*The State of the Black Family* Robert Cherry,2023-03-07 Too many Black Americans live in neighborhoods that are filled with gun violence, dysfunctional and abusive families, and children with deficient academic and behavioral skills. Instead of engaging in an open-minded search for solutions, too many pundits and politicians are content to point their fingers at systemic racism, while dismissing individual effort and traditional measures of merit as part and parcel of a system that is irredeemably broken. In The State of the Black Family, the economist Robert Cherry presents a blueprint for a robust set of policies that can break the cycle of intergenerational poverty and move these families forward by providing direct family support, practical educational approaches, housing policies to reinvigorate neighborhoods, and on-ramps to higher-paying jobs—an approach that enjoyed a broad consensus before leftwing social justice themes hijacked the conversation.

**Between Empowerment and Manipulation** Marijn Sax,2021-09-28 Popular health apps are commercial services. Despite the promise of empowerment they offer, the tensions introduced by their

data-driven, dynamically adjustable digital environments engender a potential for manipulation to which their designers and operators can easily succumb. In this important book, the author develops an ethical framework to evaluate the commercial practices of for-profit health apps, proceeding to a detailed proposal of how to legally address the exploitation, for financial gain, of users' need for health. Focusing on the intricate tracking of users over time, coupled with the possibility to personalize the environment based on knowledge gained from tracking, the book's in-depth analysis of popular for-profit health apps engages with such particulars as the following: the strategic framing of health in health apps; the cultural tendency to presume we are unhealthy until we have proven we are healthy; the key concepts of autonomy, vulnerability, trust, and manipulation; how health apps develop ongoing profitable relationships with users; and use of misleading and aggressive commercial practices. The author argues that the European Union's Unfair Commercial Practices Directive, when informed by ethical considerations, offers promising legal solutions to the manipulation concerns raised by popular for-profit health apps. The book will be welcomed not only for its incisive scrutiny of the health app

phenomenon but also for the light it sheds on the wider problems inherent in the digital society—what digital environments know about their users, how they use that knowledge, and for which purpose. Its progress from an ethical approach to legal solutions will recommend the book to lawyers concerned with business practices, human resources professionals, policymakers, and academics interested in the intersection of ethics and law.

<u>We Are the Nerds</u> Christine Lagorio-Chafkin,2018-10-02 Named a Best Book of 2018 by Fast Company, this is a sharply written and brilliantly reported (Shelf Awareness) look inside Reddit, the wildly popular, often misunderstood website that has changed the culture of the Internet. Reddit hails itself as the front page of the Internet. It's the third most-visited website in the United States -- and yet, millions of Americans have no idea what it is. We Are the Nerds is an engrossing look deep inside this captivating, maddening enterprise, whose army of obsessed users have been credited with everything from solving cold case crimes and spurring tens of millions of dollars in charitable donations to seeding alt-right fury and landing Donald Trump in the White House. We Are the Nerds is a gripping start-up

narrative: the story of how Reddit's founders, Steve Huffman and Alexis Ohanian, rose up from their suburban childhoods to become millionaires and create an icon of the digital age -- before seeing the site engulfed in controversies and nearly losing control of it for good. Based on Christine Lagorio-Chafkin's exclusive access to founders Ohanian and Huffman, We Are the Nerds is also a compelling exploration of the way we all communicate today -- and how we got here. Reddit and its users have become a mirror of the Internet: it has dingy corners, shiny memes, malicious trolls, and a sometimes heart-melting ability to connect people across cultures, oceans, and ideological divides.

**Dark Moon** David Gemmell,2003-12-02 "Gemmell not only knows how to tell a story, he knows how to tell a story you want to hear. He does high adventure as it ought to be done."—Greg Keyes, author of The Briar King One awesome night, the sadistic, seemingly invincible Daroth vanished from the face of the earth. Gone were their cities, their armies, their reigns of terror. Not a trace of this conquering race remained. Until a thousand years later. . . . With the rising of a dark moon above the Great Northern Desert, comes a black tidal wave that sweeps across the land. Suddenly, the desert

vanishes beneath lush fields and forests and a great city glitters in the morning light. From this city reemerges the blood-hungry Daroth, powerful and immortal, immune to spear and sword. They have only one desire: to rid the world of humankind forever. Now the fate of the human race rests on the talents of three heroes: Karis, warrior-woman and strategist; Tarantio, the deadliest swordsman of the age; and Duvodas the Healer, who will learn a gruesome truth. "Gemmell's great reading; the action never lets up; he's several rungs above the good—right into the fabulous!"—Anne McCaffrey

*Journalism and Eyewitness Images* Mette Mortensen,2014-12-17 Building on the vast research conducted on war and media since the 1970s, scholars are now studying the digital transformation of the production of news. Little scholarly attention has been paid, however, to non-professional, eyewitness visuals, even though this genre holds a still greater bearing on the way conflicts are fought, communicated, and covered by the news media. This volume examines the power of new technologies for creating and disseminating images in relation to conflicts. Mortensen presents a theoretical framework and uses case studies to investigate the impact of non-professional images with regard to

essential issues in today's media landscape: including new media technologies and democratic change, the political mobilization and censorship of images, the ethics of spectatorship, and the shifting role of the mainstream news media in the digital age.

**Reincarnation in Tibetan Buddhism** Ruth Gamble,2018-07-09 Reincarnation in Tibetan Buddhism examines how the third Karmapa hierarch, Rangjung Dorjé (1284-1339) transformed reincarnation from a belief into a lasting Tibetan institution. Born the son of an itinerant, low-caste potter, Rangjung Dorjé went on to become a foundational figure in Tibetan Buddhism and a teacher of the last Mongolian

emperor. He became renowned for his contributions to Buddhist philosophy, literature, astrology, medicine, architecture, sacred geography and manuscript production. But, as Ruth Gamble demonstrates, his most important legacy was the transformation of the Karmapa reincarnation lineage to ensure that, after his death, subsequent Karmapas were able to assume power in the religious institutions he had led. The inheritance model of reincarnation instituted by Rangjung Dorjé changed the Tibetan Plateau's power relations, which until that time had been based on family associations, and created a precedent for later reincarnate institutions, including that of the Dalai Lamas. Drawing on Rangjung Dorjé's hitherto un-translated autobiographies and autobiographical songs, this book shows that his reinvention of reincarnation was a self-conscious and multi-faceted project, made possible by Rangjung Dorjé's cultural, social, and political standing and specific historical and geographical circumstances. Exploring this combination of agency and historical coincidence, this is the first full-length study of the development of the reincarnation institution.

**Meme Wars** Joan Donovan,Emily Dreyfuss,Brian Friedberg,2022-09-20 A groundbreaking investigation into the digital underworld, where far-right operatives wage wars against mainstream America, from a masterful trio of experts in media and tech. Memes have long been dismissed as inside jokes with no political importance. Nothing could be further from the truth. Memes are bedrock to the strategy of conspiracists such as Alex Jones, provocateurs like Milo Yiannopoulos, white

nationalists like Nick Fuentes, and tacticians like Roger Stone. While the media and most politicians struggle to harness the organizing power of the internet, the "redpill right" weaponizes memes, pushing conspiracy theories and disinformation into the mainstream to drag people down the rabbit hole. These meme wars stir strong emotions, deepen partisanship, and get people off their keyboards and into the streets--and the steps of the US Capitol. Meme Wars is the first major account of how "Stop the Steal" went from online to real life, from the wires to the weeds. Leading media expert Joan Donovan, PhD, veteran tech journalist Emily Dreyfuss, and cultural ethnographer Brian Friedberg pull back the curtain on the digital war rooms in which a vast collection of antiesablishmentarians bond over hatred of liberal government and media. Together as a motley reactionary army, they use memes and social media to seek out new recruits, spread ideologies, and remake America according to their desires. A political thriller with the substance of a rigorous history, Meme Wars is the astonishing story of how extremists are yanking our culture and politics to the right. And it's a warning that if we fail to recognize these powerful undercurrents, the great meme war for the soul of America will soon be won.
