Rapport mondial des Nations Unies sur la mise en valeur des ressources en eau 2021 ,2021-03-22 L'eau est une ressource qui n'est pas infinie et qui est non substituable. En tant que fondement de la vie, des sociétés et des économies, l'eau comporte de multiples valeurs et avantages. Mais contrairement à la plupart des autres ressources naturelles, il s'est avéré extrêmement difficile de déterminer sa véritable «valeur». L'édition 2021 du rapport mondial sur la mise en valeur de l'eau des Nations Unies, intitulée «Valuing Water» évalue l'état actuel et les défis de la valorisation de l'eau dans différents secteurs et perspectives et identifie les moyens de promouvoir sa valorisation en tant qu'outil pour aider à améliorer sa gestion et parvenir à un développement durable à l'échelle mondiale.

Progrès de la coopération sur les eaux transfrontalières dans le cadre de la Convention sur l'eau Economic Commission for Europe,2022-01-20 Cette publication présente et analyse les conclusions du premier exercice pilote de rapport dans le cadre de la Convention sur l'eau, réalisé en 2017. Les progrès réalisés dans la mise en œuvre de la Convention sont passés en revue et résumés, ainsi que l'identification des tendances significatives, des succès, des défis et des opportunités concernant la coopération transfrontalière dans le domaine de l'eau. Le mécanisme d'établissement de rapports au titre de la Convention a été formellement adopté (décision VII/2) par la Réunion des Parties à la Convention sur l'eau lors de sa septième session (Budapest, 17-19 novembre 2015).

Géométrie des pavages : De la conception à la réalisation sur ordinateur AUDIBERT Pierre,2013-02-01 Des fresques de l'Antiquité romaine aux pavages de Durer et Kepler, des mosaïques de l'art arabo-persan aux pavages de Penrose, l'art décoratif est illuminé de motifs géométriques foisonnants. Soumis à des régularités lancinantes ou à des symétries kaléidoscopiques, ils forment un trait d'union privilégié entre l'art et les mathématiques. S'adressant aux enseignants et étudiants en mathématiques ou informatique comme aux amateurs d'art, Géométrie des pavages propose différentes clés permettant de mieux comprendre la beauté cachée des formes, mais également de devenir les artisans constructeurs des pavages sur ordinateur. Il détaille les trois types de conception géométrique (surface plane, sphérique ou géométrie non euclidienne hyperbolique) et les concepts théoriques qui les fondent. La compréhension des mécanismes internes de la fabrication des pavages permet ainsi d'accéder aux programmes de réalisation sur ordinateur, donnant accès à des visualisations instantanées et à un grand nombre de variations possibles.

Rapport sur le developpement dans le monde 2018 POUR,2009 Chaque annee, le Rapport sur le developpement dans le monde de la Banque mondiale met en vedette un sujet d'importance capitale pour le developpement mondial. Le Rapport sur le developpement dans le monde 2018 - APPRENDRE pour realiser la promesse de l'education - est le premier consacre integralement a l'education. Et le moment s'y prete particulierement : l'education a toujours ete essentielle au bien-etre de l'etre humain, mais elle l'est plus encore en cette periode de rapides mutations economiques et sociales. Le meilleur moyen de preparer les enfants et les jeunes a l'avenir est de placer l'apprentissage au centre de toutes les interventions de promotion de l'education. Le Rapport sur le developpement dans le monde 2018 aborde quatre themes majeurs :La promesse de l'education. L'education est un levier important pour eradiquer la pauvrete et promouvoir une prosperite partagee. Mais pour qu'elle puisse realiser ce potentiel, il faut ameliorer les politiques - a l'interieur comme en dehors du systeme educatif.La necessite de mettre l'apprentissage en lumiere. En depit des progres accomplis en matiere d'acces a l'education, les recentes evaluations des acquis scolaires revelent que de nombreux jeunes a travers le monde, particulierement ceux qui sont issus des couches pauvres ou marginalisees de la population, quittent l'ecole sans avoir acquis ne seraient-ce que les competences necessaires a la vie. En meme temps, des evaluationsscolaires comparables sur le plan international montrent que les competences disponibles dans de nombreux pays a revenu intermediaire sont nettement inferieures a ce que ces pays ambitionnent. Et trop souvent, ces lacunes sont cachees - par consequent, pour faire face a la crise de l'apprentissage, il est crucial de commencer par la mettre en lumiere en ameliorant l'evaluation des acquis des eleves.Comment mettre l'ecole au service de l'ensemble des apprenants ? Les travaux de recherche sur le cerveau, l'innovation pedagogique et la gestion des etablisements scolaires, entre autres, ont identifie des interventions qui favorisent l'apprentissage en faisant en sorte que les apprenants soient mieux prepares, que les enseignants soient a la fois competents et motives, et que d'autres moyens soient mis en oeuvre pour soutenir larelation entre l'enseignant et l'apprenant.Comment faire en sorte que le systeme favorise l'apprentissage ? Pour realiser les objectifs d'apprentissage a travers le systeme educatif dans son ensemble, il ne suffit pas de transposer a plus grande echelle les interventions efficaces. Les pays doivent aussi surmonter des obstacles techniques et politiques en ayant recours a des outils de mesure et indicateurs suffisamment parlants pour mobiliser les acteurs concernes etsuivre les progres, en formant des coalitions au service de l'apprentissage et en adoptant une approche de reforme evolutive.

Le Ràeglement des diffâerends sur les nouvelles ressources naturelles Renâe Jean Dupuy,1983-11-14 Between 1988 & 1993 over fifty nations have either enacted new mining legislation, had such legislation pending adoption or were in the process of drafting new or revised legislation. In almost every case, this legislation carried with it changes in the fiscal regimes. The ability to attract mineral investment, be it in either a developed or a developing country, is partly dependent on the legislative & fiscal systems which regulate the industry. In the light of the changes taking place, this new reference work is timely & provides essential reading for those with an interest in mining taxation. The first part of the book analyses general topics which are applicable to understanding the taxation of mineral enterprises, while the second part provides a comprehensive & detailed account of actual taxation systems & methods.

Rapport sur la situation du volontariat dans le monde 2015 United Nations Volunteers,2015-12-15 Ce deuxième Rapport sur la situation du volontariat dans le monde, consacré au volontariat et à la gouvernance, présente

l'idée que le volontariat et le fait de placer l'être humain au cœur des politiques et des investissements dans le développement offrent des possibilités inexploitées pour le développement durable. Le volontariat est présenté comme une ressource complémentaire et un vecteur d'acquisition de compétences, de connaissances et d'expertise qui favorisent l'expression, la participation, la responsabilité et la réactivité, autant de piliers clés de la bonne gouvernance qui viennent s'ajouter aux autres solutions et ressources du développement. Ce rapport fondé sur un large corpus de données décrit comment le volontariat peut promouvoir la paix et le développement. Il présente les résultats obtenus dans certains contextes et témoigne ainsi des contributions possibles des volontaires et du volontariat. Cet « art du possible » est illustré par des études de cas qui offrent un éventail marquant d'exemples illustrant comment les personnes, individuellement et collectivement, mettent en commun leur énergie pour intervenir dans les différents espaces de la gouvernance. Le rapport révèle également que lorsque les gouvernements et les autres acteurs de la gouvernance créent un environnement favorable et invitent la population dans des espaces fermés, cela peut donner lieu à des changements qui bénéficieront d'une meilleure appropriation et d'un soutien accru.

Reflections on Canada's Past, Present and Future in International Law/Réflexions sur le passé, le présent et l'avenir du Canada en droit international Oonagh E. Fitzgerald, Valerie Hughes, Mark Jewett, 2018-06-30 Marking 150 years since Confederation provides an opportunity for Canadian international law practitioners and scholars to reflect on Canada's rich history in international law and governance, where we find ourselves today in the community of nations, and how we might help shape a future in which Canada's rules-based and progressive approach to international law gains ascendancy. This collection of essays, each written in the official language chosen by the authors, provides a thoughtful perspective on Canada's past and present in international law, surveys the challenges that lie before us, and offers renewed focus for Canada's pursuit of global justice and the rule of law. Part I explores the history and practice of international law, including sources of international law, Indigenous treaties, international treaty diplomacy, domestic reception of international law, and Parliament's role in international law. Part II explores Canada's role in international law, governance and innovation in the broad fields of economic, environmental, and intellectual property law. Part III explores Canadian perspectives on developments in international human rights and humanitarian law, including judicial implementation of these obligations, international labour law, business and human rights, international criminal law, war crimes, child soldiers, and gender. Reflections on Canada's Past, Present and Future in International Law/Réflexions sur le passé, le présent et l'avenir du Canada en droit international demonstrates the pivotal role that Canada has played in the development of international law and signals the essential contributions the country is poised to make in the future.

La Convention sur l'interdiction et l'élimination des armes chimiques Daniel Bardonnet, 1995-11-17 After twenty years of negotiation within the framework of the Disarmament Conference, the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction was signed in Paris between 13 and 15 January 1993. At the same time, the signatory States adopted a resolution instituting a Preparatory Commission, established in The Hague, with the aim of 'the prompt and effective establishment of the future Organization for the Prohibition of Chemical Weapons'. A variety of converging considerations led the Curatorium of the Academy of International Law to organize a workshop on this subject: first the very interesting nature of the highly sensitive problems raised by the destruction of chemical weapons, both on the strategic and political planes, as well as on technical, financial and ecological grounds; but also the originality and difficulty, from the legal standpoint, of the numerous questions which will inevitably arise in connection with the application of the Paris Convention. Finally, the Paris Convention, which is innovative in many respects, particularly in that it institutes international control over the whole of an industrial activity, may be used as a model in other areas of disarmament, in particular the area of nuclear weapons.
