This book approaches training from a top-down perspective way you will first learn important concepts of 3D visualization and functionality of 3ds Max before moving into the finer detail of the command structure. By learning how things work and why you might choose one method over another the book will not only teach you where the buttons are, but more importantly how to think about the holistic process of 3D design so that you can then apply the lessons to your own needs. The goal of the learning presented here is to familiarize the new user of 3ds Max with a typical workflow from a production environment from planning to modeling, materials, and lighting, and then applying special effects and compositing techniques for a finished product.
