Remote Viewing David Morehouse, 2010-11-05 It is possible to see across space and time. Even those who accept that humans can reach beyond the conventional five senses typically think of psychics as special or gifted with unusual abilities. But David Morehouse teaches otherwise: all human beings, including you, have the innate capacity for Remote Viewing. David Morehouse was trained by the U.S. government in Remote Viewing, an exact scientific protocol for tapping the human power to gather information across space and time. In this comprehensive manual, he has taken his military training as an operational Remote Viewer and turned it into a step-by-step training system one that teaches any serious reader how to unlock their natural abilities and become more than the physical world allows. You have the ability to do this, Morehouse says. Something extraordinary is absolutely possible in your life. Remote Viewing is more than simply a method for gathering information. It is a transformational tool instilling within you the absolute and irrefutable evidence that you are more than human; that you are extraordinarily human. As you gain experience and confidence as a Viewer, you will tap into the collective unconscious that connects you to everything and everyone in the universe. Through David Morehouse's training, you will learn to touch the infinite source of life and knowledge that spiritual masters throughout human history have sought.

Remote Viewing Courtney Brown, 2005 Remote viewing is the mental ability to perceive and describe places, persons, or events at distant locations in the past, present, and future. This book describes the science and theory of the remote-viewing phenomenon. The reality of the remote-viewing phenomenon is not in dispute among a large body of respected researchers – both inside and outside of academia – who have published an extensive collection of high-quality investigations over the past few decades. But profound mysteries remain. This volume breaks new ground by resolving some of remote-viewing's greatest enigmas. In these pages, new research and new theories explain why remote viewing works, and why it is scientifically possible. These investigations utilize remote-viewing methods that are derivative of those used for decades in well-documented U.S. government-funded psi research sponsored by the Central Intelligence Agency (C.I.A.) and the Defense Intelligence Agency (D.I.A.). Filled with descriptions and analyses of highly original experiments, here is an investigation into the fascinating characteristics of time and physical reality using remote viewing as a tool of exploration, offering evidence that the past, present, and future truly exist simultaneously. The idea of differing future and past time lines is not just science fiction.

Distant Viewing Taylor Arnold, Lauren Tilton, 2023-10-17 A new theory and methodology for the application of computer vision methods to the computational analysis of collected, digitized visual materials, called “distant viewing.” *Distant Viewing: Computational Exploration of Digital Images* presents a new theory and methodology for the computational analysis of digital images, offering a lively, constructive critique of computer vision that you can actually use. What does it mean to say that computer vision “understands” visual inputs? Annotations never

capture a whole image. The way digital images convey information requires what researchers Taylor Arnold and Lauren Tilton call “distant viewing”—a play on the well-known term “distant reading” from computational literary analysis. Recognizing computer vision’s limitations, Arnold and Tilton’s spirited examination makes the technical exciting by applying distant viewing to the sitcoms *Bewitched* and *I Dream of Jeannie*, movie posters and other popular forms of advertising, and Dorothea Lange’s photography. In the tradition of visual culture studies and computer vision, *Distant Viewing*’s interdisciplinary perspective encompasses film and media studies, visual semiotics, and the sciences to create a playful, accessible guide for an international audience working in digital humanities, data science, media studies, and visual culture studies.

Connected Viewing Jennifer Holt, Kevin Sanson, 2013-12-04 As patterns of media use become more integrated with mobile technologies and multiple screens, a new mode of viewer engagement has emerged in the form of connected viewing, which allows for an array of new relationships between audiences and media texts in the digital space. This exciting new collection brings together twelve original essays that critically engage with the socially-networked, multi-platform, and cloud-based world of today, examining the connected viewing phenomenon across television, film, video games, and social media. The result is a wide-ranging analysis of shifting business models, policy matters, technological infrastructure, new forms of user engagement, and other key trends affecting screen media in the digital era. *Connected Viewing* contextualizes the dramatic transformations taking place across both media industries and national contexts, and offers students and scholars alike a diverse set of methods and perspectives for studying this critical moment in media culture.

Viewing Art with Babies Kathy Danko-McGhee,2023-06-06 Viewing Art with Babies demonstrates how to facilitate quality art viewing experiences with babies from as young as 2 months old. Viewing Art with Babies details practical ways through which museum practitioners, early childhood and community educators, and parents can provide artviewing experiences in the museum, early childhood classroom or even their own home. It will be of interest to practitioners and parents around the world, and those engaged in the study of museum education.

The Viewing Room Jacquelin Gorman,2013-09-15 In The Viewing Room, two hospital chaplains console the living during the moments when they look upon their beloved dead for one last time in a large urban hospital in Los Angeles. But this room is also a character, linking stories together and bearing witness in chilling testimony of grief and wisdom. Henrietta and Maurice, the chaplains, are ministers who have lost their faith due to devastating personal tragedy. Still, they regain their hold on their own lives through their work, one death at a time. Jacquelin Gorman lays bare nine parallel worlds of suffering in stories of unflinching detail, vividly told with heart, guts, and compassion. In these pages, the children are both murderers and victims, and the adults fare no better: a teenage father shakes his screaming baby to death; high school surfers kill the homeless for sport as a

way of cleaning up their beaches; a Muslim basketball player readies her best friend for burial with a sacred ritual that reveals forbidden love; a scorned ex-wife leaves a message in permanent ink on the body of her betrayer; and a pet therapy dog's unconditional love for a decaying body memorializes the spirit within. This moving and unsettling collection of stories shines a piercing light on the dark corners of our modern world, illuminating necessary truths that convey a clearer and, undoubtedly, greater vision of humanity.

Netflix, Dark Fantastic Genres and Intergenerational Viewing Djoymi Baker,Jessica Balanzategui,Diana Sandars,2023-07-04 Focusing on Netflix's child and family-orientated platform exclusive content, this book offers the first exploration of a controversial genre cycle of dark science fiction, horror, and fantasy television under Netflix's Family Watch Together TV tag. Using a ground-breaking mix of methods including audience research, interface, and textual analysis, the book demonstrates how Netflix is producing dark family telefantasy content that is both reshaping child and family-friendly TV genres and challenging earlier broadcast TV models around child-appropriate family viewing. It illuminates how Netflix encourages family audiences to watch together through intergenerational dynamics that work on and offscreen. The chapters in this book explore how this Netflixication of family television developed across landmark examples including Stranger Things, A Series of Unfortunate Events, The Dark Crystal: Age of Resistance, and even Squid Game. The book outlines how Netflix is consolidating a new dark family terrain in the streaming sector, which is unsettling older concepts of family viewing, leading to considerable audience and critical confusion around target audiences and viewer expectations. This book will be of particular interest to upper-level undergraduates, graduates, and scholars in the fields of television studies, screen genre studies, childhood studies, and cultural studies.
