University Technology Transfer Tom Hockaday, 2020-04-07

Tackling a complex topic in clear language, the book reveals the impressive scale of patenting, licensing, and spin-out company creation while demonstrating that university technology transfer is a commercial activity with benefits that go well beyond the opportunity to make money.

Dictionary of Statuses within EU Law Antonio

Bartolini, Roberto Cippitani, Valentina Colcelli, 2019-01-05 This Dictionary analyses the ways in which the statuses of European citizens are profoundly affected by EU law. The study of one's particular status (as a worker, consumer, family member, citizen, etc.) helps to reconsider the legal notions concerning an individual's status at the EU level. The Dictionary includes a foreword by Evgeni Tanchev, Advocate General at the Court of Justice of the European Union, which illustrates some interesting features of the Court's case law on statuses. The Dictionary's core is composed of 79 chapters, published in alphabetical order. Each brief chapter analyses how the individual status was conditioned or created by contemporary EU law, or how the process of European integration modified the traditional juridical definition of the respective status. The Dictionary provides answers to the following questions: Has the process of European integration modified the traditional juridical definition of individual status? Has the concept of legal status now acquired a new function? What role has EU law played in developing a new modern function for the concept of individual status? Are the selection of a specific individual status by EU law and the proliferation of such statuses, which is synonymous with the creation of new privileges, collectively undermining the goal of achieving

substantive equality between EU citizens? Does this constitute a return to the past? Under EU law, is it possible to create a uniform definition of the legal status of the person, over and above the definition that is provided by a given Member State's legal system?

University Technology Transfer Shiri M. Breznitz, Henry Etzkowitz, 2017-09-19 Universities have become essential players in the generation of knowledge and innovation. Through the commercialization of technology, they have developed the ability to influence regional economic growth. By examining different commercialization models this book analyses technology transfer at universities as part of a national and regional system. It provides insight as to why certain models work better than others, and reaffirms that technology transfer programs must be linked to their regional and commercial environments. Using a global perspective on technology commercialization, this book divides the discussion between developed and developing countries according to the level of university commercialization capability. Critical cases as well as country reports examine the policies and culture of university involvement in economic development, relationships between university and industry, and the commercialization of technology first developed at universities. In addition, each chapter provides examples from specific universities in each country from a regional, national, and international comparative perspective. This book includes articles by leading practitioners as well as researchers and will be highly relevant to all those with an interest in innovation studies, organizational studies, regional economics, higher education, public policy and business entrepreneurship.

Managing Sustainable Performance and Governance in Higher Education Institutions Federico Cosenz, 2022-05-23 The fast-changing evolutionary process of global Higher Education systems systematically poses new challenges related to the appearance of innovative elements that lead academic

governing bodies to question current managerial structures and methods. Due to this, theory and practice have gathered multiple contributions and experiences to support and further develop this evolutionary pathway during the past decades. Global competitiveness, economic and social growth are driven worldwide by knowledge and innovation. In this context, Higher Education Institutions play a crucial role as they primarily contribute to knowledge transfer and development and, as a result, foster regional development, employment, and economic wealth. The relevance of this role leads Universities to explore alternative solutions for managing their performance according to a sustainable perspective. This book draws on this flourishing debate on Higher Education policy and management and investigates an innovative systemic perspective to design and implement sustainable performance management systems for academic institutions. The conditions for the success of Universities, the critical issues underlying the creation of academic value, the dynamic complexity characterizing academic governance settings, the pluralistic audience of stakeholders and related expectations, the causal interplays between organizational performance variables, represent some of the central themes around which this work is developed. More specifically, the book suggests and discusses the adoption of a Dynamic Performance Management approach to frame the inherent organizational complexity of Higher Education Institutions, thus supporting a strategic learning perspective to design and implement relevant performance measures. This approach originates from the combination between conventional performance management and System Dynamics modeling. Many research and practice contributions prove that this methodological combination can boost the understanding and interpretation of value creation processes by identifying and exploring the causal connections amongst strategic resource allocation and consumption, corresponding performance drivers,

emerging outputs, and outcomes. To test the effectiveness of this approach in University settings, a wide range of examples is offered in each book chapter. This allows readers to explore the advantages, limitations, and practical implications of adopting Dynamic Performance Management in Higher Education Institutions, as well as guide academic decision-makers towards a more robust approach to design and implement strategic management mechanisms in Universities.

Research Handbook on Intellectual Property and Technology Transfer Jacob H. Rooksby, 2020-02-28 Written by leading experts from across the world, this Handbook expertly places intellectual property issues in technology transfer into their historical and political context whilst also exploring and framing the development of these intersecting domains for innovative universities in the present and the future.

Capacity Building in Technology Transfer Massimiliano Granieri, Andrea Basso, 2018-07-12 This book tells the story of capacity building in Europe with respect to technology transfer offices and organizations (TTOs). The traditional underdevelopment of technology markets in Europe has often been explained in terms of lack of capacity and skills among technology transfer professionals, both as individuals and as part of TTOs. Because of the severe consequences for economic development and industrial growth, this situation has been repeatedly addressed by policy makers, until the European Commission, within the framework of Horizon 2020, decided to initiate a pan-European pilot project on capacity building. This book builds on the experience gained through that project and tries to reconnect it with current scholarly works on technology management by focusing on the new methodology developed. In addition, the authors present a series of case studies that may be used as a benchmark and as examples that will help high-potential TTOs to improve their performance. Both practitioners and researchers will benefit from the holistic perspective of the

book, which goes beyond the traditional approach and attempts to reconcile the theory and practice of organizing for technology transfer.

The Handbook of European Intellectual Property

Management Adam Jolly, 2015-07-03 When managed well, IP can become the most enduring form of competitive advantage, creating streams of revenue well into the future. But for many in Europe, IP can still seem complicated to acquire, expensive to maintain and hard to enforce. Drawing on a wide range of expert contributions, *The Handbook of European Intellectual Property Management* is a practical and easy-to-follow account of how IP comes into play at various stages of ventures and delivers commercial success and real competitive advantage. Drawing out the commercial implications of the changes that are happening within Europe's framework for innovation, like the arrival of the unitary patent, this Handbook reviews how EU programmes such as Horizon 2020, the Innovation Union and the European Research Area are measuring performance against a target of creating more growth from IP ventures. In parallel, the contributors discuss the new terms on which leading players in business and research are looking to engage partners in sourcing ideas and fast-tracking innovation. Everywhere IP policies are being re-written to encourage open innovation and to source knowledge from wherever it may best be found. For those looking to take an innovation, a design, or a brand into the market, this handbook discusses the options in putting the right idea into the right format, highlighting challenges such as: - how to design an IP strategy - how to capture and secure IP - how to capitalise on new technologies - how to combine different types of IP - whether to adopt a national, European or global focus - how to engage in partnerships and competitions - how to source ideas from the research base - how to retain exclusivity within open innovation - which model to adopt in reaching the market - how to negotiate IP within contracts - how put a value on IP - how to raise funds

with IP - how to resolve disputes

Harnessing Public Research for Innovation in the 21st

Century Anthony Arundel, Suma Athreye, Sacha Wunsch-Vincent, 2021-03-04 Universities and public research institutes play a key role in enabling the application of scientific breakthroughs and innovations in the marketplace. Many countries – developed and developing alike – have implemented national strategies to support the application or commercialization of knowledge produced by public research organizations. Universities and public research institutes have introduced practices to support these activities, for instance by including knowledge transfer to promote innovation as a core part of their mission. As a result, a vital question for policymakers is how to improve the efficiency of these knowledge transfer practices to help maximize innovation-driven growth and/or to seek practical solutions to critical societal challenges. This book aims to develop a conceptual framework to evaluate knowledge transfer practices and outcomes; to improve knowledge transfer metrics, surveys and evaluation frameworks; and to generate findings on what works and what does not, and to propose related policy lessons. This book is also available as Open Access.

Fulfilling the Promise of Technology Transfer Koichi Hishida, 2013-03-01 Universities and research institutes are increasingly expected to contribute to society by creating innovation from the returns of their research results and the establishment of new technologies. Toward that goal, Keio University in Japan held an international symposium titled “Fulfilling the Promise of Technology Transfer: Fostering Innovation for the Benefit of Society.” From that symposium the following contents are included in the present volume: 1) A showcase of ideas and case studies to promote future creation of innovation by universities and research institutes worldwide, including information on the R&D value chain, licensing, income

generation, start-ups and mechanisms to encourage entrepreneurship, and the changing role of universities in fostering innovation. 2) Introduction of active research projects that aim to productize successful research results on an international level. For example, the book includes results of research on stem cell technologies and regenerative medicine as well as the realization and application of polymer photonics and the development of the core technology of polymer photonics. 3) Case studies from the U.K. in developing industry-academia collaboration with various business partners ranging from start-ups and spinout companies to large enterprises. 4) Reports of the achievements of the technological transfer activities at Keio University supported by the 5-year public fund, with suggestions for future prospects.

Transferencia de tecnología universitaria Tom

Hockaday, 2023-02-17 Este no es un libro académico; es una narración personal, no de mi vida, ni de mi trayectoria, ni de cómo creo que usted debe vivir su vida, sino de mi trabajo en transferencia de tecnología universitaria. Es un libro de observaciones, opiniones y sugerencias acerca de este tema y de cómo establecer y operar oficinas de transferencia de tecnología universitaria. Es una introducción, un panorama general, una guía, un recuento. El libro es para personas que trabajan en las oficinas de transferencia de tecnología universitaria y para quienes quieren conocer lo que esto implica. Esto incluye a investigadores, directivos y administradores de universidades, inversionistas, y gente que desempeña alguna función en empresas o gobierno. Algunas secciones parecen casi un libro de texto, otras son más discursivas. El libro da cuenta de qué es la transferencia tecnológica y cómo llevarla a cabo.

Regional Innovation Impact of Universities Robert

Tijssen, John Edwards, Koen Jonkers, 2021-05-28 Driven by European Union policy challenges, this cutting-edge book focuses upon the Regional Innovation Impact (RII) of universities, to

analyse the socioeconomic impact that universities in Europe have on their hometowns, metropolitan areas and regions.

World Scientific Reference On Innovation, The (In 4 Volumes)

Siegel Donald S, 2018-03-20 This multi-volume set covers a wide range of topics on innovation, which are all of great interest to academics, policymakers, university administrators, state and regional economic development officials, and students. Two unique features of the volume are the large body of global evidence on innovation presented and its consideration of the following timely and important topics in innovation: cybersecurity, open innovation, the globalization of R&D, and university technology transfer. Innovation is a topic of great importance in many fields in business administration, such as management, strategy, operations management, finance, marketing, and accounting, as well as in numerous social science disciplines, including economics, sociology, political science, and psychology. This volume fully reflects such interdisciplinary approaches. Volume 1 provides extensive global evidence on university technology transfer and innovation partnerships. Volume 2 is focused on the managerial and public policy implications of the globalization of R&D. Volume 3 presents state-of-the-art theoretical and empirical evidence on open innovation. Volume 4 is a comprehensive analysis of cybersecurity. This set is essential reading for those who wish to have a comprehensive understanding of the antecedents and consequences of innovation.

The Routledge Companion to Innovation Management Jin Chen, Alexander Brem, Eric Viardot, Poh Kam Wong, 2019-02-14 Innovation contributes to corporate competitiveness, economic performance and environmental sustainability. In the Internet era, innovation intelligence is transferred across borders and languages at an unprecedented rate, yet the ability to benefit from it seems to become more divergent among different corporations and countries. How much an organization can

benefit from innovation largely depends on how well innovation is managed in it. Thus, there is a discernible increase in interest in the study of innovation management. This handbook provides a comprehensive guide to this subject. The handbook introduces the basic framework of innovation and innovation management. It also presents innovation management from the perspectives of strategy, organization and resource, as well as institution and culture. The book's comprehensive coverage on all areas of innovation management makes this a very useful reference for anyone interested in the subject.

Supporting Innovation Through National R&D

Programs: Emerging Research and Opportunities Porath, Amiram, 2017-12-01 With the importance of knowledge as the basis for economic development, the issue of Research & Development (R&D) as a source of knowledge and of innovation is under discussion. One of the major activities in support of economic development includes setting a network of national support R&D programs. *Supporting Innovation Through National R&D Programs: Emerging Research and Opportunities* is a critical scholarly resource that examines the basic rationale for national support programs and the financial, legal, and strategic aspects that are involved. Featuring coverage on a broad range of topics such as origins of conflict, translational research, and competing trends, this book is geared towards professors, students, researchers, developers, and other industry experts.

Technology Transfer Mark Anderson, Victor Woroner, 2020-03-20 Covers the laws surrounding commercial transactions that involve the development, use of commercialisation of technology and associated intellectual property rights. Types of transactions that fall within this category are research and development contracts and intellectual property licences and these form the main focus of the book. Written by experts and describing the many different areas of law that affect technology agreements such as IP, contract law,

competition law and tax, this is the leading guide to this complex area of law. The new Fourth Edition has been brought completely up to date including: - Coverage of EU Horizon 2020 replacing Framework 7 funding scheme - General Data Protection Regulation (GDPR) - Updates in line with the Charities Act 2011 - New section on different types of standard agreements available (Lambert, NIHR, EU consortium agreements) - New material dealing with variety of relevant patent legislation: Unitary Patent and Unified Patents Court, the Intellectual Property Act 2014, Legislative Reform (Patents) Order 2014, Patents (Supplementary Protection Certificates) Regulations) 2014 - New material on the EU Trade Secrets Directive - Coverage of Regulations No 536/2014 of the European Parliament and of the Council of 16 April 2014 on clinical trials on medicinal products for human use, and repealing Directive 2001/20/EC - Addition of research exception (new section 22A) from freedom of information from 1 October 2014 (Freedom of Information Act 2014) - Coverage of Technology Transfer Regulation, 316/2014 and related guidelines
