ABB Ltd. Patent Landscape Analysis - January 1, 1994 to December 31, 2013 Reiner E. Jargosch,Joseph Jurich,2014-06-30 The following analysis illustrates the underlying trends and relationships of U.S. issued patents of the subject company. The analysis employs two frequently used patent classification methods: US Patent Classification (UPC) and International Patent Classification (IPC). Aside from assisting patent examiners in determining the field of search for newly submitted patent applications, the two classification methods play a pivotal role in the characterization and analysis of technologies contained in collections of patent data. The analysis also includes the company’s most prolific inventors, top cited patents as well as foreign filings by technology area.

ABB - a financial analysis Stephan Wolter,2003-08-04 Seminar paper from the year 2002 in the subject Business economics - Investment and Finance, grade: 1,0 (VG+), Uppsala University (Business Studies), course: International Financial Managememt, 21 entries in the bibliography, language: English, abstract: The last decades has meant a distinctive shift in the world of business. ABB Group has followed the ongoing trend of globalisation. It has become a truly Multinational Enterprise (MNE); showing in its structure and way of managing operations that it has adopted to the new conditions of global markets and competition. ABB is in the business of creating value – for our customers, shareholders, employees and the communities in which we operate.1 Could such a mission be pursued successfully? Does the international diversification of the company help to achieve its goals? All value creation is essentially financial. This term paper is dedicated to analysis the financials of the ABB Group. My purpose is to see whether the financial position matches the expressed value creating goals. I chose the time period from 1998-2001 for my analysis. Unfortunately the Annual Report 2001 was published merely days before the dead line of this term paper. But nevertheless I tried to include the latest figures in my analysis. 1 ABB Annual Report (2000), p.22

Being Local Worldwide Jacques Bélanger,Christian Berggren,Torsten Björkman,Christoph Kähler,2018-08-06 Fortune called Asea Brown Boveri, the giant multinational corporation created in 1987, the most successful cross-border merger since Royal Dutch linked up with Britain's Shell in 1907. The coming together of two longtime national champions in the electrotechnical industry, Sweden's ASEA and Switzerland's Brown Boveri, marked the birth of a company with truly global aspirations, one whose apparent genius for combining strong central planning with local autonomy for its plants has made it a trendsetter.An international team of researchers assesses the dynamic interplay of the forces of convergence and diversity present in ABB. Together they examine the actual workings of this multinational—in order to learn to what degree the corporate strategies are achieved in its plants. Based on a multilevel organizational study, their book compares seven plants in six countries on three continents.

Berenike and the Ancient Maritime Spice Route Steven E. Sidebotham,2019-05-07 The legendary overland silk road was not the only way to reach Asia for ancient travelers from the Mediterranean. During the Roman Empire’s heyday, equally important maritime routes reached from the Egyptian Red Sea across the Indian Ocean. The ancient city of Berenike, located approximately 500 miles south of today’s Suez Canal, was a significant port among these conduits. In this book, Steven E. Sidebotham, the archaeologist who excavated Berenike, uncovers the role the city played in the regional, local, and “global” economies during the eight centuries of its existence. Sidebotham analyzes many of the artifacts, botanical and faunal remains, and hundreds of the texts he and his team found in excavations, providing a profoundly intimate glimpse of the people who lived, worked, and died in this emporium between the classical Mediterranean world and Asia.

Die Fakultät für Mathematik und Geoinformation/The Faculty of Mathematics and Geoinformation Michael Drmota,Reinhard Winkler,2016-07-11 The Faculty of Mathematics and Geoinformation of the TU Wien has existed as such since the division of the early, very large Faculty of Technical Sciences in 2004. It provides its own study programmes in both subjects, as well as ensuring the mathematical and geometrical basic education of the students of all seven other faculties. The faculty also conducts research in broad and highly crucial focal areas. The current volume is part of a comprehensive commemorative series published in 2015 for the bicentennial memorial of the TU Wien providing information on the research activities, teaching tasks, and history of the Faculty of Mathematics and Geoinformation, in particular over the last 50 years. Special attention has been paid to the exceptional scientific achievements of faculty members.
