APB: Baby Julie Miller,2016-06-01 USA TODAY bestselling author Julie Miller's new series launches with a lawman and social worker who team up to safeguard a baby After a near-fatal shootout at his sister's wedding, third-generation lawman Niall Watson comes home to a baby in distress. The abandoned newborn in his neighbor's apartment sends the Kansas City PD criminologist into rescue mode once again. Social worker Lucy McKane will do whatever it takes to protect the infant boy entrusted to her care. The tall, sexy ME next door may be clueless about her feelings for him, but Niall's the only one who can keep them safe. As a vengeful killer targets them, desire draws Lucy and Niall dangerously closer. Together, can they find justice and safeguard their newly created family?

Apb: Shots Fired Officer Down Frank N. Houston,2018-06-29 This book is a tribute to all law enforcement officers who put their lives on the line daily for the public good. This is a thankless job. Police officers are not looking for a pat on the back or any reward for doing their job. They are simply looking for support from the very public they serve. This book takes you from initial training at the academy, through the jail process, and into the mean streets of the city and counties of Southern California. This book even goes further into search-and-rescue missions, extraditions, and the court process. APB: Officer Down Shots Fired is based on actual events in fictional form. Incidents like this occur across the country and even in foreign countries. Our brothers and sisters in law enforcement throughout the world understand each other. No other profession is as challenging as law enforcement. No other profession is as rewarding as law enforcement. There is no greater love than to lay down your life for another (John 15:13).

APB: Artists against Police Brutality Bill Campbell,Jason Rodriguez,John Jennings,2015-10-28 An incredibly unique comic book benefit project featuring comic shorts, pin-ups, short essays, and flash fiction, the proceeds of which will be going to the Innocence Project We've all seen the pictures: a six-year-old Ruby Bridges being escorted by U.S. marshals on her first day at an all-white, New Orleans school in 1960; a police dog attacking a demonstrator in Birmingham; fire hoses turned on protesters; Martin Luther King Jr. addressing a crowd on the National Mall. These pictures were printed in papers, flashed across television screens, and helped to change the laws of this nation, but not necessarily all of the attitudes. Similarly, we've seen the pictures of Michael Brown lying face down in a pool of his own blood for hours; protesters with their hands up, facing down militarized policemen. There are videos of Eric Garner choked to death, John Crawford III shot down in Walmart for carrying a toy gun, and 12-year-old Tamir Rice gunned down in broad daylight for the same reason. APB: Artists Against Police Brutality is a benefit comic book anthology that focuses on hot-button issues including police brutality, the justice system, and civil rights, with one primary goal: show pictures and tell stories that get people talking. The proceeds will go to the Innocence Project, an organization dedicated to exonerating wrongfully convicted people.

Involvements of TRP Channels and Oxidative Stress in Pain Jose A. Pariente,Cristina Carrasco,Mustafa Naziroglu,Laszlo Pecze,2018-10-05 Undoubtedly, pain conditions the quality of life of millions of people worldwide suffering a wide range of diseases. Major research efforts are being made by the international scientific community to determine the mechanisms underlying nociception. Growing evidence points out a complex network including oxidative and nitrosative stress, inflammatory response and cation signaling. In this sense, transient receptor potential (TRP) channels have attracted researchers' attention. Expression levels are very different in tissues and cells mediating a myriad of processes in our organism. At the neurological level, it has been observed that the expression levels of four TRP channels (TRPA1, TRPM2, TRPV1, and TRPV4) are high in neurons related to nociception, including dorsal root ganglion and trigeminal ganglia neurons. For this reason, this research field promises to shed light on this intricate matrix linking oxidative stress, calcium signaling (via TRP channels), and inflammatory signals in different pain modalities, including neuropathic pain and chemotherapy-induced peripheral pain. In such a way, all this intense research activity will enable us to design individual and rational treatment strategies for pain relief, such as the use of molecular neurosurgery.
