With the Fire on High Elizabeth Acevedo, 2019-06-01 From New York Times bestselling author of POET X comes a story of a girl with talent, pride and a little bit of magic that keeps her fire burning bright. Ever since she got pregnant during freshman year, Emoni Santiago's life has been about making the tough decisions, doing what has to be done for her daughter and her abuela. The one place she can let all that go is in the kitchen. There, she lets her hands tell her what to cook, listening to her intuition and adding a little something magical every time, turning her food into straight-up goodness. Even though she's always dreamed of working in a kitchen after she graduates, Emoni knows that it's not worth her time to pursue the impossible. But then an opportunity presents itself to not only enrol in a culinary arts class in her high school, but also to travel abroad to Spain for an immersion program. Emoni knows that her decisions post high school have to be practical ones, but despite the rules she's made for her life – and everyone else's rules that she refuses to play by – once Emoni starts cooking, her only choice is to let her talent break free.

Dynamic Resource Allocation in Embedded, High-Performance and Cloud Computing Leando Soares Indrusiak, Piotr Dziuranski, Amit Kumar Singh, 2022-09-01 The availability of many-core computing platforms enables a wide variety of technical solutions for systems across the embedded, high-performance and cloud computing domains. However, large scale manycore systems are notoriously hard to optimise. Choices regarding resource allocation alone can account for wide variability in timeliness and energy dissipation (up to several orders of magnitude). Dynamic Resource Allocation in Embedded, High-Performance and Cloud Computing covers dynamic resource allocation heuristics for manycore systems, aiming to provide appropriate guarantees on performance and energy efficiency. It addresses different types of systems, aiming to harmonise the approaches to dynamic allocation across the complete spectrum between systems with little flexibility and strict real-time guarantees all the way to highly dynamic systems with soft performance requirements. Technical topics presented in the book include: • Load and Resource Models • Admission Control • Feedback-based Allocation and Optimisation • Search-based Allocation Heuristics • Distributed Allocation based on Swarm Intelligence • Value-Based Allocation Each of the topics is illustrated with examples based on realistic computational platforms such as Network-on-Chip manycore processors, grids and private cloud environments.

"Hi, God. I'm Home. Wow!" Beverly Wilkins R.N., 2021-01-07 For the last twenty years of her professional life, Beverly Wilkins has been a grief group facilitator, congregational nurse, and visiting nurse. Her occupation as a trained palliative care nurse brought her into intimate contact with many patients going through their final stage of life. She possesses a serenity and ease of the vocabulary around death and dying because of her complete belief that it really is not the end. In fact, it is more like a birthday following a birthday. We are all born to eventually die to another life, "where there are many mansions. I go and prepare a place for you" (John 14:2 NKJV). This book is a collection of real-life scenarios she has been witness to; she wants to give you calm and peace as you transition to the next stage of light, the only stage that all of us will experience: death. May you

feel the promise that God will be there to meet you when you arrive in your new home. No need for angst at the end. Go in peace and live joyously and confidently knowing your final destination is already reserved. Happy birthday as you breathe your last breath. Enjoy the whoosh. Bev

High Performance Computing Alex Veidenbaum, Kazuki Joe, Hideharu Amano, Hideo Aiso, 2003-11-18 The 5th International Symposium on High Performance Computing (ISHPC-V) was held in Odaiba, Tokyo, Japan, October 20-22, 2003. The symposium was thoughtfully planned, organized, and supported by the ISHPC Organizing Committee and its collaborating organizations. The ISHPC-V program included two keynote speeches, several invited talks, two panel discussions, and technical sessions covering theoretical and applied research topics in high-performance computing and representing both academia and industry. One of the regular sessions highlighted the research results of the ITBL project (IT-based research laboratory, <http://www.itbl.riken.go.jp/>). ITBL is a Japanese national project started in 2001 with the objective of realizing a virtual joint research environment using information technology. ITBL aims to connect 100 supercomputers located in main Japanese scientific research laboratories via high-speed networks. A total of 58 technical contributions from 11 countries were submitted to ISHPC-V. Each paper received at least three peer reviews. After a thorough evaluation process, the program committee selected 14 regular (12-page) papers for presentation at the symposium. In addition, several other papers with favorable reviews were recommended for a poster session presentation. They are also included in the proceedings as short (8-page) papers. The program committee gave a distinguished paper award and a best student paper award to two of the regular papers. The distinguished paper award was given for "Code and Data Transformations for Improving Shared Cache Performance on SMT Processors" by Dimitrios S. Nikolopoulos. The best student paper award was given for "Improving Memory Latency Aware Fetch Policies for SMT Processors" by Francisco J. Cazorla.

On the High Wire George Theoharis, Sharon Dotger, 2015-02-01 The purpose of the work/life balance series is to highlight particular challenges that higher education faculty face as they participate in the demands of the academy and try to prevent those demands from invading their personal lives. On The High Wire looks at a specific subset of university faculty, education faculty with school-aged children, and the specific professional/personal balance these faculty need to find. The title On the High Wire suggests the precarious nature of the "walk" for education faculty who are parents of school-aged children. We know that our identities are central to how we experience the world and how the world reacts to us. This reality is clearly visible in this book. These multiple identities and roles come into conflict at multiple points and in different ways. This book explores these identities and roles through autoethnographic accounts written by varied education faculty in order to make these tensions visible for the field to address.
