*A<sub>1</sub>-Algebraic Topology over a Field* Fabien Morel, 2012-07-13 This text deals with A<sub>1</sub>-homotopy theory over a base field, i.e., with the natural homotopy theory associated to the category of smooth varieties over a field in which the affine line is imposed to be contractible. It is a natural sequel to the foundational paper on A<sub>1</sub>-homotopy theory written together with V. Voevodsky. Inspired by classical results in algebraic topology, we present new techniques, new results and applications related to the properties and computations of A<sub>1</sub>-homotopy sheaves, A<sub>1</sub>-homology sheaves, and sheaves with generalized transfers, as well as to algebraic vector bundles over affine smooth varieties.

**Production of labyrinthopeptin A1 with *Actinomadura namibiensis*** Sebastian Tesche, 2020-12-21 The filamentous actinomycete *Actinomadura namibiensis* is the only known producer of labyrinthopeptins, a class of ribosomally synthesized and posttranslationally modified peptides (RiPPs) displaying highly attractive bioactive properties. In order to increase the labyrinthopeptin A1 productivity in shaking flask cultivations of *A. namibiensis*, a new cultivation method called salt-enhanced cultivation was used. Compared to the unsupplemented control, labyrinthopeptin A1 productivity was enhanced the most by addition of 50 mM (NH<sub>4</sub>)<sub>2</sub>SO<sub>4</sub>, reaching a 7-fold higher yield of 325 mg L<sup>-1</sup> within 10 cultivation days. Salt-enhanced cultivation affected growth and product formation mechanisms, cell morphology characteristics and rheological characteristics of cultivation broth. An image analysis method was developed to quantify both the macro-morphology (pellet size and shape) and the micro-morphology (hyphal network structure) of the heterogeneous filamentous biomass in detail. Productivity-related morphological parameters were in particular the size and circularity of pellets and the degree of hyphal interweaving (hyphal network spacing). It was shown that the time-dependent change in morphology linked to the rheological properties of the cultivation broth. The results presented in this work provide new insights into the cultivation aspects of *A. namibiensis* and illustrate the challenges on the way to a comprehensive understanding of the complex relationship between productivity, morphology and rheology in filamentous cultivations.

**β-Casomorphins** Mohammad Raies Ul Haq,2020-03-27 This book compiles the latest research on the A1 and A2 forms of cow milk, and attempts to show a correlation between the type of cow milk consumption and reported incidence of certain diseases (type 1 diabetes mellitus, cardiovascular diseases, sudden infant death syndrome and neurological disorders). Cow milk generally contains two types of β-casein, A1 or A2. The book describes the A1/A2 hypothesis, its foundation and the genetics behind it. It discusses the two forms of milk and why one is considered more harmful than the other. Seeking to provide a balanced view of the milk types, the book's initial chapters highlight the structure, function and physiological activity of β-casomorphins. Subsequent sections describe the health concerns associated with A1 milk, and the various case studies and research surrounding it. In turn, the arguments against the hypothesis put forward by EFSA, American Nutritionists and Truswell are also highlighted. The book does not make any recommendations for dairy consumers; rather, it is a collection of essential data both in favour and against the hypothesis. Further mechanistic studies involving well-designed animal and human trials at the cellular, molecular, biochemical and immunological levels will be needed in order to draw sound conclusions. Overall, the hypothesis is fascinating, and possibly significant. However, verified and authenticated research with reproducible results is needed to make final consumer recommendations. This timely book offers a valuable resource for researchers and students of dairy science, as well as industry experts.

**A1 - The Great North Road ,2020** A1 - The Great North Road' was Paul Graham's first book, published in 1983. Despite the UK having a vibrant photographic scene at the time, there were only handful of monographic books - Chris Killip and Martin Parr had one each - and no dedicated publishers or distributors. Graham had to self-publish A1, but as the first colour book, it had a startling impact on British photography. Uniting the tradition of social documentary with the fresh approach of new colour, A1 - The Great North Road was transformative on photography in the UK and paved the way for a new generation of British colour photographers to emerge, from Nick Waplington to Anna Fox, Richard Billingham to Tom Wood.
