**Rail Transit Station Area Development:** Richard T  
Green,David M. James,2016-09-16 A study of past  
and prospective business development around rail  
transit stations in the Washington DC area.  
Washington has one of the very few new and  
extensive rail transit systems in America,  
although expectations of transit system-induced  
revitalization in this area have not uniformly  
been met. This book develops an econometric model  
of local development (LOCDEV) around major public  
investments, applies it to the existing Washington  
transit system, and uses it to forecast future  
development levels around new stations. The book  
includes a user's guide to the LOCDEV model and  
concludes with reflections on modelling and  
forecasting.

**Perimeter, Area, and Volume** David A. Adler, 2014-01-24 Grab your jumbo popcorn—you're invited to the premiere of a 3-D movie, all about those three dimensions! Trusted math picture book duo David A. Adler and Ed Miller tackle the differences between two- and three-dimensional objects in their signature bright and kid-friendly way. Explaining length, width, and height-- and all the different ways we represent those figures-- Adler shows how changing the dimensions of an object affects its size. . . . with some help from a cast of funny, friendly movie monsters. Explaining key vocabulary in simple text and offering numerous concrete examples and sample math problems with included solutions, *Perimeter, Area, and Volume* is a perfect introduction to two- and three-dimensional geometry. The star-studded cast of monsters will help you calculate the perimeter of the set, the area of the movie screen, and the volume of your box of popcorn. Learning about dimensions has never been so entertaining!

**Managing Conflicts in Protected Areas** Connie Lewis, 1996 This handbook was written for staff working in protected areas around the world (including parks, wilderness areas, research areas, and other types of protected landscapes) who encounter conflicts of all kinds. The Handbook can also be a resource for other interested parties who want to play a constructive role in protected area conflicts. A simple framework is offered and some strategies for responding to different types of conflicts in protected areas are explored. Case studies, which are the heart of the Handbook, describe a variety of both short and long term approaches for dealing with conflict.
