated over the loss of his painting, and Curtis's wife Margaret.

Skyscape Scans David J. Patten,2017-05-17 In these seven short stories, David J. Patten explores contacts between humans and other enigmatic beings. As the stories unfold, our questions become: where are they from, and what do they want from us? Each story depicts humans driven by their search for answers about the mysteries of life. In Mysterious Masrur, an Indian archaeologist begins receiving messages from the Hindu deity Shiva. In The Sotsiaph Roundel, excavators discover an artifact that could record a turning point in human prehistory. Is this a true discovery or a hoax? Other stories involve characters who encounter mysterious strangers. In Cassie, a psychiatrist meets a beautiful woman at a gym, and his encounters with her may transform his life. The Singularity features a young man who after a fatal accident meets Rosita, a beautiful seductress. What will become of them both in their altered states of being? Patten's protagonists are mystified by what they don't understand about history and humanity. Can they find the answers to human existence and the universe?

Skyscapes Fabio Silva,Nicholas Campion,2015-03-12 Eleven papers extend discussion of the role and importance of the landscape and the wider environment to past societies, and to the understanding and interpretation of their material remains, into consideration of the significance of the celestial environment: the skyscape. The role of the sky for past societies has been relegated to the fringes of archaeological discourse. Nevertheless archaeoastronomy has developed a new rigour in the last few decades and the evidence suggests that it can provide insights into the beliefs, practices and cosmologies of past societies. Skyscapes explores the current role of archaeoastronomical knowledge in archaeological discourse and how to integrate the two. It shows how it is not only possible but even desirable to look at the skyscape to shed further light on human societies. This is achieved by first exploring the historical relationship between archaeoastronomy and academia in general, and with archaeology in particular. The volume continues by presenting case-studies that either demonstrate how archaeoastronomical methodologies can add to our current understanding of past societies, their structures and beliefs, or how integrated approaches can raise new questions and even revolutionise current views of the past.

Skyscape Mary Alexandra Stiefvater,2020-07-05 From daybreak to twilight, the sky shapes our days and our mood. The beauty of a sunset can make one feel limitless and hopeful, while dark clouds can bring out something melancholic and thoughtful. In Skyscape, photographer Mary Alexandra Stiefvater, turns her lens on the horizon revealing the many colors and splendors of the heavens.

Towards Skyscape Archaeology Fabio Silva,2015-06-30 The study of beliefs and practices concerning the sky in the past and the uses to which people's understanding of the sky was put has long been of great interest to archaeologists and the wider public, but also controversial. After the dispute in the 1960s and 70s between archaeologists and astronomers over the intentionality behind identified high-precision alignments such as those at Stonehenge, the modern discipline of archaeoastronomy has found its feet deeply rooted in fieldwork and statistical tests for validity. However, archaeoastronomy, particularly its prehistoric variety, is currently at an impasse. Although thousands of structures have now been surveyed for celestial alignments, and statistical analyses do suggest some degree of intentionality in some cases, only very rarely have these been successfully interpreted and integrated into the archaeological narrative. Archaeoastronomers have failed to fully engage with what the alignments meant for prehistoric people and why they decided to incorporate them into their structures. This impasse is one of the reasons why archaeologists have for so long kept their distance. Towards Skyscape Archaeology looks at archaeoastronomical theory and method from the point of view of archaeology. It highlights current limitations and suggests what needs to be addressed and overcome for archaeoastronomy to produce knowledge of value to the broader academic community. It argues that archaeoastronomy needs to come closer to archaeology; it needs to become a skyscape archaeology, and proposes ways to achieve this. Using case studies from Peru, Scotland, Spain, Malta and Stonehenge, Fabio Silva challenges the orthodoxy and argues that with a different approach we can further our understanding of the cosmology and worldviews of the cultures and societies.

Visualising Skyscapes Liz Henty,Daniel Brown,2019-08-19 Above the land and its horizon lies the celestial sphere, that great dome of the sky which governs light and darkness, critical to life itself, yet its influence is often neglected in the archaeological narrative. Visualising Skyscapes captures a growing interest in the emerging field of skyscape archaeology. This powerful and innovative book returns the sky to its rightful place as a central consideration in archaeological thought and can be regarded as a handbook for further research. Bookended by a foreword by archaeologist Gabriel Cooney and an afterword by astronomer Andrew Newsam, its contents have a wide-reaching relevance for the fields of archaeology, anthropology, ethnography, archaeoastronomy, astronomy, heritage and cultural studies. The volume balances six chapters on theory and methodology which elaborate on the history and practice of the field with six other chapters focused on case studies from around the world. Visualising Skyscapes captures the growing interest in the multidisciplinary study of skyscapes and will be of interest to academics, students and the general public, as well as having international appeal. It is topical, timely and relevant to current debates and will hopefully stimulate further interest in this exciting and relatively new area of investigation. The contributions showcase the work of distinguished academics in the field and the chapters are all enhanced

by numerous photographs and images.

Cultural Astronomy of the Japanese Archipelago Akira Goto,2020-11-19 Goto introduces the diverse and multilayered skylore and cultural astronomy of the peoples of the Japanese Archipelago. Going as far back as the Jomon, Yayoi, and Kofun periods, this book examines the significance of constellations in the daily life of farmers, fishermen, sailors, priests, and the ruling classes throughout Japan's ancient and medieval history. As well as covering the systems of the dominant Japanese people, he also explores the astronomy of the Ainu people of Hokkaido, and of the people of the Ryukyu Islands. Families were swept from their homes and, one by one, any girl that was different disappeared. Penn Roma's four sisters were born with these dreaded powers: they control the elements of fire, water, earth, and wind. Penn is the unimaginable fifth child, one with the power to call down the stars. Her father has hidden his daughters' powers for sixteen years. Then, one explosive night, Penn loses everything: her sisters are taken, her family destroyed. Now, Penn must do the unthinkable and use the power she's spent a lifetime suppressing.
