**Department of Homeland Security Bioterrorism Risk Assessment** National Research Council,Division on Earth and Life Studies,Board on Life Sciences,Division on Engineering and Physical Sciences,Board on Mathematical Sciences and Their Applications,Committee on Methodological Improvements to the Department of Homeland Security's Biological Agent Risk Analysis,2009-01-03  
The mission of Department of Homeland Security Bioterrorism Risk Assessment: A Call for Change, the book published in December 2008, is to independently and scientifically review the methodology that led to the 2006 Department of Homeland Security report, Bioterrorism Risk Assessment (BTRA) and provide a foundation for future updates. This book identifies a number of fundamental concerns with the BTRA of 2006, ranging from mathematical and statistical mistakes that have corrupted results, to unnecessarily complicated probability models and models with fidelity far exceeding existing data, to more basic questions about how terrorist behavior should be modeled. Rather than merely criticizing what was done in the BTRA of 2006, this new NRC book consults outside experts and collects a number of proposed alternatives that could improve DHS's ability to assess potential terrorist behavior as a key element of risk-informed decision making, and it explains these alternatives in the specific context of the BTRA and the bioterrorism threat.

**Brand New** G. Michael Maddock, Luisa C. Uriarte, Paul B. Brown, 2011-05-03 Brand New's revolutionary innovation process is a proven road map you can put to work immediately to create successful new products, services, and business models. Written by leading innovation practitioners, and the coauthor of the bestseller Customers for Life, the authors of this tightly focused, highly entertaining book have nailed the issue perfectly when it comes to successfully introducing anything new. Research shows people like new products and services. Indeed they go out of their way to try to find them. Yet companies are truly terrible at providing new products and services that meet these customers' needs. Why are companies so bad at giving customers what they want? Because they lack a simple proven process that makes sure innovation occurs efficiently time after time. No one knows this better than Mike Maddock and his team at Maddock Douglas, the Agency of Innovation,™ which has worked closely with more than a quarter of Fortune 100. To solve the innovation paradox, Maddock explains the process his team has used to help the world's best companies and shows you how to Find needs and opportunity in the marketplace Come up with significant market insights Create compelling communication (using the actual words your customers use) to convince people to try your new creation What has worked for some of the world's most successful companies, when it comes to innovation, will work for you. Start putting the lessons of Brand New to work for you...before the competition does.

**Family Types** Selah Cambias, 2013-04 Family Types: A Guide to Better Parenting with Personality Types is a catalog of 57 different personality types, or archetypes, in children. It includes a description of each type, the best and the most challenging attributes, and advice to help parents bring out the best in their child. This award-winning book is based on over ten years of studying archetypes, recording the behaviors that come with each one, and discovering the most effective way to handle the challenges. Once parents learn the true meaning behind their child's challenging behavior, the relationship is immediately transformed into a happier and more peaceful existence. Family Types takes the parent on a treasure hunt to discover what types each child was born with. Armed with that insight, the parent can create a new response to the most challenging behaviors. Instead of trying to make the child fit into a mold, or follow a one-size-fits-all approach, the parent can see the deeper meaning behind the child's behavior, and set up their life to fulfill that purpose. For example: - The child that desires material possessions may simply have a need to feel loved, and giving to others is a healthier way to fulfill that need. - The bossy child often has leadership abilities, but he just hasn't developed the skills yet to lead in a healthy way. - The child known as the Class Clown can spot hypocrisy anywhere, and will do whatever it takes to expose it. - The child that seems quiet and lonely may have a Hermit type that needs to be alone at times to re-energize herself. Why do some parents and children seem to constantly butt heads? Often, it's because they don't truly understand each

other. Now parents can shift a high-conflict or troublesome relationship with their child into one that creates mutual respect and calm. What *Family Types* brings to the parent is a personalized strategy for each type. Once a parent discovers the types of her child, the individual plan is created. It's a simple, yet concise, plan that is naturally implemented. Easing personality conflicts requires only a change in perspective and a plan for a different response when the challenges arise. Very quickly the parent-child conflicts switch from tug-o-war to being on the same team. In May 2013 just one month after publication, *Family Types* won an IPPY Silver Award in Psychology and Mental Health. It was also listed as an Independent Publishing Notable for 2013. *Family Types* is like no other parenting book because once a child is seen, understood and accepted for exactly who they are, they feel loved. And that is transformational.

**Clued In** Lewis Carbone, 2010-03-31 Good, bad, or indifferent, every customer has an experience with your company and the products or services you provide. But few businesses really manage that customer experience, so they lose the chance to transform customers into lifetime customers. In this book, Lou Carbone shows exactly how to engineer world-class customer experiences, one clue at a time. Carbone draws on the latest neuroscientific research to show how customers transform physical and emotional sensations into powerful perceptions of your business... perceptions that crystallize into attitudes that dictate everything from satisfaction to loyalty. And he explains how to assess and audit existing customer experiences, design and implement new ones... and steward them over time, to ensure that they remain outstanding, no matter how your customers change.

**Universal Meta Data Models** David Marco, Michael Jennings, 2004-03-25 The heart of the book provides the complete set of models that will support most of an organization's core business functions, including universal meta models for enterprise-wide systems, business meta data and data stewardship, portfolio management, business rules, and XML, messaging, and transactions. Developers can directly adapt these models to their own businesses, saving countless hours of development time. Building effective meta data repositories is complicated and time-consuming, and few IT departments have the necessary expertise to do it right—which is why this book is sure to find a ready audience. Begins with a quick overview of the Meta Data Repository Environment and the business uses of meta data, then goes on to describe the technical architecture followed by the detailed models.

**Big Little Breakthroughs** Josh Linkner, 2021-04-20 The pressure to generate big ideas can feel overwhelming. We know that bold innovations are critical in these disruptive and competitive times, but when it comes to breakthrough thinking, we often freeze up. Instead of shooting for a \$10-billion payday or a Nobel Prize, the most prolific innovators focus on Big Little Breakthroughs—small creative acts that unlock massive rewards over time. By cultivating daily micro-innovations, individuals and organizations are better equipped to tackle tough challenges and seize transformational opportunities. How did a convicted drug dealer launch and scale a massively successful fitness company? What core mindset drove LEGO to become the largest toy company in the world? How did a Pakistani couple challenge the global athletic shoe industry? What simple habits led Lady Gaga, Banksy, and Lin-Manuel Miranda to their remarkable success? Big Little Breakthroughs isn't just for propeller-head inventors, fancy-pants CEOs, or hoodie-donning tech billionaires. Rather, it's a surpassingly simple system to help everyday people become everyday innovators.
