**Optimization and Data Science: Trends and Applications** Adriano Masone,Veronica Dal Sasso,Valentina Morandi,2022-01-01 This proceedings volume collects contributions from the 5th AIRO Young Workshop and AIRO PhD School 2021 joint event on "Optimization and Data Science: Trends and Applications", held online, from February 8 to 12, 2021. The joint event was organized by AIROYoung representatives and the Operations Research Group of the Department of Electrical Engineering and Information Technology of the University "Federico II" of Naples. The selected contributions represent the state-of-the-art knowledge related to different branches of research, such as data science, machine learning and combinatorial optimization. Therefore, this book is primarily addressed to researchers and PhD students of the operations research community. However, due to its interdisciplinary content, it will be of high interest for other closely related research communities. Moreover, this volume not only presents theoretical results but also covers real applications in computer science, engineering, economics, healthcare, and logistics, making it interesting for practitioners facing complex decision-making problems in these areas.

**Value Politics in Japan and Europe** François Foret,Airo Hino,2021-12-24 This book explains the increasing importance of value politics in Europe and Japan, shedding light on various arenas: social values; parties, elections and politics; public action, private sector and law; identity politics and religion; media and public spheres. It analyses how, against different but commensurable backgrounds, the rise of value politics alters (or not) the political game, for which purposes and with which effects. Applying both qualitative and quantitative methods from a wide range of primary and secondary sources, the comparison is organized by joining skills from experts of Japan and Europe and by systematizing a common analytical framework for the two cases. As such, it presents a revealing and unique analysis of the changing relationship between values and political behaviour in the two polities. Beyond the comparison, it also documents the opportunities and challenges underlying the interactions between Europe, Japan and the rest of the world; and the competition/combination between different versions of modernity. This book is of key interest to scholars and students of European studies and politics, Asian politics/studies, Japanese studies/politics and more broadly to comparative politics, sociology, cultural/media

studies, and economics.

**New Challenger Parties in Western Europe** Airo Hino,2012-06-12 This book provides a systematic and comparative account of the rise of 'new challenger parties' across Western Europe. It analyses how parties that challenge the conventional party system by addressing issues neglected by existing parties can succeed and fail. Systematically comparing 229 elections since 1950 across 15 European democracies, including the United Kingdom, France, Germany, Italy, the Benelux and Scandinavian countries, this book questions why new challenger parties are more successful in some countries than others, and analyses the conditions that determine their emergence and subsequent success or failure. As one of the first systematic and comparative examinations of new challenger parties, this book looks at both new politics parties and extreme-right parties, and the structures to aid their emergence at the time of an election. Identifying two distinctive stages of party development, the author adopts a 'double-hurdle' model involving, first, the chances of emergence, and second, sustained success. This framework, in combination with a wide-range of empirical data, provides for an innovative and insightful analysis of a neglected topic. New Challenger Parties in Western Europe will be of interest to students and scholars of government, comparative politics and political parties.

**Animal Models for the Study of Human Disease** Airo Tsubura,Katsuhiko Yoshizawa,Maki Kuro,2013-05-29 Retinitis pigmentosa (RP) is a group of inherited neurodegenerative diseases in humans characterized by the loss of photoreceptor cells leading to reduction of the peripheral visual field (known as tunnel vision) and eventually to blindness. N-Methyl-N-nitrosourea (MNU) is an alkylating agent that exhibits its toxicity by transferring its methyl group to nucleobases in nucleic acids. A single systemic administration of MNU causes retinal degeneration in various animal species. The retinal degeneration is highly reproducible, and the photoreceptor cell loss occurs within a week when a suitable dose of MNU is administered. Photoreceptor cell loss occurs via apoptosis, which resembles human RP. Decreased levels of basal autophagy concomitantly occur during the course of apoptosis progression. The time-course progression of the disease, the molecular mechanisms of the disease, and the therapeutic trials against MNU-induced photoreceptor cell apoptosis are described.

**The Anthropology of Love and Anger** Joanna Overing,Alan Passes,2002-01-04 The Anthropology of Love and Anger questions

the very foundations of western sociological thought. In their examination of indigenous peoples from across the South American continent, the contributors to this volume have come to realise that western thought does not possess the vocabulary to define even the fundamentals of indigenous thought and practice. The dualisms of public and private, political and domestic, individual and collective, even male and female, in which western anthropology was founded cannot legitimately be applied to peoples whose 'sociality' is based on an 'aesthetics of community'. For indigenous people success is measured by the extent to which conviviality, (all that is peaceful, harmonious and sociable) has been attained. Yet conviviality is not just reliant on love and good but instead on an even balance between all that is constructive, love, and all that is destructive, anger. With case studies from across the South American region, ranging from the (so-called) fierce Yanomami of Venezuela and Brazil to the Enxet of Paraguay, and with discussions on topics from the efficacy of laughter, the role of language, anger as a marker of love and even homesickness, *The Anthropology of Love and Anger* is a seminal, fascinating work which should be read by all students and academics in the post-colonial world.

Aksel Fredrik Airo: Taipumaton kenraali Martti Turtola, 2022-01-17 Kenraaliluutnantti Aksel Fredrik Airo (1898–1985) oli merkittävässä asemassa toisen maailmansodan aikaan. Airo oli läheinen työtoveri marsalkka Mannerheimin kanssa, ja Mannerheim korotti Airon päämajoitusmestariksi. Päämajoitusmestarin virka oli todella vastuullinen – siinä vastattiin muun muassa sotatoimien suunnittelusta. Mutta kuka Airo oikein oli? Mikä on tarina hänen takanaan? Aksel Fredrik Airo: Taipumaton kenraali sukeltaa Airon historiaan ja rakentaa elävän kuvan tästä merkittävästä sotilaasta. Valtiotieteiden tohtori Martti Turtola (s.1947) on kirjoittanut useita historiaan liittyviä tietokirjoja. Hän työskenteli Suomen Viron-instituutin johtajana vuosina 2001–2005.

**Towards a Knowledge-Aware AI** A. Dimou, S. Neumaier, T. Pellegrini, 2022-09-29 Semantic systems lie at the heart of modern computing, interlinking with areas as diverse as AI, data science, knowledge discovery and management, big data analytics, e-commerce, enterprise search, technical documentation, document management, business intelligence, enterprise vocabulary management, machine learning, logic programming, content engineering, social computing, and the Semantic Web. This book presents the proceedings of SEMANTiCS 2022, the 18th International Conference on Semantic Systems, held as a hybrid event – live in Vienna, Austria and online – from 12 to 15 September 2022. The SEMANTiCS conference is an annual meeting place for the professionals and researchers who make semantic computing work, who understand its benefits and encounter its limitations, and is attended by information managers, IT architects, software engineers, and researchers from organizations ranging from research facilities and NPOs, through public administrations to the largest companies in the world. The theme and subtitle of the 2022 conference was Towards A Knowledge-Aware AI, and the book contains 15 papers, selected on the basis of quality, impact and scientific merit following a rigorous review process which resulted in an acceptance rate of 29%. The book is divided into four chapters: semantics in data quality, standards and protection; representation learning and reasoning for downstream AI tasks; ontology development; and learning over complementary knowledge. Providing an overview of emerging trends and topics in the wide area of semantic computing, the book will be of interest to anyone involved in the development and deployment of computer technology and AI systems.
