Guide for Implementing Or Enhancing an Endangered Missing Advisory (EMA) Paul Murphy, 2011-06 There are some cases of missing children that do not meet the threshold for the issuance of an AMBER Alert. The same concern applies to missing persons older than 18, who fall outside AMBER Alert's purview. The EMA was crafted in 2005 to fill this gap. This report describes how a community can establish a task force to create an EMA plan, which creates voluntary partnerships to recover missing persons who do not fit the AMBER Alert criteria but who may be in danger. EMAs help law enforcement notify the general public that someone is missing and ultimately save lives. This guide provides directions for developing, activating, and sustaining an EMA plan and includes sample plans and press releases. A print on demand report.

SSL and TLS: Theory and Practice, Third Edition Rolf Oppliger, 2023-06-30 Now in its Third Edition, this completely revised and updated reference provides a thorough and comprehensive introduction into the SSL, TLS, and DTLS protocols, explaining all the details and technical subtleties and showing how the current design helps mitigate the attacks that have made press headlines in the past. The book tells the complete story of TLS, from its earliest incarnation (SSL 1.0 in 1994), all the way up to and including TLS 1.3. Detailed descriptions of each protocol version give you a full understanding of why the protocol looked like it did, and why it now looks like it does. You will get a clear, detailed introduction to TLS 1.3 and understand the broader context of how TLS works with firewall and network middleboxes, as well the key topic of public infrastructures and their role in securing TLS. You will also find similar details on DTLS, a close sibling of TLS that is designed to operate over UDP instead of TCP. The book helps you fully understand the rationale behind the design of the SSL, TLS, and DTLS protocols and all of its extensions. It also gives you an

in-depth and accessible breakdown of the many vulnerabilities in earlier versions of TLS, thereby more fully equipping you to properly configure and use the protocols in the field and protect against specific (network-based) attacks. With its thorough discussion of widely deployed network security technology, coupled with its practical applications you can utilize today, this is a must-have book for network security practitioners and software/web application developers at all levels.

Recent Advances in Intrusion Detection Engin Kirda, Somesh Jha, Davide Balzarotti, 2009-09-30 On behalf of the Program Committee, it is our pleasure to present the proceedings of the 12th International Symposium on Recent Advances in Intrusion Detection systems (RAID 2009), which took place in Saint-Malo, France, during September 23-25. As in the past, the symposium brought together leading researchers and practitioners from academia, government, and industry to discuss intrusion detection research and practice. There were six main sessions presenting full research papers on anomaly and specification-based approaches, malware detection and prevention, network and host intrusion detection and prevention, intrusion detection for mobile devices, and high-performance intrusion detection. Furthermore, there was a poster session on emerging research areas and case studies. The RAID 2009 Program Committee received 59 full paper submissions from all over the world. All submissions were carefully reviewed by independent reviewers on the basis of space, topic, technical assessment, and overall balance. The final selection took place at the Program Committee meeting on May 21 in Oakland, California. In all, 17 papers were selected for presentation and publication in the conference proceedings. As a continued feature, the symposium accepted submissions for poster presentations which have been published as extended abstracts, reporting early-stage research, demonstration of applications, or case studies. Thirty posters were submitted for a numerical review by an independent, three-person sub-

committee of the Program Committee based on novelty, description, and evaluation. The sub-committee recommended the acceptance of 16 of these posters for presentation and publication. The success of RAID 2009 depended on the joint effort of many people.

Chinese Politics and Foreign Policy under Xi Jinping Arthur S. Ding, Jagannath P. Panda, 2020-11-23 This book focuses on China's future under Xi Jinping's authoritarian leadership by examining various facets of the political, economic, social and foreign policy trajectories of contemporary China. It assesses Xi Jinping's power dynamic as the 'core' leader of the Communist Party of China (CPC) and analyses the impact of Xi's signature domestic policies which demonstrate his political authority within the domestic sphere. Moreover, the book presents Xi's pro-active, assertive and action-oriented outlook as a foundation for China's diplomacy in the 'new era'. Bringing together an international set of experts in the field who explore critical facets of China under Xi Jinping that deeply influence the regional as well as the global order, the book investigates the impact of Chinese initiatives such as the grand Belt and Road Initiative (BRI), the Asian Infrastructure Investment Bank (AIIB) and the BRICS New Development Bank (NDB). Importantly, the book illustrates US-China relations and outlines how this relationship will intensify in the post-COVID-19 era, which is poised to be one of the biggest challenges and turning points of the 'Asian Century'. Offering a timely insight into China's future and the trajectory of Xi Jinping's consolidation of power, this book will be of interest to academics in the fields of China Studies, Asian and International Politics and International Relations.

The Risk of Discrimination in the Digital Market Sara Tommasi, 2023-11-29 The book starts with an analysis of what is new in the Digital Services Act. The aim is to see whether this new Regulation is appropriate both for not halting technological innovation and for addressing the risks that technological innovation poses to society and to the people who use digital services. The focal point is the risk of discrimination as people are often helpless in the face of the potential discriminations in the digital services sector. In particular, the book analyses how the Digital Services Act can make a concrete contribution to the protection against discrimination. To this end, it focuses on the responsibility of digital service providers and the fact that discrimination may also depend on the way in which algorithms and artificial intelligence systems are used. Therefore, a comparison is made between the Digital Services Act and the proposed Artificial Intelligence Act. The comparison discloses that the risk-based approach is the common thread followed by the EU in regulating the digital market. The book elaborates also on the practical implications of the risk-based approach. Highlighting advantages and limitations leading the author to conclude that the risk-based approach is the way forward only if the differences between risk and danger, the limits of

law, and the limits of the tendency to humanise artificial intelligence systems are considered. With specific reference to the risk of discrimination, the need for a systemic and multi-level approach is highlighted, which reinforces the contribution that can be made not only by the Digital Services Act, but also by more general and cross-cutting legislation as those on data protection and unfair commercial practices.

Vascular Imaging of the Central Nervous System Joana Ramalho, Mauricio Castillo, 2014-03-31 The first book-length reference to thoroughly describe diagnostic and therapeutic advances in the development of vascular radiology over the last decade The last ten years has seen vascular imaging of the central nervous system (CNS) evolve from fairly crude, invasive procedures to more advanced imaging methods that are safer, faster, and more precise—with computed tomographic (CT) and magnetic resonance (MR) imaging methods playing a special role in these advances. *Vascular Imaging of the Central Nervous System* is the first full-length reference text that shows radiologists—especially neuroradiologists—how to optimize the use of the many techniques available in order to increase the sensitivity and specificity of vascular imaging, thereby improving the diagnosis and treatment of individual patients. Each chapter is formatted carefully and divided into two essential parts: The first part describes the physical principles underlying each imaging technique, along potential associated artifacts and pitfalls; the second part addresses clinical applications and novel applications of each method. With a strong focus on the clinical application of each modality or technique in CNS radiology, this book provides in-depth chapter coverage of: • Ultrasound Vascular Imaging (UVI) • Computed Tomography Angiography (CTA) • Magnetic Resonance Vascular imaging (MRV) • Digital subtraction angiography (DSA) • Brain perfusion techniques: CT and MRI • Plaque imaging • Intravascular

imaging • Pediatric vascular imaging Along with numerous illustrations and case studies, Vascular Imaging of the Central Nervous System: Physical Principles, Clinical Applications, and Emerging Techniques is an important book for those faced with choosing from the wide range of choices available for clinical practice.

Staff Guidance Note on the Application of the Joint Fund-Bank Debt Sustainability Framework for Low-Income Countries International Monetary Fund,2010-01-25 The objective of the joint Bank-Fund debt sustainability framework for low-income countries is to support LICs in their efforts to achieve their development goals without creating future debt problems. Countries that have received debt relief under the Heavily Indebted Poor Countries (HIPC) Initiative and the Multilateral Debt Relief Initiative (MDRI) need to be kept on a sustainable track. Under the framework, country DSAs are prepared jointly by Bank and Fund staff, with close collaboration between the two staffs on the design of the macroeconomic baseline, alternative scenarios, the debt distress rating, and the drafting of the write-up

Kenya International Monetary Fund,2004-01-08 This report of the Debt Sustainability Analysis (DSA) indicates that the envisaged strategy of a partial substitution of domestic debt by increased inflows of external grants and concessional loans, as well as a rescheduling of external debt by the Paris and London Clubs, would facilitate the achievement of debt sustainability. The DSA also confirms that such a debt rescheduling could constitute an appropriate exit strategy for Kenya. The DSA also shows that debt sustainability would improve significantly with a concessional rescheduling, particularly under the Naples terms.
