The Unicorn Project Gene Kim,2019-11-26 The Phoenix Project wowed over a half-million readers. Now comes the Wall Street Journal Bestselling The Unicorn Project! “The Unicorn Project is amazing, and I loved it 100 times more than The Phoenix Project...”—FERNANDO CORNAGO, Senior Director Platform Engineering, Adidas “Gene Kim does a masterful job of showing how ... the efforts of many create lasting business advantages for all.”—DR. STEVEN SPEAR, author of The High-Velocity Edge, Sr. Lecturer at MIT, and principal of HVE LLC. “The Unicorn Project is so clever, so good, so crazy enlightening!”--CORNELIA DAVIS, Vice President Of Technology at Pivotal Software, Inc., Author of Cloud Native Patterns This highly anticipated follow-up to the bestselling title The Phoenix Project takes another look at Parts Unlimited, this time from the perspective of software development. In The Unicorn Project, we follow Maxine, a senior lead developer and architect, as she is exiled to the Phoenix Project, to the horror of her friends and colleagues, as punishment for contributing to a payroll outage. She tries to survive in what feels like a heartless and uncaring bureaucracy and to work within a system where no one can get anything done without endless committees, paperwork, and approvals. One day, she is approached by a ragtag bunch of misfits who say they want to overthrow the existing order, to liberate developers, to bring joy back to technology work, and to enable the business to win in a time of digital disruption. To her surprise, she finds herself drawn ever further into this movement, eventually becoming one of the leaders of the Rebellion, which puts her in

the crosshairs of some familiar and very dangerous enemies. The Age of Software is here, and another mass extinction event looms—this is a story about rebel developers and business leaders working together, racing against time to innovate, survive, and thrive in a time of unprecedented uncertainty...and opportunity. “The Unicorn Project provides insanely useful insights on how to improve your technology business.”—DOMINICA DEGRANDIS, author of *Making Work Visible* and Director of Digital Transformation at Tasktop ——— “My goal in writing *The Unicorn Project* was to explore and reveal the necessary but invisible structures required to make developers (and all engineers) productive, and reveal the devastating effects of technical debt and complexity. I hope this book can create common ground for technology and business leaders to leave the past behind, and co-create a better future together.”—Gene Kim, November 2019

China’s Use of Military Force in Foreign Affairs Markus B. Liegl, 2017-03-16 This book explains why China has resorted to the use of large-scale military force in foreign affairs. How will China use its growing military might in coming crisis and existing conflicts? This book contributes to the current debate on the future of the Asia-Pacific region by examining why China has resorted to using military force in the past. Utilizing fresh theoretical insights on the causes of interstate war and

employing a sophisticated methodological framework, the book provides detailed analyses of China's intervention in the Korean War, the Sino-Indian War, China's border clashes with the Soviet Union and the Sino-Vietnamese War. It argues that China did not employ military force in these wars for the sake of national security or because of material issues under contestation, as frequently claimed. Rather, the book's findings strongly suggest that considerations about China's international status and relative standing are the principal reasons for China's decision to engage in military force in these instances. When reflecting the study's central insight back onto China's contemporary territorial conflicts and problematic bilateral relationships, it is argued that the People's Republic is still a status-seeking and thus highly status-sensitive actor. As a result, China's status ambitions should be very carefully observed and well taken into account when interacting with the PRC. This book will be of much interest to students of Chinese foreign policy, Asian politics, military and strategic studies and IR in general.

Hitler's Island War Julie Peakman,2017-12-05 *Highly Commended by the British Records Association for the 2019 Janette Harley Prize* In September 1943, at the height of World War II, the Aegean island of Leros became the site of the most pivotal battle of the Dodecanese campaign as the British tried, in vain, to retain control of the island. Over the course of two short months - from 15 September 1943 to 17 November 1943 - almost 1500 men lost their lives and hundreds more ended up in Prisoner-of-War camps. In this book, Julie Peakman, a modern-day resident of Leros, brings to life the story of the men caught up in the battle based on first-hand interviews and written accounts including diaries, letters and journals. She tells of the preparations of the soldiers leading up to the

battle, the desperate hand-to-hand fighting, and the suffering endured from continual bombings. She also shows the extent of the men's despair at the allied surrender, the many subsequent daring escapes as well as the terrible years of incarceration for those who were captured and imprisoned. Many of the heart-rending accounts of the battle are told here for the first time, providing a unique eyewitness take on this forgotten corner of World War II.

Mao Jung Chang, Jon Halliday, 2011-10-05 The most authoritative life of the Chinese leader ever written, *Mao: The Unknown Story* is based on a decade of research, and on interviews with many of Mao's close circle in China who have never talked before — and with virtually everyone outside China who had significant dealings with him. It is full of startling revelations, exploding the myth of the Long March, and showing a completely unknown Mao: he was not driven by idealism or ideology; his intimate and intricate relationship with Stalin went back to the 1920s, ultimately bringing him to power; he welcomed Japanese occupation of much of China; and he schemed, poisoned, and blackmailed to get his way. After Mao conquered China in 1949, his secret goal was to dominate the world. In chasing this dream he caused the deaths of 38 million people in the greatest famine in history. In all, well over 70 million Chinese perished under Mao's rule — in peacetime.

The Brilliant Disaster Jim Rasenberger, 2012-04-10 A recounting of the Bay of Pigs Crisis drawing upon the author's father's connection to the events as they played out.

Rising Sun, Falling Skies Jeffrey Cox, 2014-03-20 Following the attack on Pearl Harbor, the Japanese offensive in the Far East seemed unstoppable. Allied forces engaged in a futile attempt to halt their rapid advance, culminating in the massed fleet of American, British, Dutch, and Australian forces (ABDA) clashing with the Japanese at the battle of the Java Sea – the first major sea battle of World War II in the Pacific. But, in a campaign crippled by poor leadership and disastrous decisions,

the Allied response was catastrophic, losing their largest warships and their tenuous toe-hold in the south Pacific within the first 72 hours of the battle. This defeat left ground troops cut off from reinforcement and supply, with obsolete equipment, no defense against endless Japanese air attacks, and with no chance of retreat. However, although command decisions were to condemn the Allies to defeat, the Allied goal was never an outright victory, simply a delaying action. Facing a relentless and thoroughly vicious enemy, the combined forces responded not by running or surrendering, but by defiantly holding on in a struggle that was as much a test of character, bravery, and determination as it was a test of arms, ultimately costing the Allies ten vessels and the lives of 2,100 brave sailors. In *Rising Sun, Falling Skies*, Jeffrey Cox examines the events and evidence surrounding the Java Sea Campaign, reconstructing battles that in hindsight were all but hopeless and revealing where fatal mistakes and missed opportunities condemned the Allied forces in an insightful and compelling study of the largely overlooked clash in the Java Sea.

Scapegoat Martin Stephen, 2014-08-30 *Scapegoat: The Death of Prince of Wales and Repulse* is a radical new account of one of Britain's greatest naval disasters. Making full use of modern research and unrivalled access to private family papers, it suggests that Admiral Sir Tom Phillips, the commander of the so-called 'Force Z', was made the scapegoat for a battle in which he was blameless, and that Winston Churchill, the Admiralty and chronic failures in ship design and Intelligence were what sank the ships. The book also shows what a very close run thing the sinkings were, and how Japanese success depended on them having luck on their side. 'Scapegoat' is a convincing attempt to right a wrong that has been allowed to stand for over 70 years, as well as a prime illustration of the way in which the Establishment always protects itself first.

Blunders and Disasters at Sea David Blackmore, 2004-01-20 As any sailor knows, life at sea is

hazardous under even normal circumstances. In times of war with an enemy intent on killing and sinking you it is infinitely more so. David Blackmore has researched 100 extreme cases over the span of history and written graphic descriptions covering the background, the events and the tragic consequences. Many were the result of enemy action, others (too many) straight human error and the remainder were caused by act of God, not least the weather.

The War Conspiracy Peter Dale Scott, 2013-09-01 Peter Dale Scott examines the many ways in which war policy has been driven by “accidents” and other events in the field, in some cases despite moves toward peace that were directed by presidents. This book explores the “deep politics” that exerts a profound but too-little-understood effect on national policy outside the control of traditional democratic processes. An important analysis into the causes of war and the long-lasting effects that major events in American history can have on foreign and military policies, *The War Conspiracy* is a must-read book for students of American history and foreign policy, and anyone interested in the ways that domestic tragedies can be used to manipulate the country’s direction. First published in 1972, this edition of *The War Conspiracy* is fully updated for the twenty-first century and includes two lengthy additional essays, one on the transition in Vietnam policy in the wake of the Kennedy assassination, and the other discussing the many parallels between that 1963 event and the attacks of 9/11.

A Pattern for Joint Operations Daniel R. Mortensen, 1987 CMH Pub. 93-7. This study in the Historical Analysis Series discusses the the origin and development of American close air support doctrine and practice in World War II. It explains how the Tunisian campaign demonstrated the need for tactical changes and close cooperation between the staffs and forces in joint and combined forces. The struggle of ground and air leaders to define and construct a command and control system, and

ultimately to allocate and commit precious air resources to requisite ground missions, has as many lessons today as it did more than forty years ago. L.C. card 87-19335.
