23 European Symposium on Computer Aided Process Engineering Lukas Eberle,Hirokazu Sugiyama,Rainer Schmidt,2013-06-10 Reliable product supply is one of the most critical missions of the pharmaceutical industry. The lead time, i.e. the duration between start and end of an activity, needs to be managed in any production facility in order to make scheduling predictable' agile and flexible. We present a method for measuring and improving production lead time of pharmaceutical processes with a primary focus on Parenterals (i.e. injectables) production processes. Monte Carlo simulation (MCS) is applied for quantifying the total lead time (TLT) of a batch production as a probability distribution and sensitivity analysis reveals the ranking of sub-processes by impact on TLT. Based on these results, what-if analyses are performed to evaluate effects of investments, resource allocations and process improvements on TLT. An industrial case study was

performed at a production site for Parenterals of F. Hoffmann-La Roche in Kaiseraugst, Switzerland, where the presented method supported analysis and decision-making of production enhancements.

Physisorption Kinetics Hans Jürgen Kreuzer, Zbigniew W. Gortel, 2012-12-06

This monograph deals with the kinetics of adsorption and desorption of molecules physisorbed on solid surfaces. Although frequent and detailed reference is made to experiment, it is mainly concerned with the theory of the subject. In this, we have attempted to present a unified picture based on the master equation approach. Physisorption kinetics is by no means a closed and mature subject; rather, in writing this monograph we intended to survey a field very much in flux, to assess its achievements so far, and to give a reasonable basis from which further developments can take off. For this reason we have included many papers in the bibliography that are not referred to in the text but are of relevance to physisorption. To keep this monograph to a reasonable size, and also to allow for some unity in the presentation of the material, we had to omit a number of topics related to physisorption kinetics. We have not covered to any extent the equilibrium properties of physisorbed layers such as structures, phase transitions and thermodynamic properties in general. A number of excellent review articles, listed in the bibliography, cover this material. Likewise, little is said about scattering off solid surfaces; this subject is again covered in several books and many review articles. Lastly, little is said about chemisorption kinetics, for

which microscopic thebries and models have not been fully developed but are still at a rather early exploratory stage.

LISTEN to LIVE - our Brain and Music Jozef Vervoort, Martien de Voigt, 2018
This book describes how the quality of life can be improved by exploiting the central role of the hearing organs from the astonishing discoveries of Professor Alfred Tomatis. This book can be considered as a standard work to establish the proper execution of the original Tomatis method. It pays tribute to Professor Alfred Tomatis' pioneering work. It provides an insight into why and for what disabilities the method works so well. A wealth of scientific validations and cases are presented to illustrate this as an aid for practitioners as well as for potential clients and to convince the outside world. Details encompass anatomy, neurology, and physiology, pathology, psychology along with interpretations of listening tests, programming and equipment. It serves both therapists and clients, as well as generally interested persons and medical or educational institutions.

The Good Fight Julianna Keyes, 2016-07-25 If you're looking for a gritty story with a lot of heat (and I mean a lot) and real characters, I'd definitely recommend *Time Served*.—DearAuthor.com Julianna Keyes returns to

the wrong side of the tracks in this third installment of her wildly popular Time Served series I was born a fighter. You had to be, to survive in Camden. Lucky for me, I loved it. The thrill, the pain, the glory. Until one night things went too far and I almost lost my ticket out. So I swore off fighting. Never again. No matter how much I wanted it. I went to college. Got a degree. A job on Wall Street. Yet I still wasn't smart enough to stay away. So now I'm back. And it's just as bad as I remember. Enter Dr. Susan Jones, superstar neurosurgeon. She's brilliant, she's sexy and she's a pain in my ass. I can't get enough and she's too busy for a relationship. She wants to hook up, get off, go home. She doesn't have time for a thug from Camden. But she keeps coming back. This place brings out the worst in people. Every day it threatens the project I'm working on, the plans I'm making. Every day it drags me down just a little more, until the hands I vowed to keep clean start itching to get dirty. If I don't start fighting for what I want, I'll wind up with nothing. I didn't come back to Camden for nothing. I came back to start something. And when people hurt the things I care about, the gloves come off. Book three of the Served series This book is approximately 97,000 words One-click with confidence. This title is part of the Carina Press Romance Promise: all the romance you're looking for with an HEA/HFN. It's a promise!
