**Community** Brad House,2011-09-07 Community within the church today is hemorrhaging. Attention spans are dwindling, noise levels are increasing, and we can't seem to find time for real relationships. The answer to such social fragmentation can be found in small groups, and yet the majority of small groups—at least in the traditional sense—are often not the intentional, transformational community we really want and need. Somehow we need to get our groups off life support and into authentic community. Pastor Brad House helps us to re-imagine what gospel-centered community looks like and shares from his experience leading and reproducing healthy small groups. With wisdom and candor, House challenges us to think carefully about our own groups and to take steps toward cultivating communities that are able to glorify Jesus, bless one another, and participate in the mission of God.

The book comes at a really important juncture in the trajectory of corporate learning and highlights the importance of learning in the workflow. It is the right book, at the right time, in the right way." —Nigel Paine, MD NigelPaine.com Ltd "Innovative Performance Support significantly moves the learning revolution to the next level. It is the workplace, and the work itself, where performance support will make its mark, and Gottfredson and Mosher are the trailblazers." —Marc J. Rosenberg, Marc Rosenberg and Associates Research shows that 80 percent of learning in the workplace occurs on the job, rather than in formal training sessions. Innovative Performance Support offers you a concise and comprehensive overview of performance support (PS) practices—ongoing, job-specific resources that ensure employees perform effectively on the job. They show how leading firms deploy PS solutions to reduce costs, retain talent, and increase productivity and efficiency.

**The Mother-to-Mother Postpartum Depression Support Book** Sandra Poulin,2006-03-07 "I thought I was the only one..." After she gave birth to a bouncing baby girl, Sandra Poulin felt like crying. And she did—for months. But they weren't happy tears—Sandra felt worthless, could hardly sleep, and had thoughts of death. Like too many mothers around the world, Sandra had no idea that this common but baffling condition had a name: Postpartum Depression... "Shouldn't this be the happiest time of my life?" What kind of mother, some might wonder, could feel depressed after having been so richly blessed with a baby? The answer: every kind, women from all walks of life, from all over the world, younger and older. And here, in a unique collection, are their stories of battles with PPD, with intimate details about the symptoms, the struggles, and the strategies that helped them emerge victorious. Written by mothers, for mothers, this collection is an uplifting, enlightening—and perhaps even lifesaving—book.

**Technical Support Essentials** Andrew Sanchez,Karen Sleeth,2010-09-08 Technical Support Essentials is a book about the many facets of technical support. It attempts to provide a wide array of topics to serve as points of improvement, discussion, or simply topics that you might want to learn. The topics range from good work habits to the way technical support groups establish their own style of work. This book applies theories, models, and concepts synthesized from existing research in other fields—such as management, economics, leadership, and psychology—and connects them to technical support. The goal is to build on the work of others and allow their success to evolve the profession. The book's broad perspective looks at proven practices, legal issues, dealing with customers, utilizing resources, and an array of other topics of interest to tech support professionals.

**Digitalization of design for support structures in laser powder bed fusion of metals** Katharina Bartsch,2023-02-18 Additive manufacturing is considered a key technology for digital production. However, several barriers towards the broad industrial application exist, e.g. the associated cost and the required experience regarding the manufacturing process. To eradicate these barriers, the complete digitalization of the value creation process is needed. In this thesis, a digital, automated support structuredesign procedure is developed. Topology optimization is used for design rule determination, and the space colonization algorithm is adapted for the automated design. The validity of the procedure is proven experimentally, revealing sufficient mechanical performance alongside cost reduction at medium to large production scales.

Reconceptualising education support services in South Africa Johnnie Hay, Macalane J. Malindi, Thabo Makhalemele, 2022-02-10  
Inclusive education has been phased into South Africa since 2001 but relies heavily upon adequate support services to support learners and teachers experiencing barriers to learning and development. This book focuses on the different levels of support provided in South African education – from School-based Support Teams to District-based Support Teams through to special and full-service schools, and how these could be reconceptualised to provide improved support to learners and teachers. Current research indicates that inclusive education is being implemented in varied and fragmented forms across the country, and the point of departure of this work is that education support services need to be improved and reconceptualised to ensure better support for inclusive education.

**DIRECT SUPPORT From a Manager's Viewpoint** Amara M. Kamara, 2014-06-06  
DIRECT SUPPORT from a manager's Viewpoint/em is about answering the frequent how-to questions of direct support. It offers completely new approaches to working with people with intellectual and developmental disabilities (special needs) by clearly providing readers with understanding of routines, of dealing with challenges arising from individual uniqueness, and of an easy-to-master art of engagement in a way that makes practical application of the new approaches possible. The book utilizes real-life direct support scenarios to demonstrate ways of developing and delivering individualized staff actions, and applying the Opportunity Approach to understand and empower a person with special needs. Through enriched visuals and diagrams, the book tackles and demystifies the harder questions of the capacity-preference disparities, providing readers with navigation techniques and the golden rule of deriving preferences for those people who cannot overtly express their needs. The book also makes it easier to appreciate of working with any given direct support situation by equipping readers with ways to initiate and maintain direct interaction through stimulation and opportunity leads by concisely highlighting the context, the process, the problem and solution of typical direct support encounters. The book was inspired by a direct support professional whose newness but demonstrated interest in the field led her to ask many questions and quest to know everything from the context of support, to the process and approach of delivery, to the outcome of direct support, and wanting to know why direct support outcomes themselves are not independently usable until they are further investigated and applied to the developing realities of the special needs person. Most books on working with individuals with intellectual and developmental disabilities only provide general advice. On the other hand, subject specific references offer only policy-centric interpretation of the direct support process, but fail to explain the overall contexts of what actually takes place on the ground or provide any problem-solving process. This book does all three—it provides the context, the process, and problem resolution. Written by a manager who grew through the ranks of direct support, this book is an invaluable guide to what really works in direct support. It utilizes real situations that happened during actual direct support process to explain concepts and approaches to navigating, handling and resolving similar situations should it occurred elsewhere in the helping relationship.

Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers.
