The Changing Scale of American Agriculture John Fraser Hart, 2003 Few Americans know much about contemporary farming, which has evolved dramatically over the past few decades. In *The Changing Scale of American Agriculture*, the award-winning geographer and landscape historian John Fraser Hart describes the transformation of farming from the mid-twentieth century, when small family farms were still viable, to the present, when a farm must sell at least \$250,000 of farm products each year to provide an acceptable level of living for a family. The increased scale of agriculture has outmoded the Jeffersonian ideal of small, self-sufficient farms. In the past farmers kept a variety of livestock and grew several crops, but modern family farms have become highly specialized in producing a single type of livestock or one or two crops. As farms have become larger and more specialized, their number has declined. Hart contends that modern family farms need to become integrated into tightly orchestrated food-supply chains in order to thrive, and these complex new organizations of large-scale production require managerial skills of the highest order. According to Hart, this trend is not only inevitable, but it is beneficial, because it produces the food American consumers want to buy at prices they can afford. Although Hart provides the statistics and clear analysis such a study requires, his book focuses on interviews with farmers: those who have shifted from mixed crop-and-livestock farming to cash-grain farming in the Midwest agricultural heartland; beef, dairy, chicken, egg, turkey, and hog producers around the periphery of the heartland; and specialty crop producers on the East and West Coasts. These invaluable case studies bring the reader into direct personal contact with the entrepreneurs who are changing American agriculture. Hart believes that modern large-scale farmers have been criticized unfairly, and *The Changing Scale of American Agriculture*, the result of decades of research, is his attempt to tell their side of the story.

Enduring Seeds Gary Paul Nabhan, 2002-10 As biological diversity continues to shrink at an alarming rate, the loss of plant species poses a threat seemingly less visible than the loss of animals but in many ways more critical. In this book, one of America's leading ethnobotanists warns about our loss of natural vegetation and plant diversity while providing insights into traditional Native agricultural practices in the Americas. Gary Paul Nabhan here reveals the rich diversity of plants found in tropical forests and their contribution to modern crops, then tells how this diversity is being lost to agriculture and lumbering. He then relates local parables of Native American agriculture—from wild rice in the Great Lakes region to wild gourds in Florida—that convey the urgency of this situation and demonstrate the need for saving the seeds of endangered plants. Nabhan stresses the need for maintaining a wide gene pool, not only for the survival of these species but also for the preservation

of genetic strains that can help scientists breed more resilient varieties of other plants. *Enduring Seeds* is a book that no one concerned with our environment can afford to ignore. It clearly shows us that, as agribusiness increasingly limits the food on our table, a richer harvest can be had by preserving ancient ways. This edition features a new foreword by Miguel Altieri, one of today's leading spokesmen for sustainable agriculture and the preservation of indigenous farming methods.

The Grand Old Man of Purdue University and Indiana Agriculture Fred Whitford,Andrew G. Martin,2005 This book recounts William Latta's far-reaching influence on agriculture at the university, throughout Indiana, and on a national level. Recognized as the Father of the School of Agriculture and of Extension at Purdue, Latta was an early and tireless promoter of the university and what it could do for the people of the state. From developing the four-year agriculture program, to conducting practical agricultural research prior to the creation of Purdue's Agricultural Experiment Station, to leading Purdue's agricultural outreach efforts to bring the university to the people, Latta's contributions are still evident in Purdue's modern-day agricultural programs. Latta's story traces the history of agriculture at Purdue, showing agriculturists, historians, and the Purdue community where we've been and the foundation upon which we continue to build today's teaching, research, and Extension programs.--BOOK JACKET.
