The Piano Tuner Daniel Mason,2003-12-16 A New York Times Notable Book A San Francisco Chronicle, San Jose Mercury News, and Los Angeles Times Best Book of the Year “A gripping and resonant novel. . . . It immerses the reader in a distant world with startling immediacy and ardor. . . . Riveting.” —Michiko Kakutani, The New York Times In 1886 a shy, middle-aged piano tuner named Edgar Drake receives an unusual commission from the British War Office: to travel to the remote jungles of northeast Burma and there repair a rare piano belonging to an eccentric army surgeon who has proven mysteriously indispensable to the imperial design. From this irresistible beginning, *The Piano Tuner* launches readers into a world of seductive, vibrantly rendered characters, and enmeshes them in an unbreakable spell of storytelling.

Tuner Cars Jeff Savage,2010-07 Describes tuner cars, including their history, design, and the competitions and events tuner car owners take part in--Provided by publisher.

The Piano Tuner's Wife Jean Yamasaki Toyama,2018-11-17 “Follow the piano tuner’s wife as she accompanies the tuner into the homes of some of Hawai‘i’s families. Listen to her interaction with clients: mothers and fathers, aquarium lovers and hoarders, healers and would-be cosmologists. See where imagination can take you, when you encounter the ordinary: an ant condo, a doggie treasure trove. Think about going through the eye of a camel. Dream about being a writer.”

The Piano Tuner's Daughter Ingrid Silvian,2013-07-16 Ingrid

Silvian has written a memorable story for children that will help them understand what it was really like to live through events of WWII, how children just like them adapt and survive. Through vignettes in the lives of two young girl friends, one Jewish, one Christian, we experience how everything changed when the Nazis came. Silvian provides a child's eye view of war, both mundane and profound a shift from marbles to shrapnel as the treasure of choice; racing to catch the last train carrying evacuees out of the city and ultimately, who was saved and who was sacrificed. At a time when many of the first hand witnesses of this chilling chapter of history are passing away, Silvian's story provides a valuable link that reaches across generations that will live on in the hearts and minds of a new generation of children. How To Build a Hot Tuner Car Scott Smith, 2007

The Piano Tuner Chiang-Sheng Kuo, 2023-01-03 This bestseller and winner of every major literary award in Taiwan is an elegiac novel about love and loss, broken dreams and desolate hearts—and music: A delightful read.—Ha Jin A widower grieving for his young wife. A piano tuner concealing a lifetime of secrets. An out-of-tune Steinway piano. A journey of self-discovery across time and continents, from a dark apartment in Taipei's red-light district to snow-clad New York. At the heart of the story is the nameless narrator, the piano tuner. In his forties, he is balding and ugly, a loser by any standard. But he was once a musical prodigy. What betrayal and what heartbreak made him walk away from greatness? Long hailed in Taiwan as a “writer's writer,” Chiang-Sheng Kuo delivers a stunningly powerful, compact novel in *The Piano Tuner*. It's a book of sounds: both of music and of the heart, from Rachmaninoff to

Schubert, from Glenn Gould to Sviatoslav Richter, from untapped potential to unrequited love. With a cadence and precision that bring to mind Thomas Mann's *Death in Venice*, Kazuo Ishiguro's *Nocturnes*, and Yasunari Kawabata's *Snow Country*, this short novel may be a portrait of the artist as a "failure," but it also describes a pursuit of the ultimate beauty in music and in love.

The Piano Tuner Peter Meinke, 2012-03-15 In *The Piano Tuner*, Peter Meinke writes of the foreignness that awaits us when we go abroad and when we answer our own front door to admit a stranger, that confronts us in unfamiliar cities and villages and in the equally disquieting surroundings of our memories and regrets. Often in these stories, what seems a safe, comfortable environment turns suddenly threatening. In the title story, a writer's quiet existence amid his antiques and books is dismantled, piece by piece, by a demonic, beer-bellied piano tuner. In *The Ponoos*, a man recalls how, as a young boy living in Brooklyn during World War II, he became a collaborationist in the brutal pranks of two Irish bullies. In *The Twisted River*, the sedate collegiality of a Polish university is disrupted when an American on a Fulbright grant attempts to blackmail two faculty members. And in *The Bracelet*, a young anthropology student doing field work in Africa finds herself drawn further and further into the role of a priestess of Oshun, into a life dictated by the configuration of cowry shells cast upon the floor. Meinke writes of a world where our control over our lives seldom exists across a border, and often extends no further than our fingertips. Attempts to bridge two cultures, two lives are sometimes successful, as when an actor finds love in the arms of a tough-talking barmaid, but more usually lead to disillusionment, as when a hard-drinking salesman's career is shattered after he is drunk under the table one night by a Polish engineer, or when an English

father struggles to find common ground with his American son. Riveting, almost terrifying, the stories in *The Piano Tuner* tell of decent men and women caught in events that they could never have predicted, would never have chosen.

Semiconductor Devices for Electronic Tuners Seiichi

Watanabe,2020-02-13 This tract describes in detail the semiconductor components of the high-frequency front end-the electronic tuner-of televisions and VCRs. These high-frequency components substantially determine performance, including clarity of reception, and thus their quality is crucial to the success of electronic tuners. The semiconductor devices involved-voltage-variable capacitance diodes, band-switch diodes, dual-gate FETs, and others-are discussed in this book, as is their performance as mediators of tuning and amplification. Special emphasis is put on the analysis of distortion characteristics of tuning diodes and FETs, which are essential in providing tuners with high endurance against interfering signals. Design and fabrication processes well suited for mass production are also described. The content will be most informative not only to those involved in R&D and production of semiconductor devices, but also to high-frequency systems designers.
