How Fast is It? Ben Hillman,2008 In this third book by Ben Hillman, young readers will learn and see just how fast something is. By comparing objects such as the Thrust SSC (that's a Thrust-powered Super Sonic Car), an ostrich (don't underestimate the ostrich, my friend!), the human brain, and bamboo,wildly different objects are taken out of normal context and placed next to one another to allow for new and exciting perspectives. So just how fast is an ostrich? An ostrich would beat a top-notch professional cyclist in a ten-mile (sixteen km) race, hands down! While the best cyclists can race at blistering speeds of twenty-five miles per hour, the ostrich can run at forty-five miles per hour! Other books in the series that kids will enjoy: *How Big Is It?* and *How Strong Is It?*

Only those young enough can survive tetra, a dangerous drug that creates a pulse-pounding rush of enormous strength and incredible speed. Seventeen-year-old Alana West has been trained to use tetra so she can pursue the young criminals who abuse its power—criminals like the one who nearly killed her kid brother. On tetra, Alana is unstoppable—an explosive blur as she surges through New York City. But with the clock ticking down to her eighteenth birthday, Alana will soon be too old for the rush . . . when just one more dose will prove deadly. Supported only by her steady handler, Tucker, Alana goes undercover, infiltrating an elite gang of breaknecks to stop their supply of the drug. But when Alana gets trapped on the wrong side of the law, she learns the breaknecks are not quite what they seem—especially Ethan, the boy who seems to see the truth inside her. With her dependency on tetra increasing, Alana must decide where her loyalties lie, before the rush ends. Forever.

Warp Speed Paul Mango,2022-03-15 A powerful story of how our nation's leaders overcame the odds, saving the American people from the throes of a deadly pandemic. The prior record for vaccine development and distribution was approximately 4.5 years. Operation Warp Speed got the COVID-19 vaccine to the American people in less than 10 months. Operation Warp Speed did not happen by accident. It was the result of exceptional leadership, explicit strategy, and unprecedented teamwork. Author Paul Mango, the foremost leader of Operation Warp Speed and the former deputy chief of US Health and Human Services, chronicles the challenges and real dangers of developing the vaccine. In this harrowing, behind-the-scenes account of the most successful public-private partnership since World War II, we learn how the nation's biggest leaders accomplished the impossible. Through sheer will and exceptional commitment, a small group of leaders fulfilled its mission, making the United States the only country in the world which could offer a vaccine to any citizen by April 2021, scarcely 14 months after the genetic identification of the virus.

China's High-Speed Rail Development Martha Lawrence, Richard Bullock, Ziming Liu, 2019-06-24 Over the past decade, China has built 25,000 km of dedicated highspeed railway—more than the rest of the world combined. What can we learn from this remarkable experience? China's High-Speed Rail Development examines the Chinese experience to draw lessons for countries considering investing in high-speed rail. The report scrutinizes the planning and delivery mechanisms that enabled the rapid construction of the high-speed rail system. It highlights the role of long-term planning, consistent plan execution, and a joint venture structure that ensures active participation of provincial and local governments in project planning and financing. Traffic on China's high-speed trains has grown to 1.7 billion passengers a year. The study examines the characteristics of the markets for which high-speed rail is competitive in China. It discusses the pricing and service design considerations that go into making high-speed rail services competitive with other modes and factors such as good urban connectivity that make the service attractive to customers. One of the most remarkable aspects of the Chinese experience is the rapid pace of high-quality construction. The report looks at the role of strong capacity development within and cooperation among China Railway Corporation, rail manufacturers, universities, research institutions, laboratories, and engineering centers that allowed for rapid technological advancement and localization of technology. It describes the project delivery structures and incentives for delivering quality and timely results. Finally, the report analyzes the financial and economic sustainability of the investment in high-speed rail. It finds that a developing country can price high-speed rail services affordably and still achieve financial viability, but this requires very high passenger density. Economic viability similarly depends on high passenger density.

At present, it serves as an independent entity, it is subordinated to the minister responsible for transport. This monograph aims at reaching an international audience of experts so as to present Polish determinants of HSR implementation. In order to elaborate this monograph, apart from specialists from the Railway Research Institute, experts from other research and academic centres were invited. Not only presenting a wide range of problems connected with future construction of High Speed Lines in Polish conditions, but also a number of operational ones. The authors have created a reference work of universal character, solving problems in order to build and operate high speed rail systems in countries on a similar level of development as Poland. Features: providing requirements for design and upgrade of engineering works on High Speed Rail development information on restructuring and building railway lines for countries starting to develop a High Speed Rail system dealing with organizational, engineering, socioeconomic and economic demands for transport services and the formation of human resources for constructing and operating a High Speed Rails system. Presenting these problems on the international arena will facilitate future cooperation and application of world experience to create HSR in Poland and integrate the Polish HSR network into the international one.
