To understand the concepts and rules in AIPSC, questions are posed on various concepts and rules. This is done chapter by chapter, and will permit the student of AIPSC to readily progress through the book, to locate the key words in the question, to read the relevant paragraphs, to analyze and to understand each concept or rule. In some cases, if the answer to the question is not clear, it may become clearer as the student progresses through subsequent questions. References and answers are also provided at the end of the workbook, but students are urged to do their own research and analysis and to use the references and answers as a last resort.

A Great Meeting Needs Great Members!* Colette Collier Trohan,2014-10-09 This is the most useful tool ever developed to empower members. It can be read in an hour or two, and used for years. After the initial joy of being elected or appointed to a board, committee, or delegate assembly fades, the need for concise and accurate information about that role begins. Rules for both Robert's Rules of Order Newly Revised and American Institute of Parliamentarians Standard Code of Parliamentary Procedure are included. The table of contents makes it easy to find information quickly. There are two sections: Meetings Explained and Motions Explained. Meetings Explained walks you through a meeting from call to order to adjourn. Motions Explained gives virtually every motion that can come up in a meeting, arranged by its purpose rather than by its parliamentary classification. This information can be applied to any type of meeting from the smallest board or committee to the largest house of delegates. A Great Meeting Needs Great Members will take anyone from being intimidated to being effective.

A Great Meeting Needs a Great Chair Colette Collier Trohan,2014-09-01 This is the most useful book ever developed to help anyone run a great meeting. It can be read in an hour or two and used for years. Rules for both Robert's Rules of Order Newly Revised and American Institute of Parliamentarians Standard Code of Parliamentary Procedure are included. The table of contents makes it easy to find information quickly. There are two sections: Meetings Explained and Motions Explained. Meetings Explained walks you through a meeting from call to order to adjourn. Motions Explained gives virtually every motion that can come up in a meeting, arranged by its purpose rather than by its parliamentary classification. This information can be applied to any type of meeting from the smallest board or committee to the largest house of delegates. A Great Meeting Needs a Great Chair is the closest thing you'll find to a magic gavel.

A Great Meeting Needs a Great Secretary! Colette Collier Trohan,2015-08-25 This book is dedicated to everyone who has ever tried to keep up with the rapid-fire actions of a busy meeting while making sure nothing got lost, ignored, folded, spindled, or mutilated. Where rules are quoted, they are substantially in conformance with the rules contained in Robert's Rules of Order Newly Revised, eleventh edition (Da Capo Press 2011), also called RONR, and American Institute of Parliamentarians Standard Code of Parliamentary Procedure (McGraw Hill, 2012), also called AIPSC. However, for clarity and ease of use by the average member, some of the more detailed points of these books have been omitted. For complex situations, we suggest that the reader refer to the association's specific parliamentary authority. Additional information has been included that is based on the author's experience with boards of directors and organizations throughout the country.

Cellular Therapies for Retinal Disease Steven D. Schwartz,Aaron Nagiel,Robert Lanza,2017-06-20 This book familiarizes the reader with the current landscape of cell-based therapies for the treatment of retinal disease, including diseases that affect the choriocapillaris, retinal pigment epithelium, photoreceptors, and retinal ganglion cells. Instead of utilizing a disease-centric approach to the topic, this book—edited by two world-renowned stem cell scientists—focuses on strategies for developing and transplanting the cells. This includes the creation of replacement cells, cell-based neuroprotection, and in vitro disease modeling and testing. The final chapters briefly review parallel approaches that do not directly utilize cellular transplantation. The use of cellular transplantation to treat retinal disease has recently become a viable and exciting therapeutic approach. The visibility of the retina and its laminar cellular architecture render it an ideal organ for the development of surgically delivered cellular therapies. Having an in-depth understanding of the current state of cell therapy for the eye is an essential first step toward utilizing similar approaches in other organs. Ophthalmologists, translational clinician-scientists, stem cell scientists, and researchers interested in eye disease will find Cellular Therapies for Retinal Disease: A Strategic Approach essential reading and it is also suitable for workshops or courses at the undergraduate or Ph.D. level.

Therapies for Retinal Degeneration Enrique J de la Rosa,Thomas G Cotter,2018-09-13 Sight loss and blindness is a very prevalent cause of disability. Retinal diseases leading to visual loss affect many people worldwide and the search for adequate drugs remains a challenge and an important area of interest in the drug discovery field. This book addresses approaches to the treatment of retinal diseases, targeting common processes and components. Despite their causative origins, which comprise genetic dystrophies, age-related degenerations, as well as pathologies associated with other diseases, a neurodegenerative component appears, sooner or later, in the course of the disease. As is the case for most neurodegenerative diseases, the available treatments are far from satisfactory. The aim of this book is to highlight research and drug development efforts in targeting such common processes as a potential path to provide treatments to the millions of affected people.

Ontology Learning and Population: Bridging the Gap Between Text and Knowledge P. Buitelaar,P. Cimiano,2008-01-31 The promise of the Semantic Web is that future web pages will be annotated not only with bright colors and fancy fonts as they are now, but with annotation extracted from large domain ontologies that specify, to a computer in a way that it can exploit, what information is contained on the given web page. The presence of this information will allow software agents to examine pages and to make decisions about content as humans are able to do now. The classic method of building an ontology is to gather a committee of experts in the domain to be modeled by the ontology, and to have this committee agree on which concepts cover the domain, on which terms describe which concepts, on what relations exist between each concept and what the possible attributes of each concept are. All ontology learning systems begin with an ontology structure, which may just be an empty logical structure, and a collection of texts in the domain to be modeled. An ontology learning system can be seen as an interplay between three things: an existing ontology, a collection of texts, and lexical syntactic patterns. The Semantic Web will only be a reality if we can create structured, unambiguous ontologies that model domain knowledge that computers can handle. The creation of vast arrays of such ontologies, to be used to mark-up web pages for the Semantic Web, can only be accomplished by computer tools that can extract and build large parts of these ontologies automatically. This book provides the state-of-art of many automatic extraction and modeling techniques for ontology building. The maturation of these techniques will lead to the creation of the Semantic Web.

A Religion with Gaps? Andrew Ratanya Mukaria,2022-04-21 The challenges facing contemporary Ìembe Christianity are similar to those that the young Greco-Roman Christians faced. For the Greco-Roman, the challenge was trying to appropriate the gospel in an understandable and authentic way for the locals as far as Christianity was concerned. In Ìembe, the church has to try to integrate some cultural values within Christianity so that the Ìembe would view it as an Ìembe religion and as part of the universal religion instead of a foreign one. This book mainly focuses on the Ìembe community, a sub-group of the Meru tribe in Kenya. It centres on understanding how Ìembe spirituality has been a challenge to Christianity, especially as far as healing, health and wholeness, calamities, and witchcraft are concerned. It is also in this perspective that the office of traditional healers is studied. To reach an understanding, integration and interpretation, the author presents views and perspectives from the local context. Andrew presents a missiological Christological view with Jesus as Muwe par excellence. This is an aspect whereby Jesus takes the central position as a healer in the Ìembe community. If restoration and healing are God's activities, with an eschatological impact, then God is the healer, and the church is an element of the Missio Dei. Healing is, therefore, a missio ecclesiae activity. The church in Christ has taken the central stage as Muwe par excellence, a principle that churches in Ìembe should dwell on, teach and practice.
