California Edan Lepucki,2014-07-08 The world Cal and Frida have always known is gone, and they've left the crumbling city of Los Angeles far behind them. They now live in a shack in the wilderness, working side-by-side to make their days tolerable in the face of hardship and isolation. Mourning a past they can't reclaim, they seek solace in each other. But the tentative existence they've built for themselves is thrown into doubt when Frida finds out she's pregnant. Terrified of the unknown and unsure of their ability to raise a child alone, Cal and Frida set out for the nearest settlement, a guarded and paranoid community with dark secrets. These people can offer them security, but Cal and Frida soon realize this community poses dangers of its own. In this unfamiliar world, where everything and everyone can be perceived as a threat, the couple must quickly decide whom to trust. A gripping and provocative debut novel by a stunning new talent, California imagines a frighteningly realistic near future, in which clashes between mankind's dark nature and deep-seated resilience force us to question how far we will go to protect the ones we love. In her arresting debut novel, Edan Lepucki conjures a lush, intricate, deeply disturbing vision of the future, then masterfully exploits its dramatic possibilities.-Jennifer Egan, author of A Visit from the Goon Squad

The California Field Atlas Obi Kaufmann,2017-09 [A] gorgeously illustrated compendium.--Sunset This lavishly illustrated atlas takes readers off the beaten path and outside normal conceptions of California, revealing its myriad ecologies, topographies, and histories in exquisite maps and trail paintings. Based on decades of exploring the backcountry of the Golden State, artist-adventurer Obi Kaufmann blends science and art to illuminate the multifaceted array of living, connected systems like no book has done before. Kaufmann depicts layer after layer of the natural world, delighting in the grand scale and details alike. The effect is staggeringly beautiful: presented alongside California divided into its fifty-eight counties, for example, we consider California made up of dancing tectonic plates, of watersheds, of wildflower gardens. Maps are enhanced by spirited illustrations of wildlife, keys that explain natural phenomena, and a clear-sighted but reverential text. Full of character and color, a bit larger than life, The California Field Atlas is the ultimate road trip companion and love letter to a place.

iViva California! Michael Burgess,Mary Wickizer Burgess,2006-01-01 Here are seven previously uncollected documents relating to the history of California, from its early days as a Mexican territory to the first fifty years of statehood as part of the United States. Jose del Carmen Lugo, a native-born Californio, tells of his life as a ranchero in San Bernardino and elsewhere, and the coming of the Norteamericanos in the 1840s. Benjamin Davis (Benito) Wilson recounts many of the same events from the perspective of an English-speaking settler who intermarried with one of the early land-owning Mexican families, and later supported the U.S. side during the Mexican-American War of 1845-48. Alexandre Holinski touts the virtues of frontier California and San Francisco during the Gold Rush days, as seen from a foreigner's unique perspective. Mark Lafayette Landrum, who settled in California during the early days of statehood, relates his rise to power as a local politician in Northern California. Amos Carpenter Rogers gives us an account of a rough voyage 'round the tip of South America to the Gold Rush fields. Alexander H. Todd and William T. Ballou provide further illumination with their brief accounts of life in early California and the Pacific Northwest. For the student of California history, these first-person narratives will open a window onto a period now long forgotten. Complete with Notes, Bibliography, and detailed Index. MICHAEL BURGESS is a Professor Emeritus at California State University, San Bernardino. MARY WICKIZER BURGESS was the co-publisher for many years of Borgo Press. Between them they have authored over 135 books.

Glimpses of California and the Missions Helen Hunt Jackson,1903 Helen Hunt Jackson (1830-1885) of Amherst, Massachusetts, turned to writing after the death of her first husband in 1863. Her marriage to William Jackson, a wealthy Denver Quaker, brought her to the West in 1875, and she soon became a Native American rights activist. She was sent west as part of a federal commission to investigate conditions among the Mission Indians in 1882, and her experiences as part of that commission inspired her famous 1884 novel Ramona. Glimpses of California (1902) reprints articles Jackson first published in 1883. She offers a narrative history of the California mission system and the early years of Los Angeles as a Hispanic community and the work of Junipero Serra as well as an analysis of the fate of the Mission Indians after those missions were dismantled. This section of the book is followed by a chapter on Southern California's outdoor industries -- livestock ranching and farming -- and one on Jackson's visit to Oregon.

California Crackup Joe Mathews,Mark Paul,2010 California Crackup is brilliant. It cuts through the familiar tangle of diagnoses and quick-fix solutions to provide a comprehensive and persuasive analysis of California's dysfunctional governmental system. Paul and Mathews have coolly laid out a complicated story, made it readable, sometimes even comedic. It is the best discussion of the issue I've seen in over three decades.--Peter Schrag, author of California: America's High-Stakes Experiment I know of no other work that combines so succinctly and enjoyably a historical summary of California's existing problems with such a sweeping and provocative program of reform.--Ethan Rarick, University of California, Berkeley Mark Paul and Joe Mathews have produced an indispensable guide to California's crisis of governance--and they have done so with humor, scholarship, fairness and storytelling verve. Every Californian should read this book.--Steve Coll, Pulitzer Prize-winning author of Ghost Wars Mark Paul... has a talent for presenting California Big Think stuff in an easily accessible and always readable way...[offering] clear and creative insights on the subject of California's collapse.--CalBuzz Joe Mathews has done an artful, fascinating, and convincing job of connecting the California of today's Schwarzenegger era to the long history that made his rise possible.--James Fallows,The Atlantic Monthly on Mathews' book, The People's Machine

History of California Helen Elliott Bandini,2017-06-22 Chapter I. The Land and the Name Once upon a time, about four hundred years ago, there was published in old Spain a novel which soon became unusually popular. The successful story of those days was one which caught the fancy of the men, was read by them, discussed at their gatherings, and often carried with them when they went to the wars or in search of adventures. This particular story would not interest readers of to-day save for this passage: Know that on the right hand of the Indies there is an island called California, very near the Terrestrial Paradise, and it is peopled by black women who live after the fashion of Amazons. This island is the strongest in the world, with its steep rocks and great cliffs, and there is no metal in the island but gold. There is no doubt that some bold explorer, crossing over from Spain to Mexico and enlisting under the leadership of the gallant Cortez, sailed the unknown South Sea (the Pacific) and gave to the new land discovered by one of Cortez's pilots the name of the golden island in this favorite story. This land, thought to be an island, is now known to us as the peninsula of Lower California. The name first appeared in 1542 on the map of Domingo Castillo, and was soon applied to all the land claimed by Spain from Cape San Lucas up the coast as far north as 44¹/₄, which was probably a little higher than any Spanish explorer had ever sailed. Sir Francis Drake, says the old chronicle, was the first Englishman to sail on the back side of America, and from that time until now California has been considered the back door of the country. This was natural because the first settlements in the United States were along the Atlantic seacoast. The people who came from England kept their faces turned eastward, looking to the Mother Country for help, and watching Europe, and later England herself, as a quarter from which danger might come, as indeed it did in the war of the Revolution and that of 1812. During the last few years, however, various events have happened to change this attitude. Through its success in the late Spanish war the United States gained confidence in its own powers, while the people of the old world began to realize that the young republic of the western hemisphere, since it did not hesitate to make war in the interests of humanity, would not be apt to allow its own rights to be imposed upon. The coming of the Philippine and Hawaiian Islands under the protection of the United States, the Russo-Japanese war, which opened the eyes of the world to the strength of Japan and the wisdom of securing its trade, and the action of the United States in undertaking the building of the Panama Canal, are indications that the Pacific will in the future support a commerce the greatness of which we of to-day cannot estimate. With danger from European interference no longer pressing closely upon the nation, President Roosevelt in 1907 took a decided step in recognizing the importance of the Pacific when he sent to that coast so large a number of the most modern vessels of the navy....
