Macao Company Laws and Regulations Handbook - Practical Information and Basic Laws IBP. Inc.,2008-03-03 Sentenced to death in 1965 at age twenty for an unpremeditated murder during the bungled holdup of a convenience store, Billy Wayne spent his first seven prison years on death row. When the death penalty was abolished, his sentence was life. Three-and-a-half decades later, Billy Wayne is still behind bars—feared by many politicians and prison officials for his well-known incorruptibility and unrelenting crusade for prison reform. This is his memoir. *A Life in the Balance* begins with an almost unbearable account of his early years—when he was so abused by his father one wonders how he survived—and his “escape” into a crowd of hooligans, which led him to the fateful day in 1965 when he held up the convenience store. His story takes you behind the metal doors of the Angola State Penitentiary to reveal the brutal truth of life inside. Here you will meet Billy Ray, Billy Wayne’s blood brother; old Emmitt Henderson, who died of prison neglect; Jamie Parks, a seventeen-year-old kid whose fate was sealed the day he arrived in Angola; Big Mick, who ran drugs in the prison to earn money to put his handicapped sister through college; Wilbert Rideau, Billy Wayne’s coeditor on *The Angolite*; the Dixie Mafia; and Richard Clark Hand, the young lawyer who took on Billy Wayne’s case and has been fighting for his release for thirty years.

Simula Research Laboratory Aslak Tveito,Are Magnus Bruaset,Olav Lysne,2009-10-22 When researchers gather around lunch tables, at conferences, or in bars, there are some topics that are more or less compulsory. The discussions are about the ho- less management of the university or the lab where they are working, the lack of funding for important research, politicians' inability to grasp the potential of a p- ticularly promising ?eld, and the endless series of committees that seem to produce very little progress. It is common to meet excellent researchers claiming that they have almost no time to do research because writing applications, lecturing, and - tending to committee work seem to take most of their time. Very few ever come into a position to do something about it. With Simula we have this chance. We were handed a considerable annual grant and more or less left to ourselves to do whatever we thought would produce the best possible results. We wanted to create a place where researchers could have the time and conditions necessary to re?ect over dif?cult problems, uninterrupted by mundane dif?culties; where doctoral students could be properly supervised and learn the craft of research in a well-organized and professional manner; and where entrepreneurs could ?nd professional support in developing their research-based - plications and innovations.
