Jeremy A. Rosenau, David L. Wilson

Apparel Merchandising Jeremy A. Rosenau, David L. Wilson, 2014-02-13 *Apparel Merchandising: The Line Starts Here* analyzes the evolution and development of the merchandising function in branded apparel companies and retail private label apparel. It describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Approached from the perspective of the apparel product manager, Rosenau and Wilson cover men's and women's sportswear and activewear and children's wear in both domestic and international markets. The text follows the evolution of the merchandising function with emphasis on product development and production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, marketing, and manufacturing functions along the way. The third edition emphasizes the increased importance of retailer's private brands, explores how companies apply technology to all facets of product development and supply chain management, and addresses the impact of social media on both retailers and apparel manufacturers.

Behind the Label Edna Bonacich, Richard Appelbaum, 2000-06-28 In a study crucial to our understanding of American social inequality, Edna Bonacich and Richard Appelbaum investigate the return of sweatshops to the apparel industry, especially in Los Angeles. The new sweatshops, they say, need to be understood in terms of the decline in the American welfare state and its

strong unions and the rise in global and flexible production. Apparel manufacturers now have the incentive to move production to wherever low-wage labor can be found, while maintaining arm's-length contractual relations that protect them from responsibility. The flight of the industry has led to a huge rise in apparel imports to the United States and to a decline in employment. Los Angeles, however, remains a puzzling exception in that its industry employment has continued to grow, to the point where L.A. is the largest center of apparel production in the nation. Not only the availability of low-wage immigrant (often undocumented) workers but also the focus on moderately priced, fashion-sensitive women's wear makes this possible. Behind the Label examines the players in the L.A. apparel industry, including manufacturers, retailers, contractors, and workers, evaluating the maldistribution of wealth and power. The authors explore government and union efforts to eradicate sweatshops while limiting the flight to Mexico and elsewhere, and they conclude with a description of the growing antisweatshop movement. Apparel Costing Andrea Kennedy, Andrea Reyes, Francesco Venezia, 2020-06-25
Newcomers to the fashion industry often base costings on the sum of a style's fabric, trims and labor-and to that they simply add their markup. However, every other activity of the business erodes that markup, and they find themselves with an unsustainable profit-or a loss. This guide will help you avoid these pitfalls to guarantee a sustainable profit. *Apparel Costing* details traditional and current costing methods for the fast-paced and e-commerce-focused fashion marketplace. You will learn industry-specific product/style costing that can be applied to garments produced both locally and globally. You'll also learn how to calculate line item percentages on indirect cost factors, such as factory sourcing, overhead, administration and product development. Key topics include: Target Market Pricing; Variable vs Fixed Costs; Direct vs Indirect Cost Factors; Cost-Based vs Value-Based Costing; Domestic vs International Production Costing; Effect of Sourcing on Costing; Sustainability in Costing; Fast Fashion vs. Slow Fashion

Shoplifting from American Apparel Tao Lin, 2009-09-15 A funny

autobiographical tale about growing up in the digital age, from a groundbreaking author whose writing is “reminiscent of early Douglas Coupland, or early Bret Easton Ellis” (The Guardian) This autobiographical novella is described by the author as “a shoplifting book about vague relationships,” and “an ultimately life-affirming book about how the unidirectional nature of time renders everything beautiful and sad.” From VIP rooms in hip New York City clubs to central booking in Chinatown, from New York University’s Bobst Library to a bus in someone’s backyard in a Floridian college town, from Bret Easton Ellis to Lorrie Moore, and from Moby to Schumann, Shoplifting from American Apparel explores class, culture, and the arts in all their American forms through the funny, journalistic, and existentially-minded narrative of someone trying to both “not be a bad person” and “find some kind of happiness or something.” “Tao's writing . . . has the force of the real.” –Ben Lerner, author of The Topeka School

Women's Attitudes Toward Cotton and Other Fibers Used in Wearing Apparel

Florence Skelly, Robert Goldberg, L. Yvonne Clayton, 1968

Threads Jane L. Collins, 2003-09-03 Americans have been shocked by media reports of the dismal working conditions in factories that make clothing for U.S. companies. But while well intentioned, many of these reports about child labor and sweatshop practices rely on stereotypes of how Third World factories operate, ignoring the complex economic dynamics driving the global apparel industry. To dispel these misunderstandings, Jane L. Collins visited

two very different apparel firms and their factories in the United States and Mexico. Moving from corporate headquarters to factory floors, her study traces the diverse ties that link First and Third World workers and managers, producers and consumers. Collins examines how the transnational economics of the apparel industry allow firms to relocate or subcontract their work anywhere in the world, making it much harder for garment workers in the United States or any other country to demand fair pay and humane working conditions. Putting a human face on globalization, *Threads* shows not only how international trade affects local communities but also how workers can organize in this new environment to more effectively demand better treatment from their distant corporate employers.

Free Trade & Uneven Development Gary Gereffi, David Spener, Jennifer Bair, 2002-08-12 This volume addresses many of the complex issues raised by North American integration through the lens of one of the largest and most global industries in the region: textiles and apparel. In part, this is a

story of winners and losers in the globalization process, especially if one focuses on jobs lost and jobs gained in different countries and communities within North America, defined here as: Canada, the United States, Mexico, Central America, and the Caribbean. However, it would be a mistake to view the industry solely in these zero-sum terms. The North American apparel industry is an excellent illustration of larger trends in the global economy, in which regional divisions of labor appear to be one of the most stable and effective responses to globalization. The contributors to this volume are an international and interdisciplinary group of scholars who have all done detailed fieldwork at the firm and factory levels in one or more countries of North America. Taken together the essays offer theoretical and methodological innovations built around the intersection of the global commodity chains and industrial districts literatures, as well as innovative approaches to studying the impact of cross-national, interfirm networks in terms of production and trade issues, and local development outcomes for workers and communities.
