Time Eva Hoffman,2010-07-09 Time has always been the great Given, a fact of existence which cannot be denied or wished away; but the character of lived time is changing dramatically. Medical advances extend our longevity, while digital devices compress time into ever briefer units. We can now exist in several time-zones simultaneously, but we suffer from endemic shortages of time. We are working longer hours and blurring the distinctions between labour and leisure. For many, in an inversion of the old adage, time has become more valuable than money. In this look at life's most ineffable element, spanning fields from biology and culture to psychoanalysis and neuroscience, Eva Hoffman asks: are we coming to the end of time as we know it?

Make Time Jake Knapp,John Zeratsky,2018-09-25 From the New York Times bestselling authors of Sprint comes “a unique and engaging read about a proven habit framework [that] readers can apply to each day” (Insider, Best Books to Form New Habits). “If you want to achieve more (without going nuts), read this book.”—Charles Duhigg, author of The Power of Habit Nobody ever looked at an empty calendar and said, The best way to spend this time is by cramming it full of meetings! or got to work in the morning and thought, Today I'll spend hours on Facebook! Yet that's exactly what we do. Why? In a world where information refreshes endlessly and the workday feels like a race to react to other people's priorities faster, frazzled and distracted has become our default position. But what if the exhaustion of constant busyness wasn't mandatory? What if you could step off the hamster wheel and start taking control of your time and attention? That's what this book is about. As creators of Google Ventures' renowned design sprint, Jake and John have helped hundreds of teams solve important problems by changing how they work. Building on the success of these sprints and their experience designing ubiquitous tech products from Gmail to YouTube, they spent years experimenting with their own habits and routines, looking for ways to help people optimize their energy, focus, and time. Now they've packaged the most effective tactics into a four-step daily framework that anyone can use to systematically design their days. Make Time is not a one-size-fits-all formula. Instead, it offers a customizable menu of bite-size tips and strategies that can be tailored to individual habits and lifestyles. Make Time isn't about productivity, or checking off more to-dos. Nor does it propose unrealistic solutions like throwing out your smartphone or swearing off social media. Making time isn't about radically overhauling your lifestyle; it's about making small shifts in your environment to liberate yourself from constant busyness and distraction. A must-read for anyone who has ever thought, If only there were more hours in the day..., Make Time will help you stop passively reacting to the demands of the modern world and start intentionally making time for the things that matter.

Swing Time Zadie Smith,2016-11-15 “Smith’s thrilling cultural insights never overshadow the wholeness of her characters, who are so keenly observed that one feels witness to their lives.” —O, The Oprah Magazine “A sweeping meditation on art, race, and identity that may be [Smith’s] most ambitious work yet.” —Esquire A New York Times bestseller • Finalist for the National Book Critics Circle Award for Fiction • Longlisted for the Man Booker Prize An ambitious, exuberant new novel moving from North West London to West Africa, from the multi-award-winning author of White Teeth and On Beauty. Two brown girls dream of being dancers—but only one, Tracey, has talent. The other has ideas: about rhythm and time, about black bodies and black music, what constitutes a tribe, or makes a person truly free. It's a close but complicated childhood friendship that ends abruptly in their early twenties, never to be revisited, but never quite forgotten, either. Tracey makes it to the chorus line but struggles with adult life, while her friend leaves the old neighborhood behind, traveling the world as an assistant to a famous singer, Aimee, observing close up how the one percent live. But when Aimee develops grand philanthropic ambitions, the story moves from London to West Africa, where diaspora tourists travel back in time to find their roots, young men risk their lives to escape into a different future, the women dance just like Tracey—the same twists, the same shakes—and the origins of a profound inequality are not a matter of distant history, but a present dance to the music of time. Zadie Smith's newest book, Grand Union, published in 2019.

A Geography Of Time Robert N. Levine,2008-08-01 In this engaging and spirited book, eminent social psychologist Robert Levine asks us to explore a dimension of our experience that we take for granted—our perception of time. When we travel to a different country, or even a different city in the United States, we assume that a certain amount of cultural adjustment will be required, whether it's getting used to new food or negotiating a foreign language, adapting to a different standard of living or another currency. In fact, what contributes most to our sense of disorientation is having to adapt to another culture's sense of time. Levine, who has devoted his career to studying time and the pace of life, takes us on an enchanting tour of time through the ages and around the world. As he recounts his unique experiences with humor and deep insight, we travel with him to Brazil, where to be three hours late is perfectly acceptable, and to Japan, where he finds a sense of the long-term that is unheard of in the West. We visit communities in the United States and find that population size affects the pace of life—and even the pace of walking. We travel back in time to ancient Greece to examine early clocks and sundials, then move forward through the centuries to the beginnings of “clock time” during the Industrial Revolution. We learn that there are places in the world today where people still live according to “nature time,” the rhythm of the sun and the seasons, and “event time,” the structuring of time around happenings(when you want to make a late appointment in Burundi, you say, “I'll see you when the cows come in”). Levine raises some fascinating questions. How do we use our time? Are we being ruled by the clock? What is this doing to our cities? To our relationships? To our own bodies and psyches? Are there decisions we have made without conscious choice? Alternative tempos we might prefer? Perhaps, Levine argues, our goal should be to try to live in a “multitemporal” society, one in which we learn to move back and forth among nature time, event time, and clock time. In other words, each of us must chart our own geography of time. If we can do that, we will have achieved temporal prosperity.

Telling Time Jules Older,2020-12-15 Telling time becomes clear and easy for young readers in this bright and lively introduction to measurements of time. From seconds to minutes, hours to days, exploring what time is and discovering why we need to tell time, helps young readers understand more than 'the big hand is on the one and the little hand is on the two'. Megan Halsey’s playful illustrations depict imaginative digital and analog clocks that range in design. With the help of a whole lot of clocks, a dash of humor, and a few familiar circumstances, learning to tell time is a lot of fun. It's about time.

Home Time: Book One Campbell Whyte,2017-08-23 The last school bell has rung and it’s finally HOME TIME! Even though they’re twins, Lilly and David don’t agree on much... except that the last summer before high school is the perfect time for relaxing with friends. But their plans for sleepovers, fantasy games, and romance are thrown out the window when the whole gang falls into a river and wakes up in a village of fantastic creatures.

Time and Media Markets Alan B. Albarran,Angel Arrese Reca,2003-01-30 This edited collection examines time and its relationship to and impact upon media industries, studying how the media industry views time and makes business and economic decisions based on considerations of time. Contributions from an international set of authors analyze time constraints and competition between different media; the quantity and quality of time spent in media consumption, audience and readership time valuation/costing/pricing; and the emergence of new media businesses around individual time management. Specific topics examined in the volume include: * a philosophical look at the concept of time and its application to media markets; * temporal aspects of media distribution for the media industries, and how time affects their activities; * the impact of increasing media industry consolidation and convergence on managerial effectiveness; * approaches to time by CNN and its various cache of news channels, in a managerial context; * the application of niche theory as a framework

to examine competition between the Internet and television; * Internet access in the United Kingdom and Europe, examining the cost of time for online access; * the exchange of time and money in the television market for advertising; and * a summary of research and an agenda for future research on the topic of time's role in the media industry and markets. With its origins in the third World Media Economics conference, held in 2000, Time and Media Markets is a distinctive and important collection appropriate for scholars and advanced students in media management and economics.

Space, Time, and Stuff Frank Arntzenius, Cian Seán Dorr, 2012-01-19 Frank Arntzenius presents a series of radical ideas about the structure of space and time, and establishes a new metaphysical position which holds that the fundamental structure of the physical world is purely geometrical structure. He argues that we should broaden our conceptual horizons and accept that spaces other than spacetime may exist.

Time Travel in Popular Media Matthew Jones, Joan Ormrod, 2015-03-13 In recent years numerous films, television series, comic books, graphic novels and video games have featured time travel narratives, with characters jumping backward, forward and laterally through time. No rules govern time travel in these stories. Some characters move by machine, some by magic, others by unexplained means. Sometime travelers can alter the timeline, while others are prevented from causing temporal aberrations. The fluid forms of imagined time travel have fascinated audiences and prompted debate since at least the 19th century. What is behind our fascination with time travel? What does it mean to be out of one's own era? How do different media tell these stories and what does this reveal about the media's relationship to time? This collection of new essays--the first to address time travel across a range of media--answers these questions by locating time travel narratives within their cultural, historical and philosophical contexts. Texts discussed include Doctor Who, The Terminator, The Georgian House, Save the Date, Back to the Future, Inception, Source Code and others.

Time, Language, and Ontology M. Joshua Mozersky, 2015-01-29 This book brings together, in a novel way, an account of the structure of time with an account of our language and thought about time. Joshua Mozersky argues that it is possible to reconcile the human experience of time, which is centred on the present, with the objective conception of time, according to which all moments are intrinsically alike. He defends a temporally centreless ontology along with a tenseless semantics that is compatible with - and indeed helps to explain the need for - tensed language and thought. This theory of time also, it is argued, helps to elucidate the nature of change and temporal passage, neither of which need be denied nor relegated to the realm of subjective experience only. The book addresses a variety of topics including whether the past and future are real; whether temporal passage is a genuine phenomenon or merely a subjective illusion; how the asymmetry of time is to be understood; the nature of representation; how something can change its properties yet retain its identity; and whether objects are three-dimensional or four-dimensional. It is a wide-ranging examination of recent issues in metaphysics, philosophy of language and the philosophy of science and presents a compelling picture of the relationship of human beings to the spatiotemporal world.

The Book of Times Lesley Alderman, 2013-02-12 An endlessly fascinating, beautifully designed survey of time—how long things take, how long things last, and how we spend our days Our relationship to time is complex and paradoxical: Time stands still. Time also flies. Tomorrow is another day. Yet there's no time like the present. We want to do more in less time, but wish we could slow the clock. And despite all our time-saving devices—iPhones, DVRs, high-speed trains—Americans feel that they have less leisure time than ever. In an era when our time feels fractured and imperiled, The Book of Times encourages readers to ponder time used and time spent. How long does it take to find a new mate, digest a hamburger, or compose a symphony? How much time do we spend daydreaming, texting, and getting ready for work? The book challenges our beliefs and urges us to consider how, and why, some things get faster, some things slow down, and some things never change (the need for seven to eight hours of sleep). Packed with compelling charts, lists, and quizzes, as well as new and intriguing research, The Book of Times is an addictive, browsable, and provocative look at the idea of time from every direction.

Time and the Literary Karen Newman, Jay Clayton, Marianne Hirsch, 2013-09-13 Time and the literary: the immediacy of information technology has supposedly annihilated both. Email, cell phones, satellite broadcasting seem to have ended the long-standing tradition of encoding our experience of time through writing. Paul de Man's seminal essay Literary History and Literary Modernity and newly commissioned essays on everything from the human genome to grammatical tenses argue, however that the literary constantly reconstructs our understanding of time. From eleventh-century France or a science-fiction future, Time and the Literary shows how these two concepts have been and will continue to influence each other.

Time and Action in the Scottish Independence Referendum Michael Gardiner, 2015-07-19 This book describes the recent Scottish independence referendum as the latest incarnation of a contest between two times on one hand, an ideally continuous time beyond determination underpinning financial sovereignty, on the other the interruptions to this ideal continuity inherent in human action.

Change of Time and Change of Measure Ole E Barndorff-Nielsen, Albert Shiryaev, 2015-05-07 Change of Time and Change of Measure provides a comprehensive account of two topics that are of particular significance in both theoretical and applied stochastics: random change of time and change of probability law. Random change of time is key to understanding the nature of various stochastic processes, and gives rise to interesting mathematical results and insights of importance for the modeling and interpretation of empirically observed dynamic processes. Change of probability law is a technique for solving central questions in mathematical finance, and also has a considerable role in insurance mathematics, large deviation theory, and other fields. The book comprehensively collects and integrates results from a number of scattered sources in the literature and discusses the importance of the results relative to the existing literature, particularly with regard to mathematical finance. In this Second Edition a Chapter 13 entitled 'A Wider View' has been added. This outlines some of the developments that have taken place in the area of Change of Time and Change of Measure since the publication of the First Edition. Most of these developments have their root in the study of the

Statistical Theory of Turbulence rather than in Financial Mathematics and Econometrics, and they form part of the new research area termed 'Ambit Stochastics'.
