Rituals and Traditional Events in the Modern World Jennifer Laing, Warwick Frost, 2014-10-30 Many events have evolved over centuries, drawing on local customs and conditions. However, as the world becomes increasingly globalised, traditional events and the identities they support are increasingly being challenged and rituals may be lost. Reacting against this trend towards homogeneity, communities strive to preserve and even recreate their traditional events, which may require rituals to be resurrected or reinvented for a new audience. The aim of this book is to explore the role of traditional events and rituals in the modern world. The 16 chapters cover a range of case studies of the performance of ritual through events, including their historical antecedents and development over time, as well as their role in society, link with identities both seemingly fixed and fluid and their continued relevance. The cases examined are not museum pieces, but rather vibrant festivals and events that continue to persist. Drawing on the power of history and cultural tradition, they are manifestations of heritage, existing in three temporalities: celebrating the past, occurring in the present and aiming to continue into and influence the future. Iconic events including Chinese New Year, Hogmanay and the New Orleans Mardi Gras are examined and examples are drawn from a diverse range of countries such as South Korea, China, Laos, the United States, Scotland, Italy, India and Haiti. This volume provides a deep understanding upon the role of tradition and ritual within events, from a global perspective and will be valuable reading for students, researchers and academics interested in events, heritage and culture.

Intellectual Property and Traditional Cultural Expressions Daphne Zografos, 2010-01-01 'This book performs a great service by drawing together the intellectual property law and experience of a number of countries in relation to the protection of traditional cultural expressions.' Peter Drahos, Australian National University This unique book provides an in-depth analysis of the different methods that have been proposed to protect traditional cultural expressions (TCEs) by using intellectual property rights. Intellectual Property and Traditional Cultural Expressions examines the possibility of protecting TCEs with copyright laws on the one hand, and 'origin related' intellectual property rights, such as trademarks, certification marks, geographical indications and laws against misrepresentation on the other. In particular, it examines which rights are conceptually best suited for the protection of TCEs, and appear more appropriate to meet the range of concerns raised by the holders of that knowledge and policymakers in culturally-rich developing countries. Providing a range of case studies, this book will prove a stimulating read for academics, practitioners, international organisations and policymakers. It will also greatly benefit law or political sciences postgraduate students with an interest in intellectual property and traditional knowledge, TCEs, and development.

Origin and Traditional History of the Wyandotts, and Sketches of Other Indian Tribes of North America (Classic Reprint) Peter Dooyentate Clarke, 2017-09-16 Excerpt from Origin and Traditional History of the Wyandotts, and Sketches of Other Indian Tribes of North America Ask the red man, in his primeval nature, to what part of the world (besides this continent), can he trace his ancestors, or whether he believes, when told by the white man, that he sprung from some of the lost or scattered tribes of Israel, and he will return you this answer: the Great and Good Spirit made us, and placed us here. To the educated Indian, this history may suddenly appear like some phantom from the past, and who may find fault with it. To such, I would say, well then, why don't you write a history of your nation, yourself? About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Protecting Traditional Knowledge Daniel F. Robinson, Ahmed Abdel-Latif, Pedro Roffe, 2017-07-14 This is the first comprehensive review of the Intergovernmental Committee (IGC) of the World Intellectual Property Organization (WIPO) established in 2000. It provides an in-depth consideration of the key thematic areas within WIPO discussions – genetic resources (GRs), traditional knowledge (TK) and traditional cultural expressions (TCEs) through the perspectives of a broad range of experts and stakeholders, including indigenous peoples and local communities. It also looks at how these areas have been treated in a number of forums and settings (including national systems and experiences, and also in trade agreements) and the interface with WIPO discussions. Furthermore, the book analyses the process and the negotiation dynamics since the IGC received a mandate from WIPO members, in 2009, to undertake formal text-based negotiations towards legal instruments for the protection of GR, TK and TCEs. While there has been some progress in these negotiations, important disagreements persist. If these are to be resolved, the adoption of these legal instruments would be a significant development towards resolving key gaps in the modern intellectual property system. In this regard, the book considers the future of the IGC and suggests options which could contribute towards achieving a consensual outcome.

Modernization of Traditional Food Processes and Products Anna McElhatton, Mustapha Missbah El Idrissi, 2016-02-22 This volume of the Trilogy of Traditional Foods, part of the ISEKI Food Series, describes important aspects of the production of foods and beverages from all over the globe. The intention of this volume is to provide readers with an appreciation of how products were initially made, and which factors have shaped their development over time. Some modern products have remained local, while others are commodities that appear in peoples' cabinets all over the world. Modernization of Traditional Food Processes and Products is divided into two sections. The first section focuses on products originating in Europe, while the second section is a collection of products from the rest of the world. Each chapter describes the origin of a particular food or beverage and discusses the changes and the science that led to the modern products found on supermarket shelves. The international List of Contributors, which includes authors from China, Thailand, India, Argentina, New Zealand, and the United Kingdom, attests to the international collaboration for which the ISEKI Food Series is known. The volume is intended for both the practicing food professional and the interested reader.

Traditional Oral Epic John Miles Foley, 1993-10-28 Until now, the emphasis in studies of oral traditional works has been placed on addressing the correspondences among traditions--shared structures of formula, theme, and story-pattern. Professor Foley argues that to give the vast and complex body of oral literature its due, we must first come to terms with the endemic heterogeneity of traditional oral epics, with their individual histories, genres, and documents, as well as both the synchronic and diachronic aspects of their poetics. This book explores the incongruencies among traditions and focuses on the qualities specific to certain oral and oral-derived works.

Traditional, Complementary and Alternative Medicine Gerard Bodeker, Gemma Burford, 2007 This is the first book to address public health issues in traditional, complementary and alternative medicine (TCAM). It presents state-of-the-art reviews of TCAM research in a range of priority public health areas such as malaria and HIV and in such common ailments as skin conditions and orthopedic injury in developing countries. Contributions analyze policy trends in areas such as financing of TCAM and education and training in this field as well as selected case studies of model TCAM projects. Important chapters on research methodology, ethical and safety issues, and intellectual property rights pertaining to traditional medicine are also presented. Public financing for TCAM is a test of the commitment of governments, and the book includes an analysis from the World Health Organization's (WHO) Global Atlas data of the worldwide trends in this area. With safety concerns foremost in the minds of both policy makers and the public, the book offers a global overview of policy and legislative trends in this field as well as an important set of guidelines for pharmacovigilance and TCAM products. Homer's Traditional Art John Miles Foley, 2015-08-10 In recent decades, the evidence for an oral epic tradition in ancient Greece has grown enormously along with our ever-increasing awareness of worldwide oral traditions. John Foley here examines the artistic implications that oral tradition holds for the understanding of the Iliad and Odyssey in order to establish a context for their original performance and modern-day reception. In *Homer's Traditional Art*, Foley addresses three crucially interlocking areas that lead us to a fuller appreciation of the Homeric poems. He first explores the reality of Homer as their actual author, examining historical and comparative evidence to propose that Homer is a legendary and anthropomorphic figure rather than a real-life author. He next presents the poetic tradition as a specialized and highly resonant language bristling with idiomatic implication. Finally, he looks at Homer's overall artistic achievement, showing that it is best evaluated via a poetics aimed specifically at works that emerge from oral tradition. Along the way, Foley offers new perspectives on such topics as characterization and personal interaction in the epics, the nature of Penelope's heroism, the implications of feasting and lament, and the problematic ending of the Odyssey. His comparative references to the South Slavic oral epic open up new vistas on Homer's language, narrative patterning, and identity. *Homer's Traditional Art* represents a disentangling of the interwoven strands of orality, textuality, and verbal art. It shows how we can learn to appreciate how Homer's art succeeds not in spite of the oral tradition in which it was composed but rather through its unique agency.
