T-34 Wolfgang Fleischer,Anthony Tucker-Jones,2020-11-23 “A wide-ranging and detailed account of the design and development of what was arguably the best tank of World War II.” —Miniature Armoured Fighting Vehicles Association Although the Red Army suffered continual heavy tank losses, the rugged and reliable T-34 was an immense success story and was ultimately instrumental in turning the tide of the war. This photographic history follows the story of this exceptional armored vehicle from its disastrous first action during Operation Barbarossa to its miraculous defense of Moscow, its envelopment of the Axis forces at Stalingrad and victory at Kursk, and finally, the advance to the gates of Warsaw then on to Berlin. Packed with a wealth of images, including rare archive photographs and photographs of surviving examples, this is an extraordinary record of both the tank and its personnel. The accompanying text features an in-depth technical evaluation outlining the differences in the myriad of models, including detailed plans of each type, alongside a gripping breakdown of the tank’s entire operational history. “I totally recommend this book for all who love Russian armor or what was one of the hardest and biggest tank battles during World War 2 at Kursk, superb book.” —Armorama “A thoroughly definitive study of one of the world’s historic engines of war.” —The Army Rumour Service (ARRSE) “This is about as comprehensive as anybody could want in tracing the development, production, operational deployment and technical elements of the T-34 and its derivatives. Whatever you might want to know about the tank is here. Supplemented by drawings, copious images and tables it is a go-to reference book.” —Michael McCarthy, battlefield guide

Q 12:33-34 Steven R. Johnson,2007 This eighth volume in the Documenta Q series is concerned with the reconstruction of the Q text behind Luke 12:33-34 par. Matt 6:19-21. Storing up Treasures in Heaven takes up important wisdom themes such as the proper disposition of wealth, the importance of prioritizing one's thoughts and concerns, and the means to gaining eternal - not temporal - rewards. Parallels are found in literature as early and diverse as the Gospels of Mark, John, and Thomas, the Epistle of James, and Justin's Apology. The International Q Project's presentation of the critical text of Q 12:33-34, together with the exhaustive history of research on which it is based, will considerably enhance research in the Sayings Gospel Q, the historical Jesus, and the ethical concerns of early Jesus movements.

Chicago's 1933-34 World's Fair Samantha Gleisten,2002 You will enter A Century of Progress for the first time perhaps like an explorer-curious and eager-penetrating an amazingly rumored domain in search of treasure. -Official Guide Book to the Fair, 1933 One century after Chicago's incorporation, the city hosted the 1933 World's Fair, which was so successful it was held over for 1934. Aptly named A Century of Progress, the fair confirmed Chicago's emergence as a major American city. Like the phoenix from the ashes, Chicago emerged from its devastating fire of 1871 as one of the most architecturally significant and aesthetically inviting cities in the world. On 424 lakeside acres located on Chicago's near south side, the Fair brought together innovators and inventors from

around the world. Chicagoans hosted visitors from all corners of the globe, commemorating human progress, despite the Great Depression that was devastating the nation's economy.

Thiazole and Its Derivatives Jacques V. Metzger, 2009-09-15 The Chemistry of Heterocyclic Compounds, since its inception, has been recognized as a cornerstone of heterocyclic chemistry. Each volume attempts to discuss all aspects – properties, synthesis, reactions, physiological and industrial significance – of a specific ring system. To keep the series up-to-date, supplementary volumes covering the recent literature on each individual ring system have been published. With all authors are recognized authorities, the Chemistry of Heterocyclic Chemistry is considered worldwide as the indispensable resource for organic, bioorganic, and medicinal chemists.
