2048 Marvin Olasky,Dr Brian Williams,Clint Cearley,2009-01-01

2048 Marvin Olasky,2010-09-14 In the year 2048, when scientists have created bumans (human-ape chimeras), a U.S. senator facing a tough reelection campaign against a pornographer has to decide whether to alienate his backers by supporting human rights.

2048 Carlos Alberto,2022-01-19 In 2029, a mysterious billionaire known as Mr. X manages to build the first quantum computer. He calls it the Maitrevac. The computer makes its debut in the Atacama Desert in Chile, where it produces the first totally immersive simulation. Mann, who won the contest to participate in the computer experience, must survive the simulation for fifteen minutes in order to earn a million dollars. During the simulation, an accident in the servers causes every second to double the duration of the previous one. In the real world, only forty-eight seconds elapse, but for Mann, they

represent more than a million years. What happens during this time? Mann's experience will be revealed little by little. Meanwhile, in the real world, Mr. X will exponentiate his intelligence and technology to embark upon a crusade to conquer the earth and the entire universe. Will X succeed in his absolute conquest of objective reality? Before he does, he will first have to face his own interior reality--the same reality Mann has had to face in solitude. This is a science fiction and spiritual development novel. It's a proposal for a new genre--spiritual fiction. It runs about sixty-five thousand words, narrating the story as a series of chronicles that include elements from pop culture. The scientific aspects of the novel develop exponentially and are supported by science. The spiritual development of the characters is based on a few universal nonsectarian principles derived from Hindu and Buddhist philosophies. The characters of the book and some of the crucial scenes have been illustrated using 3-D concept art.

2048 John Kirk Boyd, 2010-04-12 2048 is the story of the most important international social movement in the 21st century: the drafting and implementation of an International Bill of Rights that will be enforceable in the courts of every country on Earth. Written documents have always played a key part in the evolution of human rights--the Code of Hammurabi, the Magna Carta, the Declaration of Independence. In 1948 the United Nations adopted the Universal Declaration of Human Rights, but its provisions are not enforceable so its promise remains unfulfilled. It's time to take

the next step. 2048 shows how we can create an agreement that will truly guarantee global human rights and the rule of law and have it in place by the 100th anniversary of the Universal Declaration—a visionary, audacious, but eminently achievable goal. J. Kirk Boyd outlines the freedoms this new document would protect and describes successful international agreements already in place that can serve as models. But the 2048 Project needs you. “What you do with what you read,” Boyd writes, “is as important as what this book says.” He explains how people in all countries can help shape the document through the 2048 Project website (www.2048.berkeley.edu)—hosted by the University of California, Berkeley, School of Law—and offers practical advice for reaching out and building support step by step so that the International Bill of Rights will become the foundation of an irresistible grassroots movement.

2048 Kirk Boyd, 2011-08-11 '2048 tells the story of the most important social movement in the 21st century: humanity's agreement, in writing, to create a social order that will allow people to live together in peace and prosperity based upon human rights and the rule of law....

2048 Saki Stringfield, 2019-03-15 Set in the not too distant future, the government rules the country through a new form of segregation, creating separation through the classification they were given. A world where democracy has become more of a suggestion than the way of life. Now thirty-four years after subduing their country, the government felt they had once again made America great. Those that saw the New World Order as what it truly was, accepted their

defeat...temporarily. This is the beginning of the tale of Autumn, Eric, Kate, Jacob and Susan as they pick up the banner to become ONE NATION.

Writing and Unwriting (Media) Art History Joasia Krysa,Jussi Parikka,2015-09-15 A critical mapping of the multiplicities of Finnish artist and technology pioneer Erkki Kurenniemi—composer of electronic music, experimental filmmaker, inventor, collector, futurologist. Over the past forty years, Finnish artist and technology pioneer Erkki Kurenniemi (b. 1941) has been a composer of electronic music, experimental filmmaker, computer animator, roboticist, inventor, and futurologist. Kurenniemi is a hybrid—a scientist-humanist-artist. Relatively unknown outside Nordic countries until his 2012 Documenta 13 exhibition, "In 2048," Kurenniemi may at last be achieving international recognition. This book offers an excavation, a critical mapping, and an elaboration

of Kurenniemi's multiplicities. The contributors describe Kurenniemi's enthusiastic, and rather obsessive, recording of everyday life and how this archiving was part of his process; his exploratory artistic practice, with productive failure an inherent part of his method; his relationship to scientific and technological developments in media culture; and his work in electronic and digital music, including his development of automated composition systems and his "video-organ," DIMI-0. A "Visual Archive," a section of interviews with the artist, and a selection of his original writings (translated and published for the first time) further document Kurenniemi's achievements. But the book is not just about one artist in his time; it is about emerging media arts, interfaces, and archival fever in creative practices, read through the lens of Kurenniemi.
